# Who is Kerri Rivera?

- Mom to Alex /16 (NT), and Patrick /12 (autism)
- Lives in Puerto Vallarta, Mexico
- Director of AutismO<sub>2</sub> clinic
- Trained in the biomedical protocol formerly known as DAN!
- Advisor and board member at Curando el Autismo (CEA) Foundation and Venciendo el Autismo (International protocol consultant)
- Not an allopathic doctor, Not a plumber, nor a chef
- Here to share with you what I have witnessed 93 times in the past 2.5 years.
- Homeopath as of June 9, 2013

# What are the scientifically validated underlying causes of autism that suggest efficacy of chlorine dioxide?

- After helping thousands of families with children on the spectrum. I have seen that people with regressive autism share:
  - Virus
  - Bacteria
  - Candida
  - Parasites (helminths)
  - Heavy Metals
  - Inflammation
  - Allergies

# Studies and articles focusing on pathology in the ASD's

- Intestinal Microflora of Autistic children – Med Dosw Mikrobi.

- Etc., Etc., Etc.

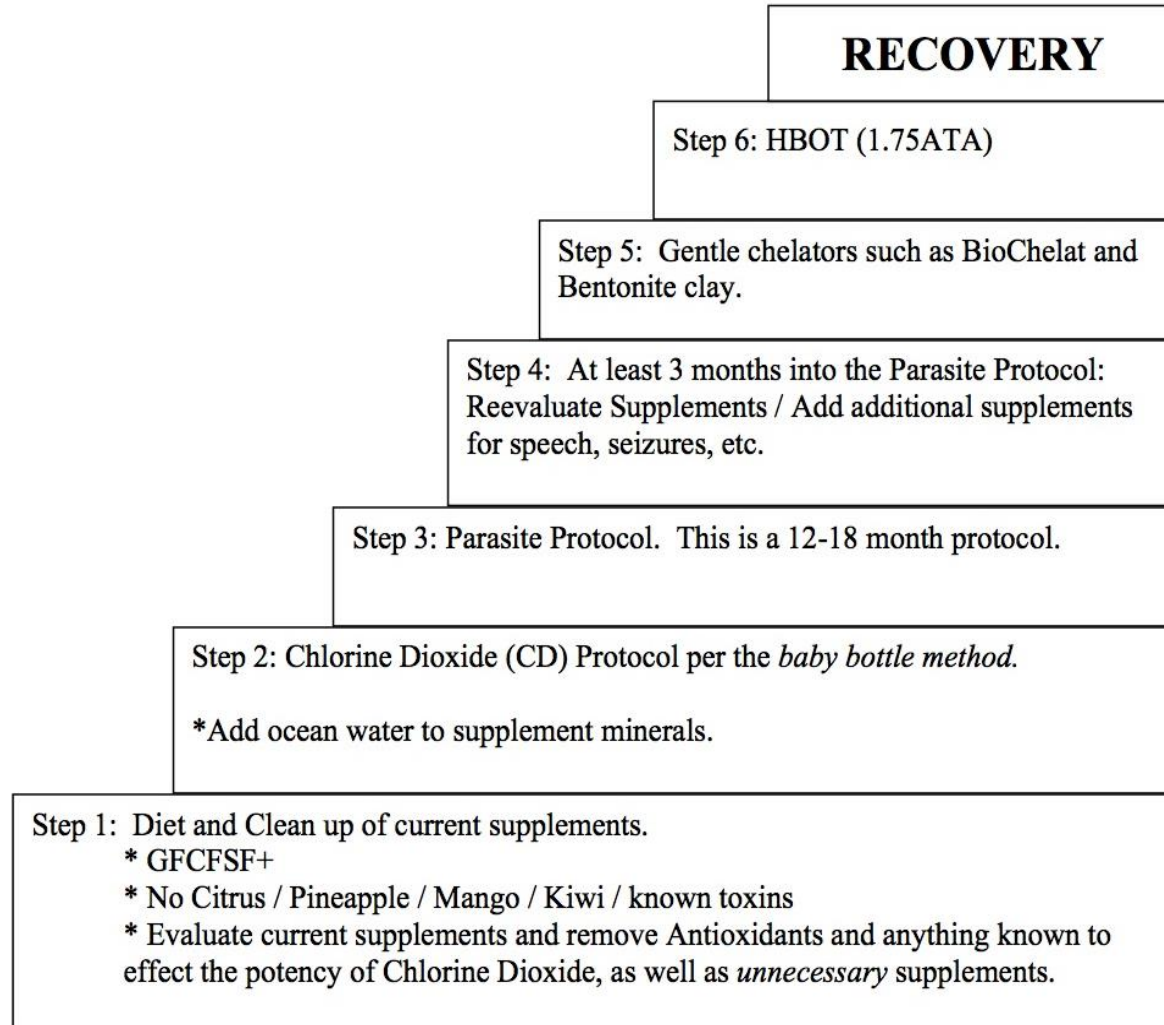

# Biofilm

In the intestines of people on the autism spectrum there exists a thin web composed of virus, bacteria, candida, parasites and heavy metals inside a polysaccharide matrix, known as biofilm. Dr. Anju Usman identified this several years back thus allowing us to understand how to heal children with autism. CD is known to break the bonds that join these pathogens to heavy metals while oxidizing the pathogens themselves and neutralizing the heavy metals. Biofilms are hard to eliminate and may go undetected by the immune system.

# The Protocol that has helped 93 children to recover from autism.

# Step 1 - Diet

- Gluten Free/Casein Free/Soy Free +
- Clean up supplements
- Most important piece of the Protocol
- All 93 children who recovered implemented the diet

