Table of Contents

TIME FREQUENCY ANALYSIS AND WAVELETS

Chair: Steve Elgar, Washington State University (USA)

On Local Orthonormal Bases for Classification and Regression 1529
Naoki Saito, Schlumberger-Doll Research, Ronald R. Coifman, Yale University (USA)

On the Equivalence of Generalized Joint Signal Representations 1533
Akbar M. Sayeed, Douglas L. Jones, University of Illinois (USA)

Evolutionary Spectral Analysis and the Generalized Gabor Expansion 1537
Aydin Akan, L. F. Chaparro, University of Pittsburgh (USA)

Orthonormal Bases of Bandlimited Wavelets with Frequency Overlap 1541
Sokbom Han, Douglas Cochran, Arizona State University (USA)

M-Band Wavelet Decomposition of Second Order Random Processes 1545
J.-C. Pesquet, CNRS/UPS (FRANCE)

Time-Frequency Formulation and Design of Nonstationary Wiener Filters 1549
Heinrich Kirchauer, Franz Hlawatsch, Vienna University of Technology; Werner Kozek, University of Vienna (AUSTRIA)

Variable Frequency Evolutionary Spectrum 1553
C. S. Detka, A. El-Jaroudi, University of Pittsburgh (USA)

Discrete Scale Transform for Signal Analysis 1557
Eugene J. Zalubas, William J. Williams, University of Michigan (USA)

Best Basis Algorithm for Signal Enhancement 1561
Hamid Krim, Massachusetts Institute of Technology, S. Mallat, Courant Institute, D. Donoho, Stanford University, A.S. Willsky, Massachusetts Institute of Technology (USA)

Time-varying Filtering via Multiresolution Parametric Spectral Estimation 1565
A.A. (Louis) Beex, Min Xie, Virginia Tech (USA)

HIGH ORDER MODELING AND ANALYSIS

Chair: Jitendra K. Tugnait, Auburn University (USA)

Reduced Parameter Volterra Filters 1569
Robert D. Nowak, Barry D. Van Veen, University of Wisconsin-Madison (USA)

A Class of Second Order Self-Similar Processes for 1/f Phenomena 1573
Birsen Yaziçi, G.E. Corporate Research and Development; Rangasami L. Kashyap, Purdue University (USA)

Higher-Order Scale Spectra and Higher-Order Time-Scale Distributions 1577
Branko Ristic, Geoff Roberts, Boualem Boashash, Queensland University of Technology (AUSTRALIA)

BET, the Bicorspectral Transform Definition, Properties, Implementation & Applications 1581
P. Duvaut, ETIS-ENSEA, T. Gouraud, Université de Nantes (FRANCE)

Detection of Nonlinearity in Sea Surface SAR Imaging Process Using Bispectrum Method Estimation 1585
J.M. Le Caillec, R. Garello, Telecom Bretagne, B. Chapron, IFREMER (FRANCE)

Robustification of Cyclostationary Array Processing Techniques 1589
Paul D. Burns, Zhi Ding, Auburn University (USA)

Performance Analysis for a Class of Amplitude Modulated Polynomial Phase Signals 1593
Guotong Zhou, University of Virginia, Ananthram Swami, Malgudi Systems (USA)

Linear Parametric Models for Signals with Long-Range Dependence and Infinite Variance 1597
Stephen M. Kogon, Georgia Institute of Technology, Dimitris G. Manolakis, Boston College (USA)
Blind Identification of Nonlinear Models Using Higher Order Spectral Analysis
Shankar Prakriya, Dimitrios Hatzinakos, University of Toronto (CANADA)

A Parametric Set of Spectral Estimates and Their Performance
Roman Ugrinovsky, Russian Academy of Sciences (RUSSIA)

POWER SPECTRAL ESTIMATION

Chair: Dan Fuhrmann, Washington University (USA)

Decomposition of a Mixture of Gaussian AR Processes
Christophe Couvreur, Yoram Bresler, University of Illinois at Urbana-Champaign (USA)

Recursive Estimation of Signals in an Autoregressive Noise
T. Gouraud, Université de Nantes, F. Auger, LRTI, M. Guglielmi, Université de Nantes (FRANCE)

Frequency Estimation of Multiplicative ARMA Noisy Data
Mounir Ghogho, ENSEEIHT/GAPSE (FRANCE)

