Metaphors be with you! : (metaphor system) p. 3
Agile metrics at the Israeli air force p. 12
Are we ready to be unleashed? : a comparative analysis between agile software development and war fighting p. 20
Agile security testing of Web-based systems via HTTPUnit p. 29
Social behaviors on XP and non-XP teams : a comparative study p. 39
Organisational culture and XP : three case studies p. 49
Clashes between culture and software development methods : the case of the Israeli hi-tech industry and extreme programming p. 59
A case study on the impact of scram on overtime and customer satisfaction p. 70
An environment for collaborative iteration planning p. 80
Future of scram : parallel pipelining of sprints in complex projects p. 90
Agile development of the database : a focal entity prototyping approach p. 103
Teaching a goliath to fly p. 111
Promiscuous pairing and beginner's mind : embrace inexperience p. 125
Estimating in actual time p. 132
Improving agile team learning by improving team reflections p. 139
Introducing agile development (XP) into a corporate Webmaster environment p. 145
Staying agile in government software projects p. 153
Selling agile : target-cost contracts p. 160
Early community building : a critical success factor for XP projects p. 167
Using open spaces to resolve cross team issue p. 173
A false measure of success : "I'd rather have an ounce of cure over this 200 pounds of prevention" p. 180
Formalizing agility : an agile organization's journey toward CMMI accreditation p. 185
Stretching agile to fit CMMI level 3 : the story of creating MSF for CMMI process improvement at Microsoft Corporation p. 193
Costs of compliance : agile in an inelastic organization p. 202
Agile phase I - the pragmatic case study of Schneider National p. 212
Agile offshore techniques - a case study p. 214
Follow the sun : distributed extreme programming development p. 218
Case study of customer input for a successful product p. 225
Experiences integrating sophisticated user experience design practices into agile processes p. 235
Improving communication between customers and developers p. 243
Creating a living specification using FIT documents p. 253
Test-driven porting p. 259
Ongoing quality improvement, or : how we all learned to trust XP p. 267
There has to be a better way! p. 272
Waltzing with changes p. 279
Introducing agile into a software development capstone project p. 289
Experiences teaching a course in programmer testing p. 298
Balancing hands-on and research activities: a graduate level agile software development course p. 306

Student experiences with executable acceptance testing p. 312

Teaching agile project management to the PMI p. 318

Undergraduate student perceptions of pair programming and agile software methodologies: verifying a model of social interaction p. 323
