VOLUME 4

Optimal Models of Prosodic Prominence Using the Bayesian Information Criterion ................................................................. 2048
Tim Mahrt, Jui-Ting Huang, Yoonsook Mo, Margaret Fleck, Mark Hasegawa-Johnson, Jennifer Cole

Quantitative Analysis of Tone Coarticulation in Mandarin .................................................................................................. 2052
Hussein Hussein, Hansjorg Mixdorff Hue San Do, Rudiger Hoffmann

Tracking Pitch Contours Using Minimum Jerk Trajectories ................................................................................................. 2056
Daniel Neiberg, G. Ananthakrishnan, Joakim Gustafson

DISCOURSE AND DIALOGUE
Chair: Patrick Ehlen

On the Use of Linguistic Features in an Automatic System for Speech Analytics of Telephone Conversations ......................................................................................................................... 2060
Benjamin Maza, Marc El-Beze, Georgas Linares, Renato De Mori

Determining what Questions to Ask, with the Help of Spectral Graph Theory ................................................................. 2064
Abe Kasenzadeh, Sungbok Lee, Panayiotis G. Georgiou, Shrikanth Narayanan

Are You Sure You're Paying Attention? - 'Uh-Huh' Communicating Understanding as a Marker of Attentiveness ......................................................................................................................... 2068
Hendrik Buschmeier, Zofia Malisz, Marcin Wlodarczak, Stefan Kopp, Petra Wagner

Projectability of Transition-Relevance Places Using Prosodic Features in Japanese Spontaneous Conversation .......................................................................................................................................................... 2072
Yuichi Ishimoto, Miha Enomoto, Hitoshi Iida

Measuring Final Lengthening for Speaker-Change Prediction ..................................................................................................... 2076
Anna Hjalmarsson, Kornel Laskowski

Incremental Learning and Forgetting in Stochastic Turn-Taking Models ............................................................................ 2080
Kornel Laskowski, Jens Edlund, Mattias Hedner

Reinforcement Learning of Argumentation Dialogue Policies in Negotiation .......................................................................... 2084
Kalliopi Georgila, David Traum
Topic Switching Strategies for Spoken Dialogue Systems
Tobias Heinroth, Savina Koleva, Wolfgang Minker

Unsupervised Clustering of Utterances Using Non-Parametric Bayesian Methods
Ryuchiro Higashinaka, Noriaki Kavovma, Kogatsu Sadamitsu, Yasuhiro Minami, Toyomi Meguro, Kohji Dohsaka, Hirohito Inagaki

SLP FOR SPEECH TRANSLATION, INFORMATION EXTRACTION AND RETRIEVAL
Chair: Dekai Wu

OOV Sensitive Named-Entity Recognition in Speech
Carolina Parada, Mark Dredze, Frederick Jelinek

Speech Translation with Grammar Driven Probabilistic Phrasal Bilexica Extraction
Markus Soers, Dekai Wu, Chi-kuo Lo, Karteek Addanki

An Efficient Unified Extraction Algorithm for Bilingual Data
Christoph Tillmann, Sanjika Hewavitharana

Using Features from Topic Models to Alleviate Over-Generation in Hierarchical Phrase-Based Translation
Songfang Huang, Bowen Zhou

An Empirical Study on Improving Hierarchical Phrase-Based Translation Using Alignment Features
Songfang Huang, Bowen Zhou

Robust Speech Translation by Domain Adaptation
Xiaodong He, Li Deng

Enhancements to the Training Process of Classifier-Based Speech Translator via Topic Modeling
Emil Ettelaie, Panayiotis G. Georgiou, Shrikant Narayanan

A Scalable Approach to Building a Parallel Corpus from the Web
V. K. Rangarajan Sridhar, Luciano Barbosa, Srinivas Bangalore

Spoken Term Detection Results Using Plural Subword Models by Estimating Detection Performance for Each Query
Yoshiaki Ito, Kohei Iwata, Masaaki Ishigame, Kazuyo Tanaka, Shi-wook Lee

