2012 12th International Workshop on Variable Structure Systems

(VSS 2012)

Mumbai, Maharashtra, India
12 – 14 January 2012
TABLE OF CONTENTS

Fixed-Time Stabilization of Linear Systems via Sliding Mode Control ................................................................. 1
A. Polyakov

Robust Sliding Mode Speed Hold Control System Design for Full Nonlinear Aircraft Model with Parameter Uncertainties: A Step Beyond ............................................... 7
E. Abulhamitibil, E. Jafarov

Continuous Finite-time Stabilization for Some Classes of Fractional Order ...................................................... 16
A. Pisano, M. Rapaic, E. Usai, Z. Jelicic

Study on the Use of Discretized Sliding-Mode Controller in DC-DC Switching Regulators .................................. 22
S. Maty, D. Roy

Sliding Mode Control with Complementary Inputs for a Lean-Burn IC Engine .................................................. 28
N. Roqueiro, E. Colet, A. Oliveira, P. Puleston

Variable Structure Observer For Discrete-Time Multi-Output Systems ....................................................... 34
L. Orihuela, X. Yan, S. Spurgeon, F. Rubio

Sliding-mode Boundary Control of Uncertain Reaction-Diffusion Processes with Spatially Varying Parameters ........................................................................................................... 40
Y. Orlov, A. Pisano, S. Scodina, E. Usai

Attitude Control of Magnetic Actuated Spacecraft using Super-Twisting Algorithm with Nonlinear Sliding Surface ....................................................................................................... 46
S. Janardhanan, M. Nabi, P. Tiwari

DSP based Tracking of Twin Spool Gas Turbine using Reduced Output Feedback Sliding Mode Control ........... 52
R. Tiwari, S. Janardhanan

On the Observer Assisted Sliding Mode Creation: An Active Disturbance Rejection Approach .................... 57
H. Sira-Ramirez, A. Luviano-Juarez, J. Cortes-Romero

Identification Of Heavy Vehicle Parameters And Impact Forces Estimation: Experimental Results ............. 63
H. Jin, H. Fridman, H. Shraim

Sliding Mode Control of Active Suspension Systems using a Disturbance Observer ..................................... 70
V. Deshpande, M. Bhaskara, S. Phadke

Output High Order Sliding Mode Control of Unity Power Factor in Three-Phase AC/DC Boost Converter ........... 76
J. Liu, S. Laghrouche, M. Wack

Some Remarks About The Tradeoffs Between Exactness And Robustness In Control ..................................... 82
M. Angulo, J. Moreno, L. Fridman

DSM Control of Perishable Inventory Systems with Remote Supply Source and Uncertain Demand .............. 88
P. Ignaciuk, A. Bartoszewicz

Position Tracking of the VGT Single Acting Pneumatic Actuator with 2nd order SMC and Backstepping Control Techniques ................................................................. 94
A. Mehmod, S. Laghrouche, M. Bagdouri

Improved Adaptive Control of Nonlinear Uncertain Systems Through Second Order Sliding Mode Controller .................................................................................................................. 100
S. Mondal, C. Mahanta

Design Decentralized Sliding Mode Controllers with Dynamic Decouplers for TITO Processes .................... 105
B. Musmade, B. Patre

Generalized "Twisting" Controller Of A Parametrically Excited Crane .......................................................... 111
C. Vazquez, L. Fridman, J. Collado

Purely Magnetic Spacecraft Attitude Control by Using Classical and Modified Sliding Mode Algorithms ......................... 117
A. Sofyah, E. Jafarov

Binary Robust Adaptive Control for Global Tracking of Uncertain Systems with Unknown High-Frequency-Gain Sign ...................................................................................................... 124
T. Oliveira, A. Peixoto, E. Nunes, L. Hsu

Tuning Rules for Second Order Sliding Mode Based Output Feedback Synthesis .......................................... 130
H. Oza, Y. Orlov, S. Spurgeon

Sliding Mode Observer Based Adaptive Control of a VGT Single Acting Pneumatic Actuator ......................... 136
A. Mehmod, S. Laghrouche, M. Bagdouri
Non-singular Terminal Sliding Mode Guidance and Control with Terminal Angle Constraints for Stability Analysis of Small Satellite Formation Flying and Reconfiguration Missions in Deep Space

Sliding Mode Compensation of Inverse Dynamics Velocity Control

Homogeneous Higher Order Sliding Mode Control for PEM Fuel Cell

A Variable Structure Observer For An On-Line Estimation Of A Tyre Rolling Resistance And Effective Radius

Cascaded Sliding-Mode Control of Permanent Magnet Synchronous Motors

Twisting Algorithm Adaptation For Control Of Electropneumatic Actuators

Multi Input Sliding Mode Control of an Autonomous Fuel Cell-Supercapacitor Hybrid System

A New Nonlinear Guidance Law Formulation for Proportional Navigation Guidance

Cascaded Second Order Sliding Mode Observer For State And Friction Dynamics Of A Control Valve

Continuous And Discrete Sliding Mode Control For Systems With Parametric Uncertainty Using Delay-Ahead Prediction

Enhanced Fault Reconstruction using Cascaded Sliding Mode Observers

Performance Analysis of Shunt Active Power Filter Using Sliding Mode Control Strategies

Exploring Scope of Practical Implementation of Variable Structure Systems Using Sliding Mode Control to Arc Welding Process

Higher Order Sliding Mode Control of Permanent Magnet DC Motor

Sliding Mode Reference Conditioning For Coordination In Swarms Of Non-Identical Multi-Agent Systems

Robust Control with Simultaneous State and Disturbance Estimation using Sliding Modes

Quantization Effect On Sliding-Mode Control Of A Second-Order Dynamical System

A Sliding Mode Observer Based Sensor Fault Detection and Isolation Scheme for a Nonlinear Satellite System

Self-Oscillating Relay Feedback Systems: A Review and Recent Results

Sliding Mode State Filtering and Parameter Estimation for Stochastic Linear Systems

Application of Optimized Higher Order Sliding Mode Control on MEMS Optical Switch

Observers in the Sliding Mode Control of Uncertain Nonlinear Nonaffine Systems with Matched and Unmatched Uncertainties

Sliding Mode Mean-Square Controller Design for Linear Stochastic Systems with Unknown Parameters

Stability Analysis of Small Satellite Formation Flying and Reconfiguration Missions in Deep Space

Non-singular Terminal Sliding Mode Guidance and Control with Terminal Angle Constraints for Non-manoeuvering Targets

S. Kumar, S. Rao, D. Ghose

S. Bandyopadhyay, C. Saaj, B. Bandyopadhyay

M. Basin, P. Rodriguez-Ramirez

G. Bartolini, E. Punta

M. Basin, P. Rodriguez-Ramirez

S. Bandyopadhyay, C. Saaj, B. Bandyopadhyay

S. Kumar, S. Rao, D. Ghose
