Figure S10: Funnel plot of any reduced function CYP2D6 allele versus none for the composite outcomes.

All-cause mortality

All-cause mortality and surrogate endpoints for overall survival (including non-fatal events)

All-cause mortality, surrogate endpoints for overall survival (including non-fatal events) and non-fatal events

P-value for small study effects = 0.529
P-value for small study effects = 0.461
P-value for small study effects = 0.938

Footnotes: P-value for small study effects derived from Harbord test.
