Proceedings of the IEEE-EURASIP Workshop on Nonlinear Signal and Image Processing (NSIP'99)

June 20-23, 1999
Antalya, Turkey

Volume II

Editors:
A. Enis Çetin, Lale Akarun,
Ayşin Ertüzün, M. Nafi Gürcan, Yasemin Yardımcı

Sponsored by
EURASIP (European Association for Signal Processing)
IEEE Circuits and Systems Society
IEEE Signal Processing Society

SESSION TUPM-1 INVERSE PROBLEMS

SESSION TUPM-2 SPEECH AND AUDIO PROCESSING II

SESSION TUPM-3 SPECIAL SESSION: FRACTIONAL FOURIER TRANSFORM
Applications of the fractional Fourier transform to filtering, estimation and restoration
M. Fatih Erden(1), M. Alper Kutay(2), and Haldun M. Özaktas(3)
(1) Massana Ltd., Ireland
(2) Drexel University, USA
(3) Bilkent University, Turkey
(invited paper)

SESSION TUPM-4 NONLINEAR FILTERS III

Design of delta-filters using linear prototypes
Michael A. Shcherbakov
State University of Penza, Russia

Correlation properties of cascaded recursive median filters
O. Yli-Harja(1), J. A. Bangham(2), R. Harvey(2), and R. Aldridge(2)
(1) Tampere University of Technology, Finland
(2) University of East Anglia, England

Optimization of stack filters using sample selection probabilities
Ilya Shmulevich, Vladimir Melnik, and Karen Egiazarian
Tampere University of Technology, Finland

Design constraints for polynomial and rational filters
Sabine Kroner(1) and Giovanni Ramponi(2)
(1) University of Bremen, Germany
(2) University of Trieste, Italy

Ordering methods for multivariate RCRS filters
Heikki Huttunen, Marius Tico, Corneliu Rusu, and Pauli Kuosmanen
Tampere University of Technology, Finland

A new fast method for training stack filters
Ioan Tabus and Bogdan Dumitrescu
Tampere University of Technology, Finland

A new class of multichannel image processing filters
Lazhar Khriji(1) and Moncef Gabbouj(2)
(1) ENIM, Tunisia
(2) Tampere University of Technology, Finland

Very efficient implementation of max/min filters
Dinu Coltuc and Philippe Bolon
University of Savoie, France

Fuzzy stack filtering under structural constraints
Akira Taguchi and Susumu Takaku
Musashi Institute of Technology, Japan

SESSION TUPM-5 NEURAL NETWORKS I

Speaker localization for far-field and near-field wideband sources using neural networks
Güneş Arslan(1), F. Ayhan Sakarya(2,3), and Brian L. Evans(1)
(1) The University of Texas at Austin, USA
(2) Yıldız Technical University, Turkey
(3) Lucent Technologies, USA

An adaptive newton-like training algorithm for nonlinear filters which have embedded memory
M. Rabinowitz, G. M. Gutt, and G. F. Franklin
Stanford University, USA

Self-organizing map neural network for transient signal classification in mechanical diagnostics
Haoying Sun, Mostafa Kaveh, and Ahmed Tewfik
University of Minnesota, USA

A new construction algorithm of efficient radial basis function neural net classifier and its application to codes identification
F. Belloir, A. Fache, and A. Billat
Universite de Reims Champagne-Ardenne, France

Neural network models in the inversion of multidimensional ionograms
Fabien Jacquet, Julien Caratori, and Bernadette Dorizzi
Institut National des Telecommunications, France

Application of fuzzy networks to air-target recognition
Du Gan and Z. Shouhong
Xidian University, China

SESSION TUPM-6 SPECIAL SESSION: SIGNAL PROCESSING EDUCATION

DSP fun the GUI way
A. Yardim, M.A. Mughal, G.D. Cain and D. Barjamovic
University of Westminster, UK
(invited paper)

Sweetening signals and systems with Simulink
G.D. Cain, M.A. Mughal, A. Yardim, and D. Barjamovic
University of Westminstern, UK
(invited paper)

A MATLAB-based digital signal processing laboratory course
Sanjit K. Mitra
University of California, USA
(invited paper)

Raising the level of abstraction: A signal processing system design course
Brian L. Evans and Güner Arslan
The University of Texas at Austin, USA
(invited paper)

Experiences in a Real-Time DSP Design Course
M. Zeytinoğlu and N.W. Ma
Ryerson Polytechnic University, Canada
(invited paper)
SESSION TUPM-7 SPECIAL SESSION: FRACTIONAL FOURIER TRANSFORM

