Kiokos George graduated in 2000 from Technological Educational Institute of Piraeus with a diploma of Electrical Engineering. In 2004 graduated from National Technical University of Athens with a diploma of Electrical and Computer Engineering. He obtained his PhD (Dec. 2009) in the Microwaves and Fiber Optics Laboratory of the National Technical

University of Athens. The objective of his thesis was the analysis and the implementation in Field Programmable Gate Array (FPGA) of the PHY for the Automotive WLAN standard. His research interests focuses within the areas of vehicular communications, wireless communications, and FPGAs. He has participated in many FP6 and FP7 EU co-funded research projects as a member of I-sense group at the Institute of Communication and Computer systems. In January 2012 he became an adjunct Lecturer at the Department of Electronics, Electric power, Telecommunications, Hellenic Air-Force Academy.

Dr. George Economakos received his Diploma in Electrical and Computer Engineering from the National Technical University of Athens, Greece, in 1992. He received the Ph.D. Degree in Electrical and Computer Engineering, from the National Technical University of Athens in 1999. He is currently working an Assistant Professor of Electrical and Computer Engineering, National Technical University of Athens, Greece. His research interests include design automation, high-level synthesis, electronic system level design, reconfigurable computing and design for low power. He has published more than 110 papers in international journals and conferences and served as a reviewer in most of them, being a member of the program committee 4 times. He was investigator in numerous research projects funded from the Greek Government and Industry as well as the European Commission. He is a member of the ACM, IEEE and EUROMICRO and has served as a member in more than 10 standardization groups in the field of design automation.

Dr. Angelos J. Amditis was born in Sydney of Australia (1968). He has obtained the Diploma in Electrical and Computer Engineering from the National Technical University of Athens - NTUA (Greece) in 1992, and his Ph.D. in Electrical and Computer Engineering (Telecommunications) from NTUA (Greece) in 1997. He has been teaching in various courses (communication and computer networks, communication theory etc.) of the Electrical and Computer Engineering Dep. of NTUA, of ICCS and of the Hellenic Naval Academy. He is a Research Director of the Institute of Communication and Computer Systems and member of its Board of Directors; and the writer of several peer reviewed journal articles, book chapters and conference papers. His current research interests are in the fields of Intelligent Transportation Systems (ADAS, Human Machine Interfaces, Information Fusion...), Virtual Reality, Sensors for monitoring purposes, Telematics, Driver monitoring, Telecommunications systems, EMC/EMI, Electromagnetic sensors etc. He has participated in a large number of Research projects being the scientific responsible of more than forty projects in the last 10 years (e.g. interactIVe, HAVE-IT, euroFOT, TELEFOT, MiniFaros, PowerUp, PreVent, AIDE, INTUITION, SAFESPOT, SENSATION etc.).

Nikolaos K. Uzunoglu was born in Constantinople, Turkey, in 1951. He received the B.Sc. degree in electrical engineering from the Istanbul Technical University, Istanbul, Turkey, in 1973, and the M.Sc. and Ph.D. degrees from the University of Essex, Essex, U.K., in 1974 and 1976, respectively. From 1977 to 1984, he was with the Hellenic Navy Research and Development Office. In 1984, he became an Associate Professor and, in 1988, a Professor of electrical engineering at the National Technical University of Athens (NTUA), Athens, Greece. From 1991 to 1999, he was the Director of the Institute of Communication and Computer Science (ICCS), NTUA. His research interests include electromagnetic theory, microwaves, fiber optics, biological process simulations, and biomedical engineering. Prof. Uzunoglu is a member of the Academy of Sciences of Armenia. He was the recipient of the 1981 International G. Marconi Award in Telecommunication.