SpeechForms: From Web to Speech and Back
Luciano Barbosa, Diamantino Casteiro, Giuseppe Di Fabbrizio, Amanda Stent

Image Processing Filters for Line Detection-Based Spoken Term Detection
Kazuyuki Nomura, Hiroaki Nanjo, Toshikazu Yoshimi

Using Latent Topic Features for Named Entity Extraction in Search Queries
Joe Polifroni, Francois Mairesse

Language Model Expansion Using Webdata for Spoken Document Retrieval
Ryo Masumura, Seongjun Hahm, Akinori Ito

Effects of Query Expansion for Spoken Document Passage Retrieval
Tomoyosi Akiba, Koichiro Honda

Unsupervised Hidden Markov Modeling of Spoken Queries for Spoken Term Detection without Speech Recognition
Chun-an Chan, Lin-shan Lee

Topic Identification from Audio Recordings Using Rich Recognition Results and Neural Network Based Classifiers
Roberto Gemello, Franco Mana, Pier Domenico Batzu

SPEECH SYNTHESIS – SELECTED TOPICS
Chair: Tomoki Toda

A Grammar Based Approach to Style Specific Phrase Prediction
Alok Parlikar, Alan W. Black

Unsupervised Features from Text for Speech Synthesis in a Speech-to-Speech Translation System
Oliver Watts, Bowen Zhou

Unsupervised Continuous-Valued Word Features for Phrase-Break Prediction without a Part-of-Speech Tagger
Oliver Watts, Junichi Yamagishi, Simon King

Albayzin 2010: A Spanish Text to Speech Evaluation
Francisco Campillo, Francisco Mendez, Montserrat Arza, Laura Docho, Antonio Bonefonte, Eva Navas, Inaki Sainz

Combining Active and Semi-Supervised Learning for Homograph Disambiguation in Mandarin Text-to-Speech Synthesis
Binbin Shen, Zhiyong Wu, Yongxin Wang, Lianhong Cai
Automatically Creating a Diphone Set from a Speech Database
Thomas Ewender, Beat Pfister

Automatic Viseme Clustering for Audiovisual Speech Synthesis
Wesley Mattheyses, Lukas Latacz, Werner Verhelst

Perceptual Quality Dimensions of Text-to-Speech Systems
Florian Hinterleitner, Sebastian Moller, Christoph Norrenbrock, Ulrich Heute

A Pointwise Approach to Pronunciation Estimation for a TTS Front-End
Shinsuke Mori, Graham Neubig

Correlating Text with Prosody
Mohamed Abou-Zleikha, Julie Carson-Berndsen

Andrew Rosenberg, Raul Fernandez, Bhuvana Ramabhadrin

Aperiodicity Analysis for Quality Estimation of Text-to-Speech Signals
Christoph Norrenbrock, Ulrich Heute, Florian Hinterleitner, Sebastian Moller

HUMAN SPEECH AND SOUND PERCEPTION
Chair: Denis Burnham

Parallels in Infants’ Attention to Speech Articulation and to Physical Changes in Speech-Unrelated Objects
Eeva Klintfors, Ellen Marklund, Francisco Lacerda

Speech Events are Recoverable from Unlabeled Articulatory Data: Using an Unsupervised Clustering Approach on Data Obtained from Electromagnetic Midsaggital Articulography (EMA)
Daniel Duran, Jagoda Brunt, Grzegorz Dogil, Hinrich Schutze

Children’s Recognition of their own Voice: Influence of Phonological Impairment
Sofia Strombergsson

Evaluation of Bone-Conducted Ultrasonic Hearing-Aid Regarding Transmission of Speaker Discrimination Information
Takayuki Kogoniya, Seiji Nakagawa

Impact of Different Feedback Mechanisms in EMG-Based Speech Recognition
Christian Hertf, Matthias Janke, Michael Wand, Tanja Schultz

Phonotactic Constraints and the Segmentation of Cantonese Speech
Michael C.W. Yip

Reaction Time and Decision Difficulty in the Perception of Intonation
Katrin Schneider, Grzegorz Dogil, Bernd Mobiß

