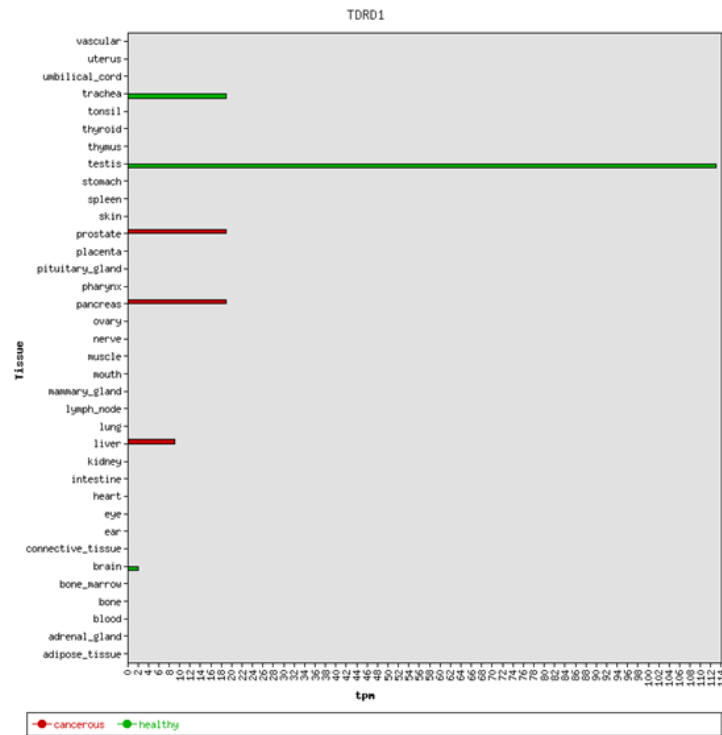

Figure S1. Examples of bar charts showing the integrated expression profile of seven additional genes, *BOLL* (A), *DAZ2* (B), *DAZL* (C), *FKBP6* (D), *PIWIL1* (E), *SYCP1* (F) and *TDRD1* (G) (the profile for *C16orf73* is shown in Fig. 1). Transcription levels (X axis) are measured in transcripts per million (tpm).
