AUTHOR INDEX FOR VOLUME 14 .................................................................. 850

NOTICE

The Subject Index and Chemical Index for Volume 14 will appear in the November 1990 issue as part of cumulative indexes for the year 1990.
EDITOR'S NOTE

The lead manuscript in this issue by Dr. Robert Scala, a Past President of the SOT and a key member of the Tox-80’s and Tox-90’s Commissions of the SOT, is the first of a series authored by leaders in our science who have a message of importance to the membership of our Society and readers of *Fundamental and Applied Toxicology*. In contrast to letters to the editor or issue papers which are author-initiated, these Invited Commentaries are solicited by the editor to stimulate thinking, communication, and sometimes action. As an essay, they might be analytical, speculative, or interpretive. The credibility, experience, and wisdom of the authors will stimulate everyone to read their comments. Only a small number of these will be sought—one or two per year—to keep their impact high. It is hoped that this effort will help the Society of Toxicology meet goals which are important to all of us.
