Russell's Metaphysical Logic
Bernard Linsky
CONTENTS

1Russell’s Changing Ontology 1

2Universals and Propositional Functions 14
  2.1Universals 16
  2.2Propositional Functions 19
  2.3Universals and Types 32

3Propositions 41
  3.1Russell Abandons Propositions 45
  3.2The Unity of Propositions 47
  3.3Complex Entities 49

4The Ramified Theory of Types 55
  4.1Church’s r-types 55
  4.2The Paradox of Propositions 63
  4.3Other Formulations 66

5Types in Principia Mathematica 73
  5.1The Vicious Circle Principle 73
  5.2Predicative Functions and Matrices 77
  5.3Logical Form and Logical Type 85

6The Axiom of Reducibility 89
  6.1Objections to the Axiom 91
  6.2The Origin of the Axiom 93
  6.3Doubts About the Axiom 95
  6.4Principia Mathematica as Intensional Logic 99
  6.5Grelling’s Paradox and the Axiom 101
  6.6The Identity of Indiscernibles 104

7Logical Constructions 110
  7.1Definite Descriptions 115
7.2 The Multiple Relation Theory 123
7.3 The No-Class Theory 127
7.4 Constructing the Numbers 131
7.5 Constructing Matter 133
7.6 Constructions and Formal Semantics 136

8 POSTSCRIPT ON LOGICISM 139