A Multiple Window Method for Estimation of a Peaked Spectrum
Maria Hansson, Tomas Gänslers, Göran Salomonsson, Lund University (SWEDEN)

Model Order Selection of Damped Sinusoids by Predictive Densities
William B. Bishop, Petar M. Djurić, SUNY at Stony Brook (USA)

Estimation of Mixed Spectrum Using Genetic Algorithm
A. Sano, Y. Ashida, K. Ohnishi, Keio University (JAPAN)

Estimation of Spectral Correlation Using Filter Banks
Thomas Frederick, Sensormatic Electronics; Nurgun Erdol, Florida Atlantic University (USA)

An Unified Prefiltering-Based Approach to Harmonic Retrieval in Non-Gaussian ARMA Noise
Ying-Chang Liang, Xian-Da Zhang, Yan-Da Li, Tsinghua University (PEOPLES REPUBLIC OF CHINA)

A Generalization to the Teager-Kaiser Energy Function & Application to Resolving Two Closely-Spaced Tones
Wei Lin, Chris Hamilton, Prabhakar Chitrapu, Dialogic Corporation (USA)

ARRAY PROCESSING BOUNDS AND PERFORMANCE ESTIMATION

Chair: Hagit Messer, Tel-Aviv University (ISRAEL)

The Use of the Barankin Bound for Determining the Threshold SNR in Estimating the Bearing of a Source in the Presence of Another
Ilan Reuven, Hagit Messer, Tel-Aviv University (ISRAEL)

Ziv-Zakai Lower Bounds in Bearing Estimation
Kristine L. Bell, Yariv Ephraim, Harry L. Van Trees, George Mason University (USA)

Theoretical Comparison for Biases of MUSIC-Like DOA Estimators
Wenyuan Xu, Mostafa Kaveh, University of Minnesota (USA)

Analyzing the Effects of Constraints and InterSignal Coherence on the MUSIC Algorithm
D. Linebarger, R. DeGroat, E. Dowling, G. Fudge, University of Texas at Dallas (USA); Petre Stoica, Chalmers University of Technology (SWEDEN)

Performance Analysis of the Minimum Variance Beamformer
Yosef Anu, Mati Wax, RAFAEL (ISRAEL)

Comparative Studies of MUSIC and MVDR Location Estimators for Model Perturbations
Chandra Vaidyanathan, Kevin M. Buckley, University of Minnesota (USA)

The Best Achievable Performance for DOA Estimation Using ESPRIT Arrays
Yinong Ding, Joint E-mu/Creative Tech Center, Richard J. Vaccaro, University of Rhode Island (USA)

Acoustic Vector-Sensor Beamforming and Capon Direction Estimation
Malcolm Hawkes, Arye Nehorai, Yale University (USA)

Array Processing Using Parametric Signal Models
Ariela Zeira, Signal Processing Technology, Ltd.; Benjamin Friedlander, University of California (USA)
Parallel Computation of Higher Order Moments on the MasPar-1 Machine
John N. Kalamatianos, Elias S. Manolakos, Northeastern University (USA)

Computing Symmetric Wavelet Transforms Using DCT and DST
Mingui Sun, Ching-Chung Li, Robert J. Sclabassi, University of Pittsburgh (USA)

Fast Estimation of the Parameters of Alpha-Stable Impulsive Interference Using Asymptotic Extreme Value Theory
George A. Tsihrintzis, University of Virginia; Chrysostomos L. Nikias, University of Southern California (USA)

DIGITAL COMMUNICATIONS

Chair: C. R. Johnson, Jr., Cornell University (USA)

Detection of Spread-Spectrum Signals in a Multi-user Environment
Urbashi Mitra, Ohio State University; H. Vincent Poor, Princeton University (USA)

Parallel Feedforward Equalization - A New Nonlinear Adaptive Algorithm
Jian Zhan, Jin S. Zhang, Fu Li, Portland State University; Zhigang Fan, Xerox Corporation (USA)

Performance of FH SS Radio Networks with Interference Modeled as a Mixture of Gaussian and Alpha-Stable Noise
J. Ilow, D. Hatzinakos, A.N. Venetsanopoulos, University of Toronto (CANADA)

The Performance of Multichannel Adaptive Equalization for LOS Digital Communication Corrupted by Interference
Michael Reuter, Richard North, James Zeidler, NCCOSC (USA)