Processing of Stress Related Acoustic Cues as Indexed by ERPs
Ferenc Hoholygo, Valeria Csepe

On the Relationship Between Perceived Accentedness, Acoustic Similarity, and Processing Difficulty in Foreign-Accented Speech
Marijt J. Witteman, Andrea Weber, James M. McQueen

The Perception Boundary Between Single and Geminate Stops in 3- and 4-Mora Japanese Words
Shigeaki Amano, Yukari Hirata

Correlation Analysis of Acoustic Features with Perceptual Voice Quality Similarity for Similar Speaker Selection
Yusuke Ijima, Mitsuaki Isogai, Hideyuki Mizuno

MULTILINGUAL AND MULTIMODAL APPROACHES TO SPOKEN LANGUAGE
Chair: Michael Johnston

Can Audio-Visual Speech Recognition Outperform Acoustically Enhanced Speech Recognition in Automotive Environment?
Rajitha Navarathna, Tristan Kleinschmidt, David Dean, Sridha Sridharan, Patrick Lucey

A Multimodal Approach to Dictation of Handwritten Historical Documents
Vincent Alabau, Veronica Romero, Antonius-L. Lagarda, Carlos-D. Martinez-Hinarejos

Weight Optimization for Bimodal Unit-Selection Talking Head Synthesis
Asterios Toutios, Utpala Musti, Slim Ouni, Vincent Colotte

Modality Selection and Perceived Mental Effort in a Mobile Application
Stefan Scheffer, Benjamin Jockel, Ina Wechsung, Robert Schleicher, Sebastian Moller

A Cross-Lingual Spoken Content Search System
Jitiendra Ajmera, Ashish Verna

NeMo: A Platform for Multilingual News Monitoring
C. Girardi, Roberto Grettler, Daniela Falavigna, Fabio Brugnara, Diego Giuliani, M. Federico
Unsupervised Learning of Acoustic Unit Descriptors for Audio Content Representation and Classification
Sourish Chaudhuri, Mark Harvilla, Bhiksha Raj

Conditioned Hidden Markov Model Fusion for Multimodal Classification
Michael Glodek, Stefan Scherer, Friedhelm Schwenker

Distant Speech Recognition in a Smart Home: Comparison of Several Multisource ASRs in Realistic Conditions
Benjamin Lecouieux, Michel Vacher, Francois Porter

A Robust Approach to Mining Repeated Sequence in Audio Stream
Jiansong Chen, Lei Zhu, Bailian Feng, Peng Ding, Bo Xu

ASR – NEW PARADIGMS AND OTHER TOPICS
Chair: Chin Hui Lee

Accelerated Parallelizable Neural Network Learning Algorithm for Speech Recognition
Dong Yu, Li Deng

Deep Convex Net: A Scalable Architecture for Speech Pattern Classification
Li Deng, Dong Yu

Modeling Bread Context for Tone Recognition with Conditional Random Fields
Siwei Wang, Gina-Anne Levow

Improved Tonal Language Speech Recognition by Integrating Spectro-Temporal Evidence and Pitch Information with Properly Chosen Tonal Acoustic Units
Shang-wen Li, Yow-hang Wang, Liang-che Sun, Lin-shan Lee

Kullback-Leibler Divergence-Based ASR Training Data Selection
Evandro Gouvea, Marelie H. Davel

Articulatory Feature Classification Using Nearest Neighbors
Arild Brandrud Naess, Karen Livescu, Rohit Prabhavalkar

Continuous Episodic Memory Based Speech Recognition Using Articulatory Dynamics
Sebastien Demange, Slim Omni

Grapheme Model Interpolation and Arabic Pronunciation Generation
T. Li, P. C. Woodland, F. Diehl, M. J. F. Gales

Grapheme-to-Phoneme Conversion Using Conditional Random Fields
Irina Illina, Dominique Fohr, Denis Jouvat

Bilingual Acoustic Model Adaptation by Unit Merging on Different Levels and Cross-Level Integration
Ching-Feng Yeh, Chao-Yu Huang, Lin-shan Lee

