## Contents

Preface  
*Thomas Ågotnes*  

First-Order Multi-Class Subgroup Discovery  
*Tarek Abudawood and Peter Flach*  

Improving the Efficiency of Ontology Engineering by Introducing Prototypicality  
*Xavier Aimé, Frédéric Fürst, Pascale Kuntz and Francky Trichet*  

Towards Effective ‘Any-Time’ Music Tracking  
*Andreas Arzt and Gerhard Widmer*  

Relaxing Regression for a Heuristic GOLOG  
*Michelle L. Blom and Adrian R. Pearce*  

POMDP Solving: What Rewards Do You Really Expect at Execution?  
*Caroline Ponzoni Carvalho Chanel, Jean-Loup Farges, Florent Teichteil-Königsbuch and Guillaume Infantes*  

Generative Structure Learning for Markov Logic Networks  
*Quang-Thang Dinh, Matthieu Exbrayat and Christel Vrain*  

Learning Fuzzy Models of User Interests in a Semantic Information Retrieval System  
*Mauro Dragoni, Célia da Costa Pereira and Andrea G.B. Tettamanzi*  

Ontology-Based Document and Query Representation May Improve the Effectiveness of Information Retrieval  
*Mauro Dragoni, Célia da Costa Pereira and Andrea G.B. Tettamanzi*  

“Do You Trust Me or Not?” – Trust Games in Agent Societies  
*Rui Figueiredo, João Carmo and Rui Prada*  

Modal Access Control Logic: Axiomatization, Semantics and FOL Theorem Proving  
*Valerio Genovese, Daniele Rispoli, Dov M. Gabbay and Leendert van der Torre*  

Probabilistic Logic with Conditional Independence Formulae  
*Magdalena Ivanovska and Martin Giese*  

Difficulty Rating of Sokoban Puzzle  
*Petr Jarušek and Radek Pelánek*  

The Decidability of RPTL  
*Fahad Khan*  

Confluent Term Rewriting for Only-Knowing Logics  
*Espen H. Lian, Einar Broch Johnsen and Arild Waaler*
A Much Better Polynomial Time Approximation of Consistency in the LR Calculus
Dominik Lücke and Till Mossakowski

Fair Mechanisms for Recurrent Multi Unit Combinatorial Auctions
Javier Murillo and Beatriz López

Onto.PT: Automatic Construction of a Lexical Ontology for Portuguese
Hugo Gonçalo Oliveira and Paulo Gomes

MEC – Monitoring Clusters’ Transitions
Márcia Oliveira and João Gama

Dealing with the Dynamics of Proof-Standard in Argumentation-Based Decision Aiding
Wassila Ouerdane, Nicolas Maudet and Alexis Tsoukias

Domain Independent Goal Recognition
David Pattison and Derek Long

Maintaining Arc Consistency in Non-Binary Dynamic CSPs Using Simple Tabular Reduction
Mathieu Quéva, Christian W. Probst and Laurent Ricci

User-Based Collaborative Filtering: Sparsity and Performance
Jennifer Redpath, David H. Glass, Sally McClean and Luke Chen

Merging and Splitting for Power Indices in Weighted Voting Games and Network Flow Games on Hypergraphs
Anja Rey and Jörg Rothe

Cancer Classification Using SVM-Boosted Multiobjective Differential Fuzzy Clustering
Indrajit Saha, Ujjwal Maulik, Sanghamitra Bandyopadhyay and Dariusz Plewczynski

Performance Analysis of Class Noise Detection Algorithms
Borut Sluban, Dragan Gamberger and Nada Lavrač

Relational Graph Mining for Learning Events from Video
Muralikrishna Sridhar, Anthony G. Cohn and David C. Hogg

A Workbench for Anytime Reasoning by Ontology Approximation – With a Case Study on Instance Retrieval
Gaston Tagni, Stefan Schlobach, Annette ten Teije, Frank van Harmelen and Giorgios Karafotias

Obligationes as Formal Dialogue Systems
Sara L. Uckelman

On-Line ADL Recognition with Prior Knowledge
Jonas Ullberg, Silvia Coradeschi and Federico Pecora