579 Applications of the fractional Fourier transform to correlation, feature extraction, and pattern recognition
Zeev Zalevsky
Israel Ministry of Defense, Israel
(invited paper)

585 Properties of eigenfunctions of canonical integral transform
Tatiana Alieva and M. J. Bastiaans
Technische Universiteit Eindhoven, Netherlands

SESSION TUPM-8 NONLINEAR ESTIMATION I

588 Microcalcification segmentation and mammogram image enhancement using nonlinear filtering
Metin Nafi Gürçan, Yasemin Yardımcı, and A. Enis Çetin
Bilkent University, Turkey

593 2-D robust recursive least squares lattice algorithm for defect inspection of textile products
Ruşen Meylanı, Ayşın Erüzün, and Aytül Erçıl
Boğaziçi University, Turkey

598 Combining linear and non-linear processing in the time and in the spectral domain for non-stationary noise filtering
R. Martinez, A. Alvarez, V. Nieto, V. Rodellar, and P. Gomez
Universidad Politecnica de Madrid, Spain

603 Nonlinear statistical signal processing: Useful theorems and their application
A. van den Bos
Delft University of Technology, Netherlands

607 Robust spectral estimation based on ARMA model excited by a t-distribution process
Junibakti Sanubari
Satya Wacana University, Indonesia

612 A non-linear algorithm for digital beamforming of a wideband linear active sonar array
Saman S. Abeysekera
Nanyang Technological University, Singapore

SESSION WEAM-1 IMAGE SEGMENTATION

617 Scale-space median and Gabor filtering and fuzzy unification for boundary detection electron microscopy images
Serhat Özdemir and David Casasent
Carnegie Mellon University, USA

622 Unsupervised multispectral segmentation of SPOT images applied to nautical cartography
J.N. Provost(1), C. Collet(1), P. Perez(2), and P. Bouthemy(2)
(1) French Naval Academy, France
(2) IRISA/INRIA, France

627 Automatic segmentation of multiple sclerosis lesions from MRI slices
A. Taleb-Ahmed(1), V. Lethuc(2), T. Saint Michel(3), M. Ayachi(3), and J.P. Pruvo(3)
(1) Littoral Cote d’Opale, France
(2) Groupe GRIF, France
(3) Centre Hospitalier Regional Universitaire de LILLE, France

SESSION WEAM-2 NONLINEAR ESTIMATION II

632 On the performance of a novel nonlinear least squares frequency estimator
Erdoğan Dilaveroğlu
Uludağ University, Turkey

636 A combined stochastic/decision-aided SNR estimator
Witthaya Panyaworayan and Rolf Matzner
Federal Armed Forces University Munich, Germany

641 Robust detection of monotonic trend of a data sequence in the presence of impulsive noise
Nail Çadalli(1) and Sandip Bose(2)
(1) University of Illinois at Urbana-Champaign, USA
(2) Schlumberger-Doll Research Center, USA

SESSION WEAM-3 SYSTEMS AND SIGNAL MODELING

646 Optimum distributed system with partial correlated observations
Mostefa Bellounar and Mourad Barkat
Universite de Constantine, Algeria

651 Estimating Relative changes in complexity measures
Maria Torres and Lucas Gamero
Universidad Nacional de Entre Rios, Argentina

656 Nonlinear system identification using higher order statistics
Mehmet Ertuğrul Celebi
Istanbul Technical University, Turkey

659 Quantum-Dot cells and their suitability for nonlinear signal processing
Mika Helsingius, Pauli Kuosmanen, and Jaakko Astola
Tampere University of Technology, Finland

664 Higher order statistics and spectra analysis of sleep spindles
Tayfun Akgül(1), Mingui Sun(2), Robert J. Sclabassi(2), and A. Enis Çetin(3)
(1) Drexel University, USA
(2) University of Pittsburg, USA
(3) Bilkent University, Turkey

SESSION WEAM-4 VOLterra FILTERS

670 A non persistent excitation input sequence for Volterra and NARMAX filter representation
J.-P. Costa, E. Thierry, and T. Pitarque
I3S Laboratory, France
An approximation to the Volterra series with multiple linear ARMA filters
Veit S. Kafka and Ulrich Appel
Universitat der Bundeswehr, Germany

Adaptive Volterra filters for nonlinear acoustic echo cancellation
A. Stenger and R. Rabenstein
University of Erlangen-Nürnberg, Germany