A Qualitative Evaluation of Phoneme-to-Phoneme Technology
Marijn Schraagen, Gerrit Bloothoff

Cheap Bootstrap of Multi-Lingual Hidden Markov Models
Daniele Falavigna, Roberto Gretter

Adaptive Stream Fusion in Multistream Recognition of Speech
Nima Mesgarani, Samuel Thomas, Hynek Hermansky

Unsupervised Audio Patterns Discovery Using HMM-Based Self-Organized Units
Man-hung Siu, Herbert Gish, Steve Lowe, Arthur Chan

Nearest Neighbors with Learned Distances for Phonetic Frame Classification
John Labiak, Karen Livescu

SPEAKER RECOGNITION – MODELING, AUTOMATIC PROCEDURES, ANALYSIS III
Chair: Daniel Garcia-Romero

i-vector Based Speaker Recognition on Short Utterances
Ahilan Kanagasundaram, Robbie Vogt, David Dean, Sridha Sridharan, Michael Mason

Study of Overlapped Speech Detection for NIST SRE Summed Channel Speaker Recognition
Hanwu Sun, Bin Ma

Super-Dirichlet Mixture Models Using Differential Line Spectral Frequencies for Text-Independent Speaker Identification
Zhanyu Ma, Arne Leijon

Comparison of Voice Activity Detectors for Interview Speech in NIST Speaker Recognition Evaluation
Hon-Bill Yu, Man-Wai Mak
Eigen-Voice Based Anchor Modeling System for Speaker Identification Using MLLR Super-Vector
A.K. Sarkar, S. Umesh

Automatic Detection of Speaker Attributes Based on Utterance Text
Wen Wang, Andreas Kathol, Harry Bratt

Comparison of Speaker Recognition Approaches for Real Applications
Sandro Camani, Pier Domenico Batzu, Daniele Colibrò, Claudio Vair, Pietro Lucente, Vasileios Vasilakakis

Modeling Speaker Personality Using Voice
Tim Polzehl, Sebastian Möller, Florian Metze

Structural Joint Factor Analysis for Speaker Recognition
Marc Ferras, Koichi Shinoda, Sadaoki Furui

Acoustic Forest for SMAP-Based Speaker Verification
Sangeeta Biswas, Marc Ferras, Koichi Shinoda, Sadaoki Furui

Mixture of Auto-Associative Neural Networks for Speaker Verification
G.S.V.S. Sivaram, Samuel Thomas, Hynek Hermansky

SPEECH AUDIO ANALYSIS AND CLASSIFICATION
Chair: Olivier Rosec

Stop Consonant Recognition by Temporal Fine Structure of Burst
Seppo Fagerlund, Unto K. Laine

Phonetic Classification Using Controlled Random Walks
Katrin Kirchhoff, Andrei Alexandrescu

Keyphrase Cloud Generation of Broadcast News
Luis Marujo, Marcia Viveiros, João P. Neto

Optimized Feature Extraction and HMMs in Subword Detectors
Afonso M. Cantisana, Magne H. Johnsen

Real-World Speech/Non-Speech Audio Classification Based on Sparse Representation Features and GPCs
Ziqiang Shi, Jiqing Han, Tieran Zheng

Privacy Preserving Speaker Verification Using Adapted GMMs
Manas A. Patakh, Bhiksha Raj

Clustering Expressive Speech Styles in Audiobooks Using Glottal Source Parameters
Eva Székely, Joao P. Cabral, Peter Cahill, Julie Carson-Beersdensen

On the Use of the Rhythmogram for Automatic Syllabic Prominence Detection
Bogdan Luchas, Antonio Origa, Francesco Cutugno

Speech Modulation Features for Robust Nonnative Speech Accent Detection
Sethserey Sam, Xiong Xiao, Laurent Besacier, Eric Castelli, Haizhou Li, Eng Shong Chong

Frame-Level Vocal Effort Likelihood Space Modeling for Improved Whisper-Island Detection
Chi Zhang, John H.L. Hansen

