CONTENTS

Two Kinds of Motor Perseveration in Massive Injury of the Frontal Lobes. By A. R. LURIA .................................................. 1

Thymectomy for Myasthenia Gravis. By R. A. HENSON, G. M. STERN and V. C. THOMPSON ....................... 11

Refractory Period of Muscle and Electromyographic Findings in Relatives of Patients with Muscular Dystrophy. By GIUSEPPE CARUSO and FRITZ BUCHTHAL .................................................. 29

Observations upon the Neurological Mechanism of Directional Preponderance of Caloric Nystagmus Resulting from Vascular Lesions of the Brain-stem. By E. A. CARMICHAEL, M. R. DIX and C. S. HALLPIKE .................................................. 51

Subtentorial Changes Following the Rupture of Cerebral Aneurysms. By M. R. CROMPTON .................................................. 75

Occlusion of the Middle Cerebral Artery. By R. G. LASCELLES and EDMUND H. BURROWS .................................................. 85

Bilateral Ophthalmoplegia in Basilar-vertebral Artery Disease. By ELMO F. MASUCCI .................................................. 97

Intracarotid Sodium Amylobarbitone and Cerebral Dominance for Speech and Consciousness. By E. A. SERAFETINIDES, R. D. HOARE and M. V. DRIVER .................................................. 107

Serum Enzymes in Friedreich's Ataxia. By N. ROBINSON, B. M. PHILLIPS and J. N. CUMINGS .................................................. 131

Cerebral Complications of Whipple's Disease. By W. THOMAS SMITH, J. M. FRENCH, M. GOTTSMAN, A. J. SMITH and J. A. WAKES-MILLER .................................................. 137

The Peripheral Nerves and Skeletal Muscles in Wegener's Granulomatosis: A Clinico-pathological Study of Four Cases. By G. M. STERN, A. V. HOFFBRAND and H. URICH .................................................. 151

Changes in the Central Nervous System in the Cat as the Result of Tri-o-cresyl Phosphate Poisoning. By J. B. CAVANAGH and G. N. PATANGIA .................................................. 165

Influence of the Substantia Nigra on the Catecholamine Content of the Striatum. By L. J. POIRIER and T. L. SOURKES .................................................. 181

Visual Illusions of Movement. By T. C. D. WHITESIDE, A. GRAYBIEL and J. I. NIVEN .................................................. 193

Notices of Recent Publications .................................................. 211

MACMILLAN (JOURNALS) LIMITED
ST. MARTIN'S STREET, LONDON

ST. MARTIN'S PRESS INC.
175 FIFTH AVENUE, NEW YORK 10010, N.Y.

Vol. 88. Part I. 1965

Price 18s. net.
Subscription 75s. net.

Entered as Second Class Matter, April 24, 1929, at the Post Office at Boston, Mass., under the Act of March 3, 1897 (Sec. 397, P.L. and R.). Printed in Great Britain.
All Editorial Communications, Typescripts for publication, &c., and books for review to be addressed to the Editor, The Lord Brain, D.M., F.R.S., 86, Harley Street, W.1.

All Communications concerning subscriptions, or the supply of copies of the Journal, to be sent to the Publishers, Messrs. Macmillan (Journals) Ltd., St. Martin's Street, W.C.2.

Directions to Authors with regard to the Preparation of Papers for Publication.

PAPERS must be typewritten on one side of the paper only and double-spaced, and should not be carbon copies. The typescript should be carefully revised before submission to the Editor. Insertions and written corrections in the proofs should be avoided as far as possible, and when made should be legible.

BIBLIOGRAPHICAL REFERENCES should be listed at the end of the paper in alphabetical order, and not numbered. In the case of a Journal, the author’s name, date of publication in brackets, are followed by the name of the Journal (abbreviated according to the World List of Scientific Periodicals), the volume number and the first page number of the paper quoted, both in Arabic numerals. In the case of a book: Author’s name, date of publication in brackets, title of book, place of publication, and (in brackets) the publisher’s name.

Works by the same author should be given in chronological order, and if there be more than one in a year, they are marked a, b, c, &c.

Where an author’s name occurs more than once, a short line represents the repeated name.

In the Text numbered references are not used, but the author’s name is followed by the date (in brackets) of the publication cited.

ILLUSTRATIONS should be line drawings where possible, and must be in Indian ink on white paper or Bristol boards. Drawings should be about twice the size of the reproduction, and thus lines must be thick enough to show up after reduction.

Lettering is best left to the engraver, but should be written in legibly in pencil.

All illustrations should be on separate sheets, should be numbered in order and bear the author’s name. Legends, also, should be on separate pieces of paper and numbered in order.

For half-tone reproductions good photographs are essential.

Intending authors are advised to study the pamphlet, published for the Royal Society by the Cambridge University Press (Price 2s. 6d.), entitled “General Notes on the Preparation of Scientific Papers.”

Authors are supplied free of charge with 50 copies of each paper reprinted in the form in which the paper stands in the pages of Brain. If further reprints are desired, authors are responsible for ordering these direct from Messrs. Staples Printers Limited, 69-85, Tabernacle Street, London, E.C.2, at the time they receive the galley proofs. If wrapper, title and renumbering of pages are desired, authors must specify the same when ordering.

Disconnexion Syndromes in Animals and Man. By NORMAN GESCHWIND 237

Myotonia, Dwarfism, Diffuse Bone Disease and Unusual Ocular and Facial Abnormalities (A New Syndrome). By DONALD C. ABERFELD, LADISLAV P. HINTERBUCHNER and MONROE SCHNEIDER 313

Neurological Complications of Glandular Fever (Infectious Mononucleosis). By P. C. GAUTIER-SMITH 323

Nerve Conduction in Alcoholic Polyneuropathy. By C. MAWDSLEY and R. F. MAYER 335

The Effect of Undernutrition and Subsequent Rehabilitation on Myelination of Rat Brain as Measured by its Composition. By J. DOBBING and ELSIE M. WIDDOWSON 357

Medulloblastomas and Arachnoidal Sarcomas. By D. DEXTER and D. A. HOWELL 367

A Comparative Study of Brain Tuberculomas and Gliomas Based Upon 107 Case Records of Each. By H. M. DASTUR and A. D. DESAI 375

The Extrapyramidal Cortical Motor Map. By RUTH LEWIS and G. S. BRINDLEY 397

Scapuloperoneal Muscular Atrophy. By H. E. KAESER 407

Notices of Recent Publications 419
