A Beowulf class parallel remote-sensed image database retrieval system developed in ASSIST environment p. 1
Fast and constant time random access decoding with log2n block seek time p. 10
Protecting multimedia data in storage: a survey of techniques emphasizing encryption p. 18
Tamper-resistant storage techniques for multimedia systems p. 30
The techniques and challenges of immutable storage with applications in multimedia p. 41
Human identification using correlation metrics of iris images p. 53
Content-based image retrieval using a mobile device as a novel interface p. 64
Instantaneous reliability assessment of motion features in surveillance videos p. 76
3D shape descriptors and distance metrics for content-based artifact retrieval p. 87
Applying vertebral boundary semantics to CBIR of digitized spine x-ray images p. 98
Asynchronous multimedia annotations for Web-based collaboration in biology education p. 108
Shape-based posture and gesture recognition in videos p. 114
Imperfect learning for autonomous concept modeling p. 125
Collaborative visual tracking of multiple identical targets p. 137
A hierarchical framework for understanding human-human interactions in video surveillance p. 150
Multi-modal analysis for person type classification in news video p. 165
Real-time multiple-object tracking and anomaly detection p. 173
Efficiently querying spatial histograms p. 183
Image retrieval using combination of color and multiresolution texture features p. 195
An image-clustering method based on cross-correlation of color histograms p. 204
Automated situation clustering of home photos for digital albuming p. 212
A relevance feedback image retrieval scheme using multi-instance and pseudo-image concepts p. 224
A lightweight image retrieval system for paintings p. 236
New method for similarity retrieval of iconic image database p. 247
Music genre classification via likelihood fusion from multiple feature models p. 258
Modeling sports highlights using a time-series clustering framework and model interpretation p. 269
Towards automatic music transcription: note extraction based on independent subspace analysis p. 277
MPEG-7-based description infrastructure for an audiovisual content analysis and retrieval system p. 284
Home-video content analysis for MTV-style video generation p. 296
Multimodal approach for speaker identification in news programs p. 308
Detection of goal events in soccer videos p. 317
Panoramic video in video-mediated education p. 326
Wipe shot boundary determination p. 337
An efficient approach for video information retrieval p. 347