Speaker Identification for Whispered Speech Using a Training Feature Transformation from Neutral to Whisper
Xing Fan, John H.L. Hansen

An Accurate and Robust Gender Identification Algorithm
Andrea DeMarco, Stephen J. Cox

Deep Belief Networks for Automatic Music Genre Classification
Xiaohong Yang, Qiongcai Chen, Shusen Zhou, Xiaolong Wang

Image Representation of the Subband Power Distribution for Robust Sound Classification
Jonathan Dennis, Huy Dat Tran, Haizhou Li

Acoustic and Visual Cues of Turn-Taking Dynamics in Dyadic Interactions
Bo Xiao, Viktør Rozgic, Athanassios Katsamakis, Brian R. Baucom, Panayiotis G. Georgiou, Shrikanth Narayanan

HUMAN SPEECH AND SOUND PERCEPTION II
Chair: Holger Mitterer

Pointing Gestures do not Influence the Perception of Lexical Stress
Alexandra Jesse, Holger Mitterer

Relationships Between Phonetic Features and Speech Perception - A Statistical Investigation from a Large Anechoic British English Corpus
Ian R. Cushing, Francis F. Li, Ken Worrall, Tim Jackson

The Representation of Speech in a Nonlinear Auditory Model: Time-Domain Analysis of Simulated Auditory-Nerve Firing Patterns
Guy J. Brawn, Tim Jurgens, Ray Meddis, Matthew Robertson, Nicholas R. Clark
An Automatic Voice Pleasantness Classification System Based on Prosodic and Acoustic Patterns of Voice Preference
Luis Coelho, Daniela Braga, Miguel Sales-Dias, Carmen García-Mateo

Contributions of F1 and F2 (F2') to the Perception of Plosive Consonants
Rene Carre, Pierre Divenyi, Willy Serniclaes, Emmanuel Ferragne, Egidio Marsico, Viet-Son Nguyen

Auditory Speech Processing is Affected by Visual Speech in the Periphery
Jeeseun Kim, Chris Davis

Visual Speech Speeds Up Auditory Identification Responses
Tim Paris, Jeeseun Kim, Chris Davis

Agglomerative Hierarchical Clustering of Emotions in Speech Based on Subjective Relative Similarity
Ryichi Takashima, Tohru Nagano, Ryoji Tachibana, Masafumi Nishimura

Optimal Syllabic Rates and Processing Units in Perceiving Mandarin Spoken Sentences
Guangming Mai, Gang Peng

Cross-Lingual Speaker Discrimination Using Natural and Synthetic Speech
Mirjam Wester, Hui Liang

**SPEECH AUDIO ANALYSIS**
Chair: Toshiaki Fukada

Robust Audio Fingerprinting Based on Local Spectral Luminance Maxima Scheme
Yong-zhe Shi, Wei-Qiang Zhang, Jiu Liu

Entropy-Rate Driven Inference of Stochastic Grammars
Unto K. Laine

An Efficient Pre-Processing Scheme to Improve the Sound Source Localization System in Noisy Environment
Sheng-Chieh Lee, K. Bharanitharan, Bo-Wei Chen, Jiing-Fa Wang, Chung-Hsing Wu, Min-Jian Liou

A Study on Auditory Feature Spaces for Speech-Driven Lip Animation
Guylaine Le-Jan, Yannick Benezeth, Guillaume Gravier, Frederic Bimbot

Phase-Only Speech Reconstruction Using Very Short Frames
Erfan Loweimi, Seyed Mohammad Ahadi, Hamid Sheikhzadeh

Frequency-Warped and Stabilized Time-Varying Cepstral Coefficients
Tor Schønhaug, Torbjørn Svendsen

Using Human Perception for Automatic Accent Assessment
Freddy William, Abhijeet Sangwan, John H.L. Hansen

A Study of the Effectiveness of Articulatory Strokes for Phonemic Recognition
Carlos Molina, Sungbok Lee, Shrikanth Narayanan, Nestor Becerra Yoma

