### Approximation Algorithms for Scheduling Problems with Exact Delays  
Page 1

### Bidding to the Top: VCG and Equilibria of Position-Based Auctions  
Page 15

### Coping with Interference: From Maximum Coverage to Planning Cellular Networks  
Page 29

### Online Dynamic Programming Speedups  
Page 43

### Covering Many or Few Points with Unit Disks  
Page 55

### On the Minimum Corridor Connection Problem and Other Generalized Geometric Problems  
Page 69

### Online k-Server Routing Problems  
Page 83

### Theoretical Evidence for the Superiority of LRU-2 over LRU for the Paging Problem  
Page 95

### Improved Approximation Bounds for Edge Dominating Set in Dense Graphs  
Page 108

### A Randomized Algorithm for Online Unit Clustering  
Page 121

### On Hierarchical Diameter-Clustering, and the Supplier Problem  
Page 132

### Bin Packing with Rejection Revisited  
Page 146

### On Bin Packing with Conflicts  
Page 160

### Approximate Distance Queries in Disk Graphs  
Page 174

### Network Design with Edge-Connectivity and Degree Constraints  
Page 188

### Approximating Maximum Cut with Limited Unbalance  
Page 202

### Worst Case Analysis of Max-Regret, Greedy and Other Heuristics for Multidimensional Assignment and Traveling Salesman Problems  
Page 214

### Improved Online Hypercube Packing  
Page 226

### Competitive Online Multicommodity Routing  
Page 240

### The k-Allocation Problem and Its Variants  
Page 253

### An Experimental Study of the Misdirection Algorithm for Combinatorial Auctions  
Page 265

### Reversal Distance for Strings with Duplicates: Linear Time Approximation Using Hitting Set  
Page 279

### Approximating the Unweighted k-Set Cover Problem: Greedy Meets Local Search  
Page 290

### Approximation Algorithms for Multi-Criteria Traveling Salesman Problems  
Page 302

### The Survival of the Weakest in Networks  
Page 316

### Online Distributed Object Migration  
Page 330
