CONTENTS

<i>The American Association for the Advancement of Science:—</i>	
<i>The Dependence of Progress in Science on the Development of Instruments:</i> PROFESSOR ANTHONY ZELENY	185
<i>Psychological and Historical Interpretations for Culture:</i> DR. CLARK WISSLER	193
Charles René Zeiller: E. W. B.	201
<i>Recommendations of the Pan-American Scientific Congress</i>	202
<i>Scientific Notes and News</i>	204
<i>University and Educational News</i>	207
<i>Discussion and Correspondence:—</i>	
<i>Parasites of the Muskrat:</i> DR. FRANKLIN D. BARKER. <i>The Use of the Injection Process in Class Work in Zoology:</i> RAPHAEL ISAACS. <i>The Poisonous Character of Rose Chafers:</i> J. M. BATES	208
<i>Scientific Books:—</i>	
<i>The British Antarctic Expedition:</i> DR. WM. H. DALL	10
<i>The Proceedings of the National Academy of Sciences:</i> EDWIN BIDWELL WILSON	211
<i>Notes on Meteorology and Climatology:</i> CHARLES F. BROOKS	212
<i>Special Articles:—</i>	
<i>The Development of the Phylloxera vastatrix Leaf Gall:</i> HARRY R. ROSEN	216
<i>The Quarter-centennial Anniversary of the Ohio Academy of Sciences:</i> PROFESSOR EDWARD L. RICE	217
<i>The Tennessee Academy of Science:</i> ROSCOE NUNN	218
<i>Societies and Academies:—</i>	
<i>The Botanical Society of Washington:</i> PERLEY SPAULDING. <i>The Anthropological Society of Washington:</i> DANIEL FOLKMAR ...	219

MSS. intended for publication and books, etc., intended for review should be sent to Professor J. McKeen Cattell, Garrison-on-Hudson, N. Y.

THE DEPENDENCE OF PROGRESS IN SCIENCE ON THE DEVELOPMENT OF INSTRUMENTS¹

OUR civilization is requiring for its physical welfare a more and more intimate knowledge of nature's forces. It is demanding this knowledge faster than it is being produced as a by-product in our educational institutions. Scientific investigation is becoming a large business. Governments have established research laboratories; private individuals have endowed others; universities are making more strenuous efforts than ever to encourage research and to make it a real part of their function; and commercial enterprises are finding it profitable to establish research laboratories on a large scale, not being able to wait for the random discoveries from other sources. These facts, alone, show that science is rendering an indispensable service.

The factors which are involved in the solution of scientific problems are in part mental and in part physical. Long experience has taught that however much we may owe to the great minds that evolve basic generalizations and hypotheses, real progress in science ultimately rests on the establishment of facts. Our reasoning faculties, by themselves, are unable to cope with the complexity of the physical world, and are sure to stray from reality unless they are continually guided by observation and experiment. Galileo with his experimental methods contributed more to sci-

¹ Address of the vice-president and chairman of Section B—Physics, American Association for the Advancement of Science, Columbus, December, 1915.