Adaptive recursive higher order polynomial filter
Farhat Fnaiech(1), Mounir Sayadi(1), and Mohamed Najim(2)
(1) Universite de Tunis, Tunisia
(2) ENSERB, France

SESSION WEAM-5 SPECIAL SESSION: BLIND AND NON-BLIND EQUALIZATION

Decision feedback equalization from an H-infinity perspective
Alper T. Erdogan, Babak Hassibi, and Thomas Kailath
Stanford University, USA
(invited paper)

Block redundant constant modulus algorithm for channel-irrespective blind identifiability
A. Scaglione, Y. Lin, and G. B. Giannakis
University of Minnesota, USA
(invited paper)

A unified approach to the steady-state and tracking analyses of adaptive filtering algorithms
N. R. Yousef and A. H. Sayed
University of California, USA
(invited paper)

Undermodeled equalization in noisy multi-user channels
Phillip Regalia(1) and Mamadou Mboup(2)
(1) Institut National des Telecommunications, France
(2) Universite Rene Descartes, France
(invited paper)

SESSION WEAM-6 NEURAL NETWORKS II

A hybrid learning vector quantization/Time-delay neural networks system for the recognition of Arabic speech
S.A. Selouani(1) and J. Caelen(2)
(1) USTHB, Algeria
(2) CLIPS/IMAG, France

A wavelet transform-artificial neural network (WT-ANN) based rotating machinery fault diagnostics methodology
Şeref N. Engin and Kayhan Güleüz
Yıldız Technical University, Turkey

Further study of adaptive supervised learning decision (ASLD) network in stock market
Kei Keung Hung and Lei Xu
The Chinese University of Hong-Kong, China
A comparison between Kriging and radial basis function networks for nonlinear prediction
J.-P. Costa, L. Pronzato, and E. Thierry
I3S Laboratory CNRS-UNSA, France

Fabric handle prediction using neural networks
M. Youssefi(1) and K. Faez(2)
(1) Isfahan University of Technology, Iran
(2) Amirkabir University of Technology, Iran

A new fast neural network training algorithm based on a modified standard back-propagation (MBP) criterion minimization
S. Abid(1), F. Fnaiech(1), and M. Najim(2)
(1) ESSTT, Tunisia
(2) Domaine Universitaire, France

Nonlinear image processing through sequences of fast cellular neural networks (FCNN)
M. Coli(1), P. Palazzari(2), and R. Rughi(1)
(1) University “La Sapienza”, Italy
(2) ENEA-HPCN Project, Italy

Region number determination in automatic image segmentation based on BKYY model selection criterion
Ping Guo, Chi Chiu Cheung, and Lei Xu
The Chinese University of Hong-Kong, China

Fingerprint analysis via oriented band pass filters
Sibel Tari(1) and Ping Liang(2)
(1) Middle East Technical University, Turkey
(2) University of California, USA

An object-based approach to similar image retrieval
Andrea Kutics(1,2), Masaomi Nakajima(2), and Toshiharu Ieki(2)
(1) Japan Systems Inc., Japan
(2) NTT Data Corporation, Japan

A new HMM topology for shape recognition
N. Arica and F.T. Yarman-Vural
Middle East Technical University, Turkey

Progressive and lossless image coding using optimized nonlinear subband decompositions
A. Benazza-Benyahia(1) and J.-C. Pesquet(2)
(1) Ecole Superieure des Communications, Tunisia
(2) LSS-CNRS, France

Subband decomposition based image compression algorithms with nonlinear adaptive filter banks
Ruşen Öktem(1), Karen Egiazarian(1), and Enis Çetin(2)
(1) Tampere University of Technology, Finland
(2) Bilkent University, Turkey
Nonlinear pyramidal image decompositions based on local contrast parameters
Pierre Vandergheynst and Ömer Nezih Gerek
Swiss Federal Institute of Technology, Switzerland

Detection of embolic signals using wavelet transform
N. Aydin and H. S. Markus
Guy's, King's and St Thomas' School of Medicine and Institute of Psychiatry, UK

On the design of perfect reconstruction multiwavelet filter banks
Say Song Goh and Tao Xia
National University of Singapore, Singapore

SESSION WEPM-3 APPLICATIONS II

Wavelets based analysis of non-uniformly sampled data for power load forecasting
E. G. Terrence Swee and S. Elangovan
National University of Singapore, Singapore

FIR filter design using highly non-linear LADF sigma-delta modulator architecture
Kabi Prakash Padhi, Tan Chin Tiong, and Saman S. Abeysekera
Nanyang Technological University, Singapore