Auditory Filterbank Improves Voice Morphing
Erika Okamoto, Toshio Irino, Ryoichi Nishimura, Hideki Kawahara

Monaural Sound Localization
Anna Katharina Fuchs, Christian Feldbauer, Michael Stark

**SPEECH CODING**
Chair: Alan McCrce

Dual-Mode AVQ Coding Based on Spectral Masking and Sparseness Detection for ITU-T G.711.1/G.722 Super-Wideband Extensions
Masahiro Fukui, Shigeaki Sasaki, Yusuke Hiwasaki, Kurihara Sachiko, Yoichi Haneda

Phone Impact Based Speech Transmission Technique for Reliable Speech Recognition in Poor Wireless Network Conditions
Aziz Tamfique, Kumaran Vijayasankar, Wooll Kim, John H.L. Hansen, Marco Tacco, Andrea Fumogalli

Automatic Speech Codec Identification with Applications to Tampering Detection of Speech Recordings
Jingling Zhou, Daniel Garcia-Romero, Carol Y. Espy-Wilson

A Hybrid Quasi-Harmonic/CELP Wideband Speech Coding Scheme for Unit Selection TTS Synthesis
Chang-Heon Lee, Olivier Rosea, Yannis Stylianou

Voice Quality Characterization of IETF Opus Codec
Anssi Ramo, Henri Toukomaa

Leja Ordering LSFs for Accurate Estimation of Predictor Coefficients
C.F. Pedersen

Improved Quality for Conversational VoIP Using Path Diversity
Qipeng Gong, Peter Kabal

Tree Encoding for the ITU-T G.711.1 Speech Coder
Abdul Hannan Khan, Peter Kabal
Parallel and Hierarchical Decision Making for Sparse Coding in Speech Recognition
Dong Wang, Ravichander Vipperla, Nicholas Evans

A New Model-Based Mandarin-Speech Coding System
Chen-Yu Chiang, Jyh-Her Yang, Ming-Chih Liu, Yih-Ru Wang, Yuan-Fu Liao, Sin-Horn Chen

ROBUSTNESS AND ADAPTATION FOR ASR
Chair: Vivek Kumar

Using Unsupervised Feature-Based Speaker Adaptation for Improved Transcription of Spoken Archives
Petr Cerva, Karel Palecek, Jan Slušík, Jan Nová

Online Speaker Adaptation with Pre-Computed FMLLR Transformations
Volker Fischer, Siegfried Kunzmann

Instantaneous Speaker Adaptation Through Selection and Combination of FMLLR Transformations
Diego Giuliani, Fahio Bnignara

Joint Bilinear Transformation Space Based Maximum a posteriori Linear Regression Adaptation
Hwa Jeon Song, Yunkeun Lee, Hyung Soon Kim

A Study on Combining VTLN and SAT to Improve the Performance of Automatic Speech Recognition
D.R. Sanand, Mikko Kurimo

Incorporating Regional Information to Enhance MAP-Based Stochastic Feature Compensation for Robust Speech Recognition
Yu Tsao, Paul R. Dixon, Chiori Hori, Hisashi Kawai

A Study on the Effect of Pitch on LPCC and PLPC Features for Children’s ASR in Comparison to MFCC
Shweta Ghai, Rohit Sinha

About Handling Boundary Uncertainty in a Speaking Rate Dependent Modeling Approach
Denis Jouvet, Dominique Fohr, Irina Illina

An Active Learning Approach to Task Adaptation
Ji Wu, Zhiyang He, Ping Lv

Efficient Speaker and Noise Normalization for Robust Speech Recognition
Vikas Jashi, Raghavendra Bilgi, S. Umesh, C. Benitez, L. Garcia

How Realistic is Artificially Added Noise? ...
Thomas Winkler

VOICE ACTIVITY DETECTION
Chair: Abeer Alwan

Voice Activity Detection in MTF-Based Power Envelope Restoration
Masashi Unoki, Xiaoxiong Lu, Ric Petrick, Shota Morita, Masato Akagi, Rudiger Hoffmann

