Nicola Galesi’s Publications

Journals

[J16] Olaf Beyersdorff, Nicola Galesi and Massimo Lauria.  
A Lower Bound for the Pigeonhole Principle in Tree-like Resolution by Asymmetric Prover-Delayer Games  
Information Processing Letters. 110(23):1074-1077 2010

Optimality of size-degree trade-offs for Polynomial Calculus  

[J14] N. Galesi, M. Lauria  
On the Automatizability of Polynomial Calculus.  

Rank Bounds and Integrality Gaps for Cutting Planes Procedures .  

Resolution and Pebbling Games  
Selected Papers of SAT 05, Lecture Notes in Computer Science 3596, pp. 76–90, 2006.  

Polynomial SAT decision, hypergraph transversals and Hermitian rank  
Selected Papers of SAT 04, Lecture Notes in Computer Science 3542, pp. 89–104., 2005

On the Complexity of Resolution with Bounded Conjunctions.  
Theoretical Computer Science. 21(2-3)pp. 347-370 2004

[J9] E. Ben-Sasson , N. Galesi  
Space Complexity for Random Formulae in Resolution.  

Monotone Simulations of nonmonotone Propositional Proofs.  

Degree Lower Bounds for a Modified Pigeonhole Principle.  
Archive for Mathematical Logic.

Optimality of Size-Width tradeoffs for Resolution.  
Computational Complexity.

Monotone Proofs of the Pigeon Hole Principle.  

A Predicative and Decidable Characterization of the Polynomial Classes of Languages. 

Linear Lower Bounds and Simulations in Frege Systems with Substitutions. 
In Selected Papers of 11-th Computer Science Logic. Edited by W. Thomas y M. Nielsen, 

A syntactic characterization of bounded-rank decision trees in terms of decision lists. 

Conference Proceedings

Parameterized Bounded-Depth Frege is Not Optimal 

[C15] Lorenzo Carlucci, Nicola Galesi and Massimo Lauria. 
Paris-Harrington tautologies 

[C14] Olaf Beyersdorff, Nicola Galesi and Massimo Lauria. 
Parameterized Complexity of DPLL Search Procedures 

[C13] N. Galesi, N. Thapen 
Resolution and Pebbling Games 

[C12]. N. Galesi, O.Kullmann. 
Polynomial SAT Decision, hypergraph transversal and Hermitian Rank. 

The complexity of treelike Systems over λ-local Formulae. 
IEEE Conference on Computational Complexity 2004: 68-74

Rank Bounds and Intergality Gaps for Cutting Planes Procedures. 

On the Complexity of Resolution with Bounded Conjunctions.
Proceedings of the International Colloquium on Automata, Languages and Programming (ICALP 02). Lecture Notes in Computer Science 2380, pp. 220-231, 2002

Space Complexity for Random Formulae in Resolution.

Monotone Simulations of nonmonotone Propositional Proofs.
IEEE Conference on Computational Complexity 2001 (CCC 01), pp. 36-41.

Monotone Proofs of the Pigeon Hole Principle.

Exponential Separations between Restricted Resolution and Cutting Planes Proof Systems. 

Linear Lower Bounds and Simulations in Frege Systems with Substitutions. 
11-th Computer Science Logic. pp. 109-119 (CSL 97)

Syntactic Characterization in LISP of the Polynomial Complexity Classes and Hierarchy. 

[C1] V. De Florio, N. Galesi, F.P. Murgolo, V. Spinelli. 
Towards an implementation of the Linda Model into the Parallel Virtual Machine. 

Thesis