# Diet – Avoid!

- In addition to being GF/CF/SF, in order to maximize the results of The Protocol we need to avoid:
- Antioxidant supplements
- Foods high in antioxidants (mango, pineapple, oranges, lemons, limes, grapefruits, kiwi, and limit berries)
- All juice – no matter what kind.

# Step 2 - Chlorine Dioxide (CD)

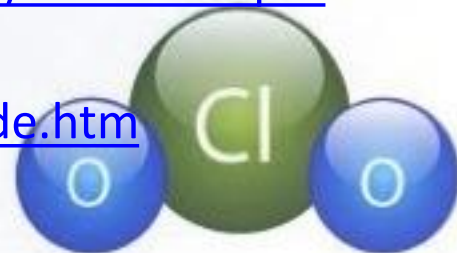

- The Protocol focuses on excesses not deficiencies
- If we eliminate the following excesses:
  - Viruses
  - Bacteria
  - Candida
  - Parasites (helminths)
  - Heavy Metals
  - Inflammation
  - Allergies

We can eliminate the diagnosis of autism by eliminating the excess pathogens.

# CD continued

- Chlorine dioxide is a low voltage oxidizer known to destroy pathogens, some parasites, eliminate biofilm, neutralize heavy metals and in turn help reduce inflammation and allergies.
- FDA approves CD for water treatment, sterilization of fruit, veggies and meat, among other things.
  - FDA approves CD for water treatment, and as an antimicrobial to wash fruit, veggies, meat, etc. <http://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfcfr/CFRSearch.cfm?fr=173.300>
  - CD is a known antimicrobial <http://www.clordisys.com/WhatIsCD.pdf>
  - CD is known to penetrate biofilms <http://www.lenntech.com/library/clo2/chlorine-dioxide.htm>

# $\text{ClO}_2 \neq \text{Cl} \neq \text{NaOCl}$

- Chlorine (Cl) and chlorine dioxide ( $\text{ClO}_2$ ) are as different as oxygen ( $\text{O}_2$ ) and ozone ( $\text{O}_3$ ), if not more so.
- Chlorine and sodium hypochlorite both kill through “chlorination” which can form new compounds, including potentially carcinogenic trihalomethanes.
- Chlorine dioxide is a “clean kill” leaving behind 2 neutral oxygen atoms, and one chlorite molecule which bonds with sodium in the body to form NaCl – table salt.