Using Spectral Fluctuation of Speech in Multi-Feature HMM-Based Voice Activity Detection
Miquel Espl, Shigeki Miyake, Takuya Nishimoto, Nobutaka Ono, Shigeki Sagayama

Linear Dynamic Models for Voice Activity Detection
Kannu Mehta, Chau Khoa Pham, Eng Siong Chng

Detection of Shouted Speech in the Presence of Ambient Noise
Jouni Pohjalainen, Tuomo Raitio, Paavo Alku

Breath-Detection-Based Telephony Speech Phrasing
Takashi Fukuda, Osami Ichikawa, Masafumi Nishimura

Multi-Channel Voice Activity Detection Based on Conic Constraints
Gihak Kim

Multi-Sensor Voice Activity Detection Based on Multiple Observation Hypothesis Testing
Theodoras Petsalodis, Fotinos Talamitsis, Christos Boukis, Zheng-Hua Tan, Ranjee Prasad

Online Speech Activity Detection in Broadcast News
Chao Gao, Guruprasad Saikumar, Saurabh Khanwalkar, Avi Herscovici, Anoop Kumar, Amit Srivastava, Prenkumar Natarajan

A Real-Time Speech Command Detector for a Smart Control Room
Daniel Retel, Felix Putze, Dominic Heger, Joris Jsselmaiden, Rainer Stiefelhofer, Tanja Schults

Robust Voice Activity Detector for Real World Applications Using Harmonicity and Modulation Frequency
Ekapol Chungsriwanch, James Glass
On Noise Robust Voice Activity Detection
Tomas Dekens, Werner Verhelst

Adaptive Regularization Framework for Robust Voice Activity Detection
Xugang Lu, Masashi Unoki, Ryosuke Isotani, Hisashi Kawai, Satoshi Nakamura

HUMAN SPEECH PRODUCTION I
Chair: Francesco Cutugno
On the Use of Extended Context for HMM-Based Spontaneous Conversational Speech Synthesis
Tomoki Koriyama, Takashi Nose, Takao Kobayashi

Predicting Tongue Positions from Acoustics and Facial Features
Asterios Tsiatios, Slim Ouni

Assessing Acoustic Reduction: Exploiting Local Structure in Speech
Louis ten Bosch, Annika Hamalainen, Mirjam Ernestus

The "Fortis-Lenis" Distinction in Bulgarian and German
Bistra Andreeva, Magdalena Wolska

Acoustic Correlates of Glottal Gaps
Gang Chen, Jody Kreiman, Yen-Liang Shue, Abeer Alwan

Using a Genetic Algorithm to Estimate Parameters of a Coarticulation Model
Brian O. Bush, John-Paul Hasom, Alexander Kain, Akiko Amano-Kasumoto

Synthesis of Breathy, Normal, and Pressed Phonation Using a Two-Mass Model with a Triangular Glottis
Peter Birkholz, Bernd J. Kroger, Christiane Neuschafer-Rube

Analysis of Inter-Articulator Correlation in Acoustic-to-Articulatory Inversion Using Generalized Smoothness Criterion
Prasanta Kumar Ghosh, Shrikanth Narayanan

Frequency-Domain Representation of Source-Filter Coupling and its Effect in the Production of Voice
Tokihiko Kaburagi

Method for Speech Inversion with Large Scale Statistical Evaluation
Heikki Rasilo, Unto K. Laine, Okko Rasanen, Toomas Altosaar

Italian in the No-Man's Land Between Stress-Timing and Syllable-Timing? Speakers are More Stress-Timed than Listeners
Bettina Braun, Sabine Geiselmann

The Lombard Effect in Spontaneous Dialog Speech
Laura Folk, Florian Schiel

SPEAKER RECOGNITION – ANALYSIS AND STATISTICS III
Chair: Pierre-Michel Bousquet

Variational Bayesian Model Selection for GMM-Speaker Verification Using Universal Background Model
Timur Pekhovsky, Alexandra Lokhanova