A Probability Model Describing the Output of a Wideband Stereo Audio Coder
Mehmet Zeytinoğlu, Ryerson Polytechnical University (CANADA); Yen Chuan Hsu, University of Westminster (UK)

Spread Spectrum Sequence Estimation and Bit Synchronization Using an EM-Type Algorithm
Ilan Sharfer, Alfred O. Hero, University of Michigan (USA)

Classification of PSK Signals Using the DFT of Phase Histogram
P. C. Sapiano, J.D. Martin, R.J. Holbeche, University of Bath (UK)

MMSE Antenna Diversity Equalization of a Jammed Frequency-Selective Fading Channel
Pierre Vila, François Pipon, Didier Pirez, Thomson CSF, Luc Féty, CNAM (FRANCE)

Blind Multiuser Identification and Detection in CDMA Systems
Javier R. Fonollosa, José A. R. Fonollosa, Universitat Politècnica de Catalunya, (SPAIN); Zoran Zvonar, Analog Devices (USA); Josep Vidal, Universitat Politècnica de Catalunya (SPAIN)

ARRAY CALIBRATION AND BLIND BEAMFORMING

Chair: Benjamin Friedlander, University of California at Davis (USA)

Optimal Direction Finding with Partially Calibrated Arrays
A. Swindlehurst, Brigham Young University (USA)

Robust Bearing Estimation in the Presence of Direction-Dependent Modelling Errors: Identifiability and Treatment

Analysis of Signal Estimation Using Uncalibrated Arrays
Anthony J. Weiss, Tel-Aviv University (ISRAEL); Benjamin Friedlander, University of California-Davis (USA); David D. Feldman, Technion (ISRAEL)

A Self-Calibration Algorithm for Cyclostationary Signals and Its Uniqueness Analysis
Patrick C. Yip, Yifeng Zhou, McMaster University (CANADA)

Full Space-Time Clutter Covariance Estimation
Frank C. Robey, Edward J. Baranoski, MIT Lincoln Laboratory (USA)

Considerations in the Autocalibration of Quadrature Receivers
J.W. Pierre, University of Wyoming, D.R. Fuhrmann, Washington University (USA)
Wideband Multi-source Beamforming with Adaptive Array Location Calibration and Direction Finding
Saeed Gazor, Sofiene Affes, Yves Grenier, Télécom Paris (FRANCE) 1904

Optimum Cumulant-Based Blind Beamforming for Coherent Signals and Interferences
Egemen Gönen, Jerry M. Mendel, University of Southern California (USA) 1908

Blind Source Detection and Separation Using Second Order Non-stationarity
Antoine Souloumiac, Schlumberger Industries (FRANCE) 1912

Maximum SINR Beamforming for Correlated Sources
J. Yang, A. Swindlehurst, Brigham Young University (USA) 1916

DSP APPLICATIONS TO PHYSICAL AND BIOLOGICAL MEASUREMENTS

Chair: Boulalem Boashash, Q.U.T., Signal Processing Research Centre (AUSTRALIA) 1920

Separation of Forward and Backward Acoustic Waves in a Car Exhaust by Array Processing
Gema Piñero, Luis Vergara, Universidad Politécnica de Valencia (SPAIN)

Design of Optimum Periodic Time Varying Filters for Applications in Combustion Diagnosis of Car Engines
Detlef König, Christian Törk, Johann F. Böhme, Ruhr University Bochum (GERMANY) 1924

Using Recursive Parameter Estimation for Sleep Disorder Discrimination
A.M. Oroujeh, W. O'Neil, A.P. Keegan, S.L. Merritt, University of Illinois at Chicago (USA) 1928

Detection of Human Reflex Response Time-Delay to a Stretch Muscular Perturbation
P. Poignet, M. Guglielmi, B. Vozel, Université de Nantes; I. Richard, Hôpital Saint-Jacques (FRANCE) 1932

Seizure Analysis of Newborn EEG Using a Model Based Approach
Mark Roessgen, Boualem Boashash, Queensland University of Technology (AUSTRALIA) 1936

Approximate Maximum Likelihood Estimators for Position and Energy in Scintillation Cameras
Neal H. Clinthorne, Chor-yi Ng, W. Leslie Rogers, University of Michigan (USA) 1940