# CD is not bleach

- Bleach is more than 10,000 times stronger than chlorine dioxide.
- Chlorine dioxide is used at the concentrations of 25 to 50 ppm in 1/2 glass of water for an 80 kg (176 pound) man.
- To actually “bleach” it would take 50 eight oz. glasses containing 10,000 ppm of chlorine dioxide to bleach the same amount of cotton as the weight of a man.
- Since 50 ppm of chlorine dioxide won't bleach anything, legally and logically it cannot be called a bleach
  - *More info on amounts used by industry for bleaching:  
Environmentally Benign Approaches for Pulp Bleaching*

# Safety of CD

In 1982, a research testing program was conducted to study and compare acutely increasing doses of chlorine dioxide, sodium chlorate, and sodium chlorite.

It used adult male volunteers and was conducted by Judith R. Lubbers, Sudha Chauhan, and Joseph R. Bianchine under the auspices of the US EPA #CR805643\*.

It covered 12 weeks in all and advanced to using doses up to 25ppm. Yet no adverse reactions or effects were noted in any of the test subjects.

Data can be found by using the US EPA CR# above or by going to Environmental Health Perspectives, Department of Pharmacology, The Ohio State University, College of Medicine,

# Approved uses of CD

(Frontier Farmaceutical, Alcide, Bioxy, etc.)

- DioxiRinse™ Mouthwash
- DioxiBrite™ Toothpaste
- DioxiWhite™ Pro Teeth Whitener
- WhiteLasting™ Maintenance Gel
- BioClenz™ Dental Unit Waterline Cleaner
- Penetrator™ Periodontal Gel
- Simply Clear™ Acne Treatment
- DioxiWhite™ Home Teeth Whitener
- Cankers Away™ Canker Sore Cure
- DX7™ Skin Protectant Gel
- Periodontitis Treatment
- DioxiSmooth™ Facial Exfoliant
- Gingivitis Treatment Surface Disinfection
- Fire Fighter™ Burn Pain Reliever
- DioxiGuard™ Spray Disinfectant
- Nail-It™ Nail Protector

# Patents for CD

- Nontoxic Antiseptic (Pat 4035483/1977)
- For combatting human amoebas (Pat.4296102/1981)
- Against dementia caused by AIDS (Pat.5877222/1999)
- For curing all types of illness of the skin (Pat 4737307/1988)
- For disinfecting live blood (Pat. 5019402/1991)
- For curing injuries more rapidly (Pat. 5855922/1999)
- For all types of oral care (Procter & Gamble) (Pat. 6251372B1/2001)
- Against infections caused by bacteria (Pat. 5252343/1993)
- For treatment of severe burns (Pat.4317814/1982)
- For the regeneration of bone marrow (Pat. 4851222/1989)
- Treatment of Alzheimers, dementia etc. (Pat. 8029826B2/2011)
- To stimulate the immune system in animals (Pat. 6099855/2000)
- To stimulate the immunological system (Bioxy. Inc.) (Pat. 5830511/1998)

# Oxidation is not oxidative stress

- Oxidation is the way oxidizers kill
- Oxidative stress is what pathogens and parasites cause in the body
- Helminths (parasites) produce:
  - Ammonia
  - Malondialdehyde (MDA)
  - Histamine
  - Formaldehyde
  - Morphine

# Ocean water

- 90 minerals 100% bioavailable
- Balances minerals
- Fortalizes the immune system
- Detoxes cells inside and out
- Reduces fatigue and stress
- Improves conductivity in the brain
- Revitalizes and remineralizes cells
- Reestablishes homeostasis
- Nearly identical to blood
- The body assimilates sea water far better than any synthetic supplement.

# Step 3 - Kalcker Parasite Protocol

- 12-18 month protocol to rid the body of parasites.
  - Mebendazole
  - Pyrantel Pamoate
  - Diatomaceous earth
  - Castor Oil
  - Neem
  - Rompe piedras
  - CD enemas

# Parasite Photos

# Step 4 - Other Supplements

- After 3 months on CD, ocean water and 3 parasite protocols completed, supplements may be added at this time in for speech, seizure control, etc if they are needed. Some are...
- Gaba
- DMG/TMG
- Omegas (vegan)
- L-carnitine
- L-carnosine
- Probiotics
- Digestive enzymes

# Step 5 - Gentle Chelators

- Some children may need to use Bentonite clay or a product called Bio-Chelat to help the body rid itself of excess heavy metals.
- Methylation cycles have been found to be impaired in many children on the ASD. All the more reason we may need to assist the body in the detoxification process.

