Proceedings of the Second International Conference on Cooperative Information Systems

May 17-20, 1994
Toronto, Canada

Editors:
Michael Brodie
Mathias Jarke
Michael Papazoglou

Sponsored by the University of Toronto
Supported by IBM Canada
Supported by Information Technology Research Centre
In cooperation with the Association for Computing Machinery
Keynote Address: Repository Technology for System Integration  

*Philip Bernstein, USA*

**Session I: CIS Interoperability and Transactions**

Specifying Flexible Tasks in a Multi-database  
*Marian H. Nodine, Noela Nakos, Stanley B. Zdonik, USA*  

Specification and Verification of Communication Constraints for Interoperable Transactions  
*A. Ngu, R. Meersman, H. Weigand, Australia*  

Managing Global Information in the CORDS Multidatabase System  
*Michael Bauer, Neil Coburn, Per-Ake Larsen, Patrick Martin, Canada*  

**Session II: CIS Queries I**

Query-Free Information Retrieval  
*Peter E. Hart and Jamey Graham, USA*  

Cooperative Query Answering Using Multiple Layered Databases,  
*Jiawei Han, Yongjian Fu, and Raymond Ng, Canada*  

**Session III: CIS Programming**

Towards Persistent Object Systems for Desktop Computing  
*Oliver Gruber and Patrick Valduriez, France*  

An Object-Oriented Programming Environment for Multimedia Cooperative Information Systems  
*Silvano Pozzi and Luca Giachino, Italy*  

**Panel Discussion: Technologies and Standards For CIS and Interoperability**  
*Chaired by: Frank Manola and Umeshwar Dayal, USA*
Keynote Address: Impact of Model Evolution on Data Modelling  
  Charles W. Bachman, USA

Session IV: CIS Design

Ontologies for Enterprise Integration  
  Mark S. Fox and Michael Gruninger, Canada  
  ................................................................. 82

Design Considerations for an Accident Management System  
  Bernd Bruegge, Kevin O'Toole, David Rothenberger, USA  
  ................................................................. 90

Animating Formal Requirements Specifications of Cooperative Information Systems  
  Eric Dubois, Phillippe Du Bois, Frederic DuBru, Belgium  
  ................................................................. 101

Session V: CIS Agents

An Architecture for Dynamically Interacting Agents  
  Joerg P. Mueller and Markus Pische, Germany  
  ................................................................. 114

Cooperating Agents for Information Retrieval  
  Craig A. Knoblock, Yigal Arens and Chun-Nan Hsu, USA  
  ................................................................. 122

Towards CIS in Quality Management - Integration of Agents and Methods,  
  Robert Grob, Stephan Jacobs, Stefanie Kethers, Germany  
  ................................................................. 134

Session VI: CIS Applications

The Information Marketplace: The Challenge of Information Commerce  
  Steve Laufmann, USA  
  ................................................................. 147

Cooperative Information Systems in Integrated Manufacturing Environments  
  G.T. Nguyen and F. Vernadat, France  
  ................................................................. 158

Multidatabase Interoperability in Health Care Legacy Applications  
  John Murphy and Jane Grimson, Ireland  
  ................................................................. 166

Panel Discussion: CIS Applications,  
  Chaired by Patrick Finnigan, Canada and Robert Rockwell, Germany
Keynote Address: Re-engineering Businesses: New Approaches to Information Systems Development and Migration
Daniel Ries, USA

Session VII: CIS Semantics and Consistency
Semantic Interoperability - Context, Issues and Research Directions
Hasan Jamil and Paul Johannessson, Sweden ........................................... 180
Using Truth Maintenance Systems to Solve the Data Consistency Problem
Khalil el Hindi and Brian Lings, United Kingdom ....................................... 192

Session VIII: CIS Queries II
Query Translation Supporting the Migration of Legacy Databases into Cooperative Information Systems
Daniel A. Keim, Hans-Peter Kriegel, Andreas Miethsam, Germany ......................... 203
Query Transformation Techniques for Interoperable Query Processing in Cooperative Information Systems
Louqa Raschid, Yahui Chang and Bonnie J. Dorr, USA .................................... 215

Session IX: CIS Cooperation and Collaboration
Cooperative Modeling in Applied Geographic Research
G. Alonso and A. El Abbadi, USA ............................................................... 227
The Role of Commitment in Cooperative Negotiation
Sandip Sen and Edmund H. Durfee, USA .................................................. 235
Control of Collaboration within Intelligent and Cooperative Information Systems
Rainer Unland, Germany ................................................................. 243
Cooperation in Distributed Medical Care
Jun Huang, Nick R. Jennings and John Fox, United Kingdom .......................... 255

Panel Discussion: Cooperative Information Systems
Chaired by Michael L. Brodie, USA

Author Index ...................................................................................... 265