Maximum Likelihood Estimation for Superimposed Exponentially Decaying Fluorescence Processes
D. Kraus, A. Beckmann, A. Krupp, S. Ries, Atlas Elektronik (GERMANY) 1944

Adaptive Extraction of Resonances in Acoustic Backscatter from Elastic Targets
Mahmood R. Azimi-Sadjadi, Colorado State University, JoEllen Wilbur, Gerald J. Dobeck, Coastal Systems Station (USA) 1948

Detection of Helicopter Signals Using Cyclostationarity
Zhiping Lin, Defence Science Organization (SINGAPORE) 1952

Signal Subspace Techniques for DOA Estimation Using Higher Order Statistics
A. R. Leyman, T.S. Durrani, University of Strathclyde (UK) 1956

BLIND EQUALIZATION AND IDENTIFICATION

Chair: J.P. Cardoso, Télécom Paris, CNRS (FRANCE)

A Unified Class of Inverse Filter Criteria Using Two Cumulants for Blind Deconvolution and Equalization
Chong-Yung Chi, Mei-Chyn Wu, National Tsing Hua University (REPUBLIC OF CHINA) 1960

Further Results on Blind Identification and Equalization of Multiple FIR Channels
Dirk T. M. Slock, Constantinos B. Padias, Institute EURECOM (FRANCE) 1964

Prediction Error Methods for Time-Domain Blind Identification of Multichannel FIR Filters
K. Abed Meraim, P. Duhamel, Télécom Paris; D. Gesbert, France Télécom; P. Loubaton, Télécom Paris; S. Mayrargue, France Télécom; E. Moulines, Télécom Paris; D. Slock, Institute EURECOM (FRANCE) 1968

Blind Fractionally-Spaced Equalization of Noisy FIR Channels: Adaptive and Optimal Solutions
Georgios B. Giannakis, Steven D. Halford, University of Virginia (USA) 1972
On Fractionally-Spaced Blind Adaptive Equalization Under Symbol Timing Offsets Using Godard and Related Equalizers
Jitendra K. Tugnait, Auburn University (USA) 1976

Blind Identification Using the Kurtosis: Results of Field Data Processing
Mouad Boumahdi, Jean-Louis Lacoume, CEPHAG (FRANCE) 1980

Blind Deconvolution of System with Unknown Response Excited by Cyclostationary Impulses
K.M. Cheung, S.F. Yau, Hong Kong University of Science & Technology (HONG KONG) 1984

Fractionally Spaced Blind Equalization: Loss of Channel Disparity
I. Fijalkow, ENSEA (FRANCE); J.R. Treichler, Applied Science Technology, Inc.; C.R. Johnson, Jr., Cornell University (USA) 1988

On Blind Channel Identification for Impulsive Signal Environments
Xinyu Ma, Chrysostomos L. Nikias, University of Southern California (USA) 1992

Knowledge Based Identification of Fractionally Sampled Channels
Zhi Ding, Z. Mao, Auburn University (USA) 1996

DETECTION AND ESTIMATION

Chair: Boaz Porat, University of California (USA)

On the Probability of Detection of a Transient Signal
Chunming Han, Peter Willett, University of Connecticut; Douglas Abraham, Naval Undersea Warfare Center (USA) 2000

On Detection of Cyclostationary Signals
Scott Enserink, Douglas Cochran, Arizona State University (USA) 2004

Cyclic Detection in a Nonwhite Gaussian Noise
P. Rostaing, E. Thierry, T. Pitarque, Université de Nice-Sophia Antipolis; M. Le Dard, DCN St. Tropez (FRANCE) 2008

Testing Gaussianity with the Characteristic Function
M. Jay Arnold, D. Robert Iskander, Abdelhak M. Zoubir, Queensland University of Technology (AUSTRALIA) 2012

Multiple Fuzzy Hypotheses Testing
Bülent Baygün, Schlumberger-Doll Research (USA) 2016

An Alternative to Standard Maximum Likelihood for Gaussian Mixtures
Frédéric Champagnat, Ecole Polytechnique (CANADA), Jérôme Idier, LSS/ESE (FRANCE) 2020

State Decoupling in Estimation Theory
Pan-Tai Liu, Hui Fang, University of Rhode Island; Fu Li, Heng Xiao, Portland State University (USA) 2024