# Step 6 - HBOT

- Reduces cerebral and intestinal inflammation.
- Stimulates the development of stem cells.
- Improves language, cognition, and social ability.
- 20 sessions for 90 minutes at 1.75 ATA.
- After the first round of HBOT we do 10 sessions of 90 minute at 1.75 ATA every three months.

# Autism Treatment Evaluation Checklist

- ATEC
- [www.autism.com](http://www.autism.com)
- Free
- Do it every 3 months at least to measure the progress of your child during any protocol.
- An ATEC score under 10 is no longer considered autism nor PDD-NOS.

# Protocol Statistics from ATECs

- The average drop between ATEC1 and ATEC2, from a 259 children was 14 points. The average time between those ATECs was 3 months. The average drop between those 2 ATECs if the child started at over 100 points was 26. (30 children who started with over 100 have done 2 ATECs for us)
- The average drop between ATEC1 and ATEC3, from 211 children was 20 points. The average time between those ATECs was 6 months. The average drop between those 2 ATECs if the child started at over 100 points was 36. (25 children who started over 100 have done 3 ATECs for us)
- The average drop between ATEC1 and ATEC4, from 137 children was 24 points. The average time between those ATECs was 9 months. The average drop between those 2 ATECs if the child started at over 100 points was 44. (17 children who started over 100 have done 4 ATECs for us)
- The average drop between ATEC1 and ATEC5, from 28 children was 30 points. The average time between those ATECs was 12 months. The average drop between those 2 ATECs if the child started at over 100 points was 73 (only 3 children who started over 100 have done 5 ATECs for us)

# Recovery

Gracias a Dios por poner en nuestro camino a Kerri Rivera, y devolvernos a nuestro príncipe totalmente recuperado.

