Future Trends in Research Information Management

Workshop

2012-06-07

CRIS 2012 @ Prague, Czech Republic

Research Information Management

Research e-Infrastructure:

- CRIS
- Publication Repository
- Dataset Repository

Will larger structures arise?

Communities

- Bridge over the divide between
  - Research managers
  - Librarians

Can we bridge to other communities as well?

Replicating vs. Linking

Replication

- Vertical: Reporting
- Horizontal: Communication between peers

Linking

- Distributed querying
- Confusion of the languages
  - interpreters

Research is open

- Research information should be open, too
- To everybody?
  - Global competitors?
  - To non-adept journalists?

Advances in Technology

- Which new technology trends
  - Must be
  - Should be
  - Need not be

  pursued?
- How do we recognize them early enough?
