CONTENTS

7 NONLINEAR SYSTEMS
7.1 Introduction 289
7.2 Stability Analysis: Autonomous Systems 290
7.3 Case Study: Stability of a Synchronous Machine 301
7.4 Case Study: Robustness of an Adaptive System 308
7.5 Stability Analysis: Nonautonomous Systems 312
7.6 Composite Feedback Control 315
7.7 Near-Optimal Feedback Design 321
7.8 Exercises 333
7.9 Notes and References 337

References 339

References added in proof 356

Appendix A Approximation of singularly perturbed systems driven by white noise 357

Appendix B 365

Index 367