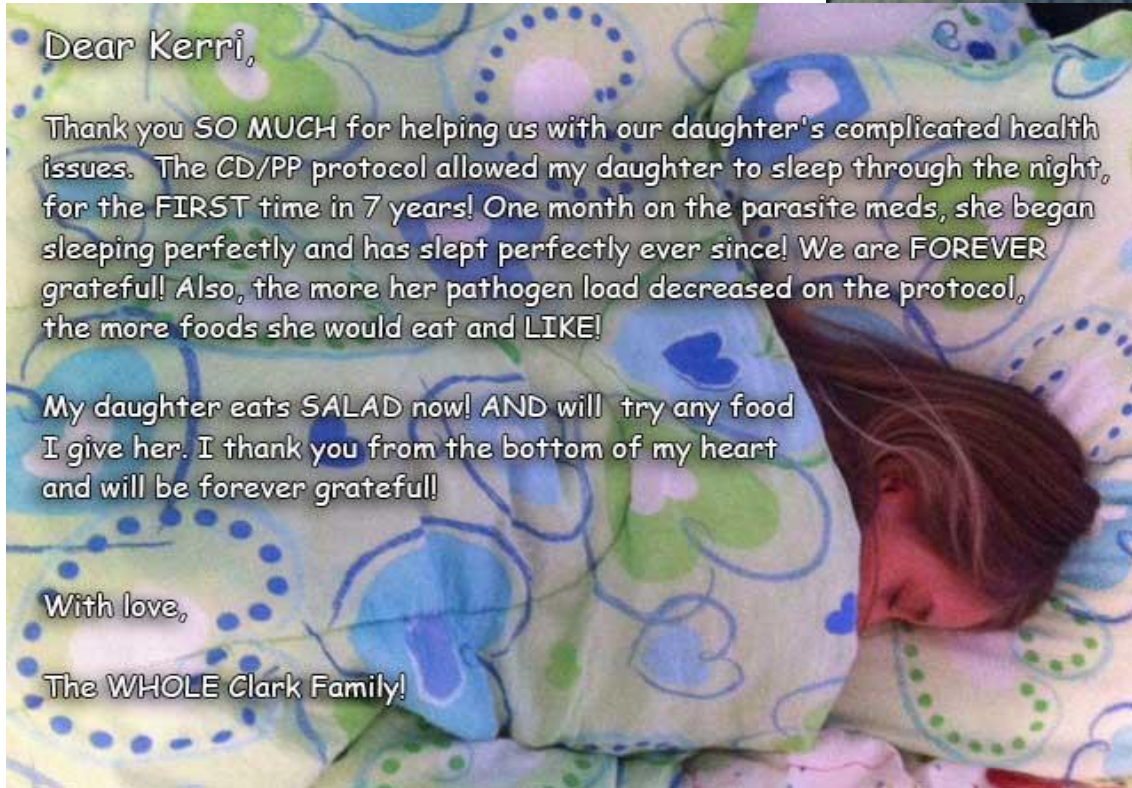

Dear Kerri,

Thank you SO MUCH for helping us with our daughter's complicated health issues. The CD/PP protocol allowed my daughter to sleep through the night, for the FIRST time in 7 years! One month on the parasite meds, she began sleeping perfectly and has slept perfectly ever since! We are FOREVER grateful! Also, the more her pathogen load decreased on the protocol, the more foods she would eat and LIKE!

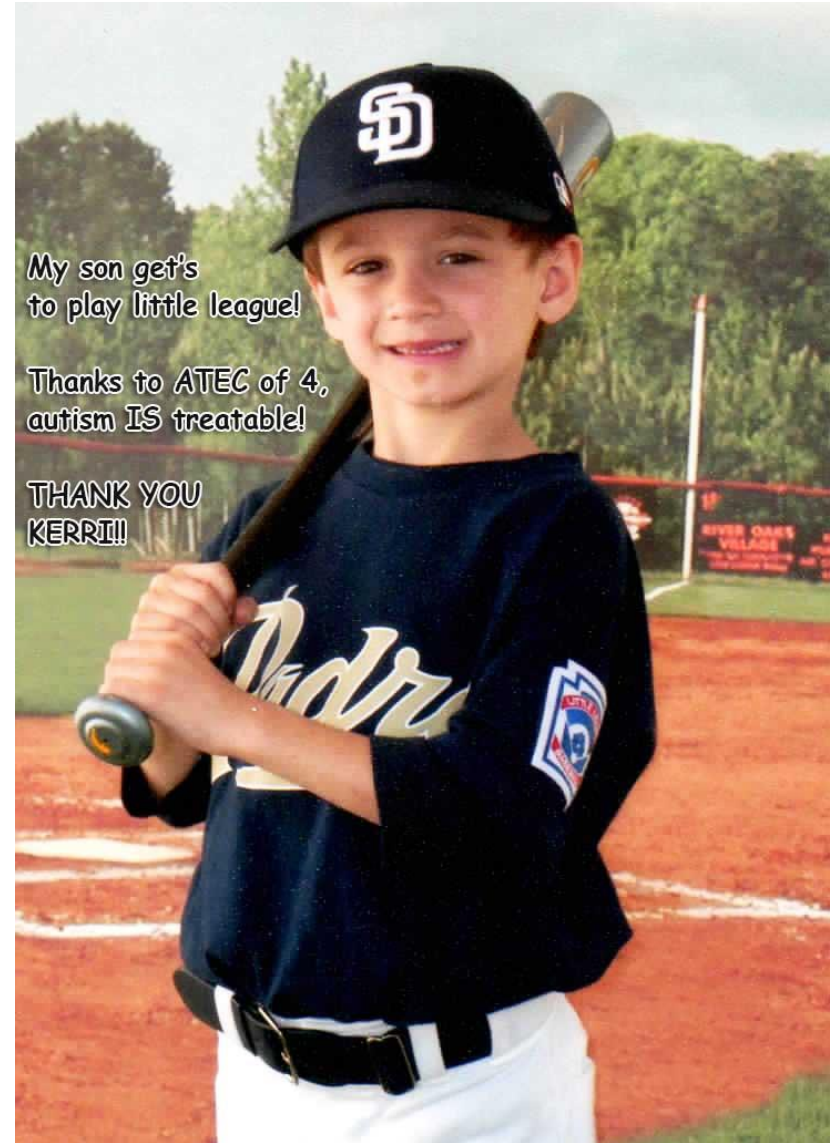

My daughter eats SALAD now! AND will try any food I give her. I thank you from the bottom of my heart and will be forever grateful!

