Contents

SECTION 1: XML

Using XML Technology and Ontologies for Knowledge Management .................. 1
  Anne-Claire Boury-Brisset

MoDal: An XML Based Dynamic User Interface Description System for Mobile PDAs .................................................. 9
  Keung Hae Lee and Tobin Lehman

Instrumental Composition of Dynamic XML Business Documents ................... 15
  Shiwa S. Fu, Shyhkwei Chen, and Jen-Yao Chung

Development of a Rhythm Editing and Playing System Based on XML .............. 21
  Won-Sung Sohn, Yoon-Chul Choy, and Yong Kyu Lee

SECTION 2: Web Tools, Software, Authoring Utilities

Improving the Engineering of Web Search Engines ........................................ 29
  Haider AH Ramadhan and Khalil Shihab

Creating Web Based Applications with Servlets: An Internet/Intranet Platform for Automated Testing of Human Knowledge ....................... 35
  Cristian Marinescu and Marian Dobre

A Persistent History Navigation Assistant .................................................... 41
  Ralph A. Grayson and Dr. K. M. George

Analysis Tool for Web Hosting Service Providers .......................................... 47
  Ludmila Cherkasova, Mohan DeSouza, and Jobin James

Remote Lab: A Reliable Tele-Laboratory Environment .................................. 55
  Janek Schwarz, Andreas Polze, Kristopher Wehner, and Lui Sha

Visualization of Web Site Information with Semantic Weights ....................... 63
  Woo-Key Lee and Jin-Ho Kim

Advanced Techniques for Analyzing Web Server Logs .................................. 71
  Ernst-George Haflner, Uwe Roth, Andreas Heuer, Thomas Engle, and Cristoph Meinel
A Hyperlink Focused Browse Assistant for the World Wide Web .......................... 79
Andreas Heuer, Ernst-George Haffner, Uwe Roth, and Christoph Meinel

Implementing Flexible Failure Semantics when Programming the Web .................. 85
Keith Sibson and Richard Connor

A High-Level Symbolic Language for Distributed Web Programming .................. 93
Cees T. Visser and Anton Eliens

Using Dynamic Navigation Panel to Enhance the Quality of
Webpage Browsing ............................................................. 99
Hongexue Wang

Internet Collaboration in ToolSpace .............................................. 107
V. S. Sunderam and T. Goddard

Web Site Design Using a Web-Based Authoring and Publishing System ................ 113
Zhongdong Zhang, Uwe Roth, Thomas Engle, and Christoph Meinel

SECTION 3: Models, Simulations, Applications, and Algorithms

Virtual Campus: A Web-Based Customized Learning Environment ...................... 119
Ka-po Ma, Michael R. Lyn, and Wing-kay Kan

ISU API: Java Framework Supporting the Creation of Internet
Supercomputers ...................................................................... 127
Jan Borowiec

A Distributed Agent-Based System for Knowledge-Based Internet
Information Retrieval .................................................................. 135
S. Cazalens, E. Desmontils, C. Jacquin, and P. Lamarre

Voting Model for Ranking Web Pages ........................................... 143
Maxim Lifantsev

Synchronization Sensitive Frame Estimation Techniques for Audio-Video
Synchronization Restoration ............................................................. 149
Sherif G. Aly and Abdou Youssef

WebMC: A Web-Based Middleware for Mobile Computing ................................. 157
Son T. Vuong and Naizhi Li

Abstractions for Mobile Computation in ASM ............................................. 165
Marco Tulio de Oliveira Valente, Roberto da Silva Bigonha,
Antonio Alfredo Ferreir Loureiro, and Marcelo de Almeida Maia
SECTION 4: Communication Issues, Fault Tolerance, Traffic Hotspots

Heuristics for the Survivable Network Design Problem .................................................. 173
Chi-Geun Han and Tae-Ju Lee

Tree Delta Transcoding for Efficient Dynamic Resource Delivery
on Asymmetric Internet ................................................................. 179
Javed I. Khan

The RTP Payload Format for Telepointing .................................................. 187
Jaewoo Jeon and Sam Kweon Oh

Dynamic Traffic Conditioning for a DiffServ Domain Using
Feedback and Topology Techniques ............................................... 195
Athina Markopoulou and Barani Subiah

Fuzzy Failure Monitoring in Wide Area Networks ........................................... 203
F. Nguilla Kooh

Socket-Level Redirection Mechanism for Scalable Internet
Server System ................................................................. 211
Jaesun Han and Daeyeon Park

SECTION 5: Security and Privacy Issues

Building Security-Aware Applications on Celestial Network Security
Management Infrastructure .................................................. 219
Chong Xu, Fengmin Gong, Ilia Baldin, Liang Han, and Xinzhou Qin

Digital Watermarking of Audio Signal Using Hidden Signatures ............. 227
Won-Gyum Kim and Won Don Lee