Asymptotic Analysis of an Algorithm for Identification of Quantized AR Time-Series
Vikram Krishnamurthy, University of Melbourne (AUSTRALIA); H. Vincent Poor, Princeton University (USA) 2028

Wide-Sense Linear Mean Square Estimation and Prediction
Bernard Picinbono, Supélec (FRANCE) 2032

An SNR Threshold for 2-D Damped Harmonic Models
Michael P. Clark, Air Force Institute of Technology (USA) 2036

ARRAY AND SUBSPACE ALGORITHMS

Chair: Allan Steinhardt, Massachusetts Institute of Technology, Lincoln Laboratory (USA)

Sparse Network Array Processing Employing Prior Covariance Knowledge
Edward J. Baranoski, MIT Lincoln Laboratory, (USA) 2040

A Data Version of the Gauss-Markov Theorem and Its Application to Adaptive Subspace Splitting
Louis L. Scharf, John K. Thomas, University of Colorado (USA) 2044

Robustness of the Subspace GLRT to Signal Mismatch
Keith A. Burgess, Barry D. Van Veen, University of Wisconsin-Madison (USA) 2048

Velocity and Acceleration Estimation of Doppler Weather Radar/LIDAR Signals in Colored Noise
Weige Chen, Guotong Zhou, Georgios B. Giannakis, University of Virginia (USA) 2052

Performances Analysis of Parameterized Adaptive Eigensubspace Algorithms
Jean-Pierre Delmas, Institut National des Télécommunications (FRANCE) 2056
Multiple Platform Target Motion Analysis: Performance and Limitations
Olivier Tremois, J.P. LeCadre, IRISA/CNRS (FRANCE)

Parallel and Stable Spherical Subspace Tracking
Filiep Vanpoucke, Marc Moonen, Katholieke Universiteit Leuven (BELGIUM)

Recursive Estimate-Maximize (EM) Algorithms for Time Varying Parameters with Applications to Multiple Target Tracking
L. Frenkel, M. Feder, Tel-Aviv University (ISRAEL)

Sensor Array Approach to Nonwave Field Processing
Victor I. Turchin, Russian Academy of Science (RUSSIA); Alex B. Gershman, EPFL (SWITZERLAND)

Optimal Filtering in the Subband Domain
Hong Liu, Hanoch Lev-Ari, Northeastern University (USA)

2D Unitary ESPRIT for Efficient 2D Parameter Estimation
Martin Haardt, Technical University of Munich (GERMANY); Michael D. Zoltowski, Purdue University; Cherian P. Mathews, Rose-Hulman Institute of Technology (USA); Josef A. Nossek, Technical University of Munich (GERMANY)

Extension of the Pisarenko Method to Sparse Linear Arrays
Jean-Jacques Fuchs, IRISA Université de Rennes I (FRANCE)

Localization of Correlated and Uncorrelated Signals in Colored Noise via Generalized Least Squares
Mati Wax, Jacob Sheinvald, RAFAEL 83; Anthony J. Weiss, Tel-Aviv University (ISRAEL)

A Robust and Efficient Algorithm for Source Parameter Estimation
F. Gersemky, B. Yang, Ruhr University-Bochum (GERMANY)

Localization of Multiple Signals Using Subarrays Data
Jacob Sheinvald, Mati Wax, RAFAEL 83 (ISRAEL)

A New Method for Source Separation
Russell H. Lambert, University of Southern California (USA)

HIGH RESOLUTION SOURCE LOCATION

Chair: Louis Scharf, University of Colorado (USA)

Blind Separation of Wide-Band Sources in the Frequency Domain
V. Capdevielle, Ch. Servière, J. L. Lacoume, CEPHAG-ENSIEG (FRANCE)

Proper Prior Marginalization of the Conditional ML Model for Combined Model Selection/Source Localization
Bill M. Radich, Kevin M. Buckley, University of Minnesota (USA)

Optimal IV-SSF Approach to Array Signal Processing in Colored Noise Fields
P. Stoica, M. Viberg, Chalmers University of Technology; M. Wong, Q. Wu, McMaster University (CANADA)

Subspace-Based Direction Finding in Alpha-stable Noise Environments
Panagiotis Tsakalides, Chrysostomos L. Nikias, University of Southern California (USA)