With love,

The WHOLE Clark Family!

# Recovery

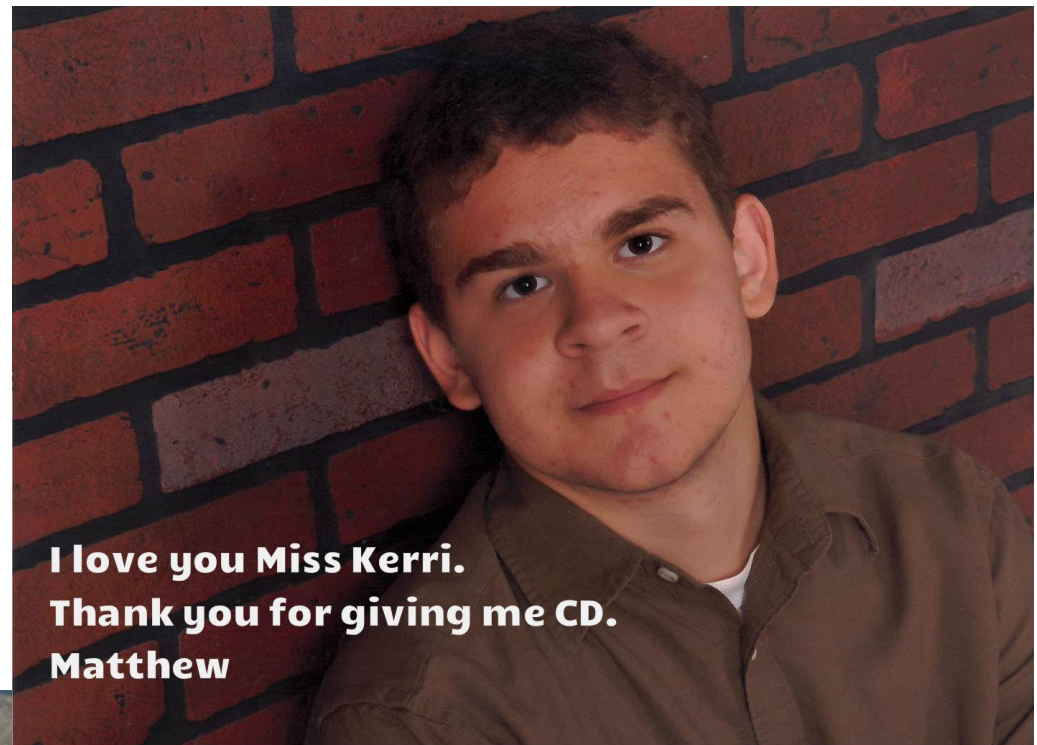

My son get's  
to play little league!

Thanks to ATEC of 4,  
autism IS treatable!

THANK YOU  
KERRI!!

# Recovery

**I love you Miss Kerri.  
Thank you for giving me CD.  
Matthew**

**If it were not for you  
Kerri,  
my mother would still  
be worried about my  
future.**

**You are my  
Guardian Angel !  
Autism is curable!**

**Gracias a “ti “  
mi mama puede  
ser feliz, y sin  
preocupación de mi  
futuro.**

**Eres mi Angel!**

# Available Now!

A do it yourself autism recovery guide. Learn about the Protocol that has helped 93 children recover from an Autism Spectrum Disorder.

Look for it June 1<sup>st</sup> at [www.CDAutism.org](http://www.CDAutism.org)

# Final wish/Parent testimonies

- My wish is to have a world with healthy children that we all had.
- I wish for the end to this epidemic.
- I wish for all of us to find the healing modality that is right for us and our family.
- Sharing the dream come true with you are 3 moms, live and in person with before and after CD...recovery happens here.