IRBAC 2000: Secure Interoperability Using Dynamic Role
Translation ................................................................. 231
Apn Kapadia, Jalal Al-Muhtadi, Roy H. Campbell, and Dennis Mickunas

How To Exchange Secrets By OT ........................................... 239
Yong Ju Yis, Sang-Choon Kim, and Sang-Ho Lee

SECTION 6: E-Commerce

Modeling Electronic Commerce Transactions in Z .................................. 245
S. A. Ehikiyoa
Environment and Means for Cooperation and Interaction in E-Commerce
Agent-Based Systems ......................................................... 253
Pham Hong Hanh, Hien Nguyen, and Nguyen Van Hop

Electronic Commerce for Services and Intangible Goods .................... 261
Ehikioya S. A. and Suresh J.

SECTION 7: Architectures, Performance Analysis, and Related Topics

Essence of an Effective Web Caching Algorithm .................................... 269
Annie P. Foong, Yu-Hen Hu, and Dennis M. Heisey

Towards a Novel Architecture for Wide-Area Data Caching and Replication ........................................... 277
Thuaiappah Vaseeharan and Muthucumaru Maheswaran

Performance Evaluation of Distributed Web Server Architectures under E-Commerce Workloads ............................................. 285
Xubin He and Qing Yang

A Study of Internet Performance Analysis based on Real Environment Data ......................................................... 293
Choi Young-Su and Chung Jin-Wook

SECTION 8: Web Based Information Systems

Providing Interactive Site Maps for Web Navigation ............................. 299
Wei Lai and Jiro Tanaka

The Strategy of Hyperlink Filtering for Visual Web Browsing .................. 307
Mao Lin Huang and DongBai Xue

Functionally Minimized Embedded WWW-Server Implementation ............ 315
P. Mahonen, M. Saaranen, and J.-P. Soinien

Constructing Mobile Web Services on a Software Agent Platform ............. 323
M. Palola and M. Heikkinen

Multimedia Object Repository for the Web Based Multimedia Application Design ......................................................... 331
B. Zhou
SECTION 9: Advanced Techniques for Securing Internet Business Applications and E-Commerce

Proprietary versus Interoperable User Certificates in E-Commerce via Internet
Frank Losemann, Thomas Engel, and Christoph Meinel

Smart Cards - the Personal Safe in an E-Commerce World
Bernd Dusemund, Thomas Engel, and Christoph Meinel

Advanced Reliability for Internet Transactions by Signed Bills
Andreas Heuer, Frank Losemann, and Christoph Meinel

Improving the Quality of Information-Flow with the Smart Data Server
Uwe Roth, Thomas Engel, and Christoph Meinel

Role-based Web Authoring and Web-Site Management for Commercial Sites
Andreas Heuer, Ernst Georg Haffner, Zhongdong Zhang, and Christoph Meinel

Techniques for Securing Networks Against Criminal Attacks
Ernst Georg Haffner, Thomas Engel, and Christoph Meinel

SECTION 10: New Paradigms in Computer Security

Cryptographic Protocol Engineering-Building Security from the Ground Up
Jim Alves-Foss

Delegation of Privileges to Mobile Agents in Ajanta
Anand R. Tripathi and Neeran M. Karnik

Encoded Program Counter: Self-Protection from Buffer Overflow Attacks
Gyungho Lee and Akhilesh Tyagi

Fault Tolerant Authentication in Mobile Computing
Bharat Bhargava, Sarat Babu Kamisetty, and Sanjay Kumar Madria

Secure Web Server Through Behavior Modeling
Zhu Hui and Daniel TH Tan
RSAS - A Novel JavaCard-based Authentication System for Secured Transactions on the Internet
Li Huang Ng, Peng Bo Liu, and Daniel TH Tan

SECTION 11: Issues on Transport Protocols

Selective Idling: An Experiment in Transport Layer Power-Efficient Protocol Implementation
I. Batsiolas and I. Nikolaidis

Wavelet Analysis of Packet Loss in Video Transfers over UDP
Fei Xue, Velibor Markovski, and Ljiljana Trajkovic

Error Control for Reliable Transport Protocols: Higher Throughput & Lower Energy Expenditure
Hussein G. Badr

On the Performance of Reliable Transport Protocols over Wide Area Networks
A. Llahanas, D. Vardalis and V. Tsaoussidis

Evaluation of Well-Known Protocol Implementation Techniques for Application in Mobile Networks
Peter Langendorfer and Hartmut Konig

Transaction Internet Protocol: Facilitating Distributed Internet Applications
Keith Evans

Reducing Latency on the Internet using “Component-Based Download” and “File-Segment Transfer Protocol”
Babk S. Noghani, Steve Kretschmann, and Robert D. McLeod

A Contract Signing Protocol in the Internet
Sang-Choon Kim, Yong-Ju Yi, and Sang-Ho Lee
