

Automated Enterprise Systems for Maximizing Business Performance

Part of the Advances in Business Information Systems and Analytics (ABISA) Book Series

Petraq Papajorgji (Canadian Institute of Technology, Albania), François Pinet (National Research Institute of Science and Technology for Environment and Agriculture, France), Alaine Margarete Guimarães (State University of Ponta Grossa, Brazil), and Jason Papathanasiou (University of Macedonia, Greece)

Description:

The integration of recent technological advances into modern business processes has allowed for greater efficiency and productivity. However, while such improvements are immensely beneficial, the modeling and coordination of these activities offers a unique set of challenges that must be addressed.

Automated Enterprise Systems for Maximizing Business Performance is a pivotal reference source for the latest scholarly research on the modeling and application of automated business systems.

This publication features timely, research-based chapters within the context of business systems including, but not limited to, enterprise security, mobile technology, and techniques for the development of system models.

Readers:

This book is an essential reference source for information system practitioners, business managers, and advanced-level students seeking the latest research on achievements in this field.