The MSE reconstruction criterion for independent component ordering in ICA time-series analysis
Y. Cheung and L. Xu
The Chinese University of Hong-Kong, PRC

Filter banks with in band controlled aliasing applied to decomposition/reconstruction of ECG signals
F. Cruz-Roldan, F. Lopez-Ferreras, S. Maldonado-Bascon, and R. Jimenez-Martinez
Escuela Politecnica (U.A.), Spain

A wireless data processing system constructed of SAW-devices and its applications to medical cares
Kenji Matsumura(1,2), Gen Fujita(1), T. Masaki(1), Isao Shirakawa(1), and Hiroshi Inada(3)
(1) Osaka University, Japan
(2)KCS Co. Ltd., Japan
(3) National Cardiovascular Center Research Institute, Japan

SESSION WEPM-4 IMAGE RESTORATION

Data-dependent median filtering with multi-windows for restoration of images corrupted by high probability impulsive noise
Hiroaki Ishii, Akira Taguchi, Mituhiro Okano, and Mototaka Sone
Musashi Institute of Technology, Japan

Restoration of archive film material using multi-dimensional soft morphological filters
Neal R. Harvey(1) and Stephen Marshall(2)
(1) Los Alamos National Laboratory, USA
(2) University Of Strathclyde, UK
816 **Image enhancement filters based on threshold patterns**
Pak-Cheung Lai and Bing Zeng
The Hong-kong University of Science & Technology, China

821 **Data-dependent weighted average filtering for image sequence enhancement**
Mitsuhiko Meguro(1), Akira Taguchi(2), and Nozomu Hamada(1)
(1) Keio University, Japan
(2) Musashi Institute of Technology, Japan

826 **Removal of blotches and line scratches from film and video sequences using a digital restoration chain**
Alexandre Ulisses Silva(1) and Luis Corte-Real(2)
(1) INESC-PORTO, Portugal
(2) Universidade do Porto, Portugal

SESSION WEPM-5 RADAR / SONAR

830 **Bayesian detection of radio transmitter turn-on transients**
Oktay Ureten(1) and Nur Serinken(2)
(1) Ankara University, Turkey
(2) Communications Research Center, Canada

835 **Automatic estimation of the noise variance in SAR images for use in speckle filtering**
G. Ramponi(1), R. D'Alvise(1), and C. Moloney(2)
(1) University of Trieste, Italy
(2) Memorial University of Newfoundland, Canada

839 **Nonlinear processing of high resolution radar sea clutter**
Mark R. Cowper and Bernard Mulgrew
University of Edinburgh, UK

844 **Analysis of morphological surface profile extraction with multiple sonar range measurements**
Billur Barshan(1) and Deniz Baskent(2)
(1) Bilkent University, Turkey
(2) University of Southern California, USA

849 **Nonlinear signal processing and nonuniform linear antenna array design for DOA estimation of coherent sources**
Nichols K. Spencer
CSSIP, Australia

854 **Clutter MAP CFAR analysis in Weibull clutter**
M. Hamadouche, M. Barkat, and M. Khodja
Universite de Constantine, Algeria

SESSION WEPM-6 TEXTURE ANALYSIS

858 **Higher order statistics based texture analysis method for defect inspection of textile products**
Birkan Aras, Ayşın Ertüzün, and Aytül Erçil
Boğaziçi University, Turkey

863 **Nonstationary texture modeling by G-invariant random fields**
Alain Hillion, Christian Roux, and Ioana Donescu
ENST Bretagne, France
Nonlinear methods for the identification of 2D models with long-range dependence
Beatrice Pesquet-Popescu and Jean-Christophe Pesquet
(1) Laboratoire d'Electronique de Philips, France
(2) LSS-CNRS, France

Color texture morphology
Sibel Tari
Middle East Technical University, Turkey

Automatic generation of morphological opening-closing sequences for texture segmentation
J. Racky and M. Pandit
University of Kaiserslautern, Germany

Nonlinear operator for blob texture segmentation
P. Kruizinga and N. Petkov
University of Groningen, Netherlands

LATE PAPERS

Nonlinear modeling and its prediction range
Ahmet Ademoglu(1), Michael E. Brandt(2) and Tamer Demiralp(3)
(1) Boğaziçi University, Turkey
(2) University of Texas, USA
(3) Istanbul University, Turkey

Mapping image restoration to a graph problem
Hiroshi Ishikawa and Davi Geiger
New York University, USA
(invited paper)
