2011 IEEE International Symposium on Signal Processing and Information Technology

(ISSPIT 2011)

Bilbao, Spain
14 – 17 December 2011
# TABLE OF CONTENTS

- Mechanical Vibration Signal Compression by LOT-based Subband Coding ................................. 1
  Marius Olsca, Jose Picheral, Elisabeth Lahalle, Hani Hamdan
- An Interactive City Framework: Mobile Cloud Computing Approach ........................................ 5
  Heba M. Abdul El Aty, Hanan A. Hassan, Walaa M. Sheta
- A Bayesian Network-based Tunable Image Segmentation Algorithm For Object Recognition .......... 11
  Fahim Irfan Alam, Iker Gondra
- Content-Based Image Copy Detection Using Dual Signatures .................................................. 17
  Nadia Baaizit, Maxime Guain
- Simulation of the Anti-Collision Process of RFID Systems Based on Multiple Access Protocol Modeling .......................................................... 23
  Hadjer Saadi, Rachida Touhami, Mustapha C. E. Yagoub
- Performance Analysis of Basic Tree Protocols and ALOHA-Based Anti-Collision Algorithms Used in RFID Systems ......................................................... 29
  Hadjer Saadi, Rachida Touhami, Mustapha C. E. Yagoub
- Mining Rare Cases in Post-Operative Pain by Means of Outlier Detection ................................ 35
  M. U. Ahmed, P. Funk
- Improving N-Finder Technique for Extracting Endmembers .................................................... 42
  Mahnoun Maghrby, Reda Ammar, Sanguthevar-Rajasekaran
- A Correlation-Based Algorithm for Classifying Technical Articles ......................................... 50
  Rania Kilany, Reda Ammar, Sanguthevar Rajasekaran
- CSA-based Design of Feedforward Scalable Montgomery Modular Multiplier ............................ 54
  Tao Wu, Shuguo Li, Litian Liu
- Statistical Analysis of Parkinson Disease Gait Classification using Artificial Neural Network ........ 60
  Hany Hazfiza Manap, Nooritawati Tahir, Ahmad Ihsan M Yassin
- A Technique of Time Domain Sequential Data Embedding into Real Object Image Using Spatially Modulated Illumination ............................................... 66
  Yasunori Ishikawa, Kazutake Uehira, Kazuhiro Yanaka
- Dynamic Transmission of 3D mesh in Wireless Walkthrough Applications ................................ 71
  Ghada M. Fathy, Hanan A. Hassan, Rehab Gamal, Walaa M. Sheta
- Bitwise Hill Crypto System ........................................................................................................ 80
  Ahmed Desoky, Anju Panicker Madhusoodhanan
- Achieving the Workload Balance of the Clusters ....................................................................... 86
  Reda A. Ammar, Al Sayed A. H. Sallam, Amany M. Sarhan, Hebat Allah M. Ragab
- On the Automatic Prediction of PM10 with In-Situ Measurements, Satellite AOT Retrievals and Ancillary Data ........................................................................... 93
  Piero Campalani, Thi Nhat Thanh Nguyen, Simone Mantovani, Gianluca Mazzini
- EM Algorithm Of Spherical Models For Binned Data ................................................................. 99
  Hani Hamdan, Jingwen Wu
- No-Reference Image Semantic Quality Approach Using Neural Network ................................ 106
  Sonia Ouni, Ezzeddine Zagrouba, Majed Chambah, Michel Herbin
- Criteria for Performance Improvement in Metropolitan Area WDM Ring Networks .................... 114
  Peristera A. Baziana, Ioannis E. Pountourakis
- Time-Frequency Signal and Image Processing on Non-stationary Signals with Application to the Classification of Newborn EEG Abnormalities ................................................. 120
  Boualem Boashash, Larbi Bouabehir, Ghasem Azemi
- Analysis For Effective Approaches Towards Generating Of Artificial Neuron Structures ........... 130
  Stefan Badura
- On Designing Optimal Control Systems Through Genetic And Neuro-Fuzzy Techniques............. 134
  Danilo Pelusi
- Wavelet Transform For The Analysis Of EEG Signals In Patients With Oral Communications Problems .................................................................................... 140
  Maria Viqueira, Begona Garcia Zapirain, Amaia Mendez
- Nonlinear Bandwidth Extension of Audio Signals based on Hidden Markov Model ................... 144
  Xin Liu, Chung-chun Bao, Liyan Zhang, Xingtuo Zhang, Feng Bao, Bing Bu
- Nonlinear Bandwidth Extension based on Hidden Markov Model ............................................ 150
  Liu Xin
An Improved β-order WEDM Spectral Amplitude Estimator for Speech Enhancement .......................................................... 155
Na Li, Chang-Chun Bao, Bing-Yin Xia, Feng Deng

Animated Depth Employing Image Synthesis for 3D Security X-ray Imaging ........................................................................ 161
O. Abusaeeda, J. P. O. Evans, D. Downes, J. W. Chan

A Fixed-Point Iterative Schema for Error Minimization in k-Sparse Decomposition ................................................................. 167
Alessandro Adamo, Giuliano Grossi

Sparsity Recovery by Iterative Orthogonal Projections of Nonlinear Mappings .................................................................... 173
Alessandro Adamo, Giuliano Grossi

Improving Performance of Reed-Solomon Decoder by Error/Erasure Correction ................................................................. 179
Kyungsu Ko, Ilhyuk Oh, Dongik Ko, Byung Gi Jung

Fingerprinting Localization based on Neural Networks and Ultra-wideband signals ......................................................... 184
Lei Yu, Mohamed Lauaradeth, Stéphane Avillon, Bernard Uguen

Aerial Image Classification Using Structural Texture Similarity ......................................................................................... 190
Vladimir Risojevic, Zdenka Babic

José Luis García Arroyo, Begona García Zapirain, Amaia Méndez Zorrilla

The Effect of Timing Errors on Frequency Offset Estimation in OFDM Systems ........................................................................ 202
S. Younis, A. Al-Dweik, C. V. Tsimenidis, B. S. Sharaf, A. Hazmi

Compressed Domain Speech Enhancement based on the Joint Modification of Codebook Gains ....................................................... 207
Bing-Yin Xia, Chang-Chun Bao, Yan Liang, Xuan Zhou, Yu-Wen He, Ru-Wei Li

A Robust Characterization of Audio Signals Using the Level of Information Content per Chroma ............................................. 212
Alain Manzo-Martinez, Antonio Camarena-Ibarrola

Digital Watermarking Method based on Fuzzy Image Segmentation Technique ........................................................................ 218
Methaq Gaata, William Puech, Sattar Sadikh

Fault Detection in Reciprocating Compressor Valves for Steady-State Load Conditions ......................................................... 224
Kurt Pichler, Andrea Schrems, Thomas Buchegger, Matthias Hutschenbrett, Markus Pichler

A Time Frequency Approach to CFR Detection .................................................................................................................. 230
S. Layeghy, M. Odabeae, M. S. Khlf, H. R. Amindavar

An Interactive Super Resolution Coding Approach Of Images And Videos For Enhanced User Visualization .................................................................................................................................................................................. 235
Gamal Fahmy

Greedy Algorithms for Sparse Adaptive Decision Feedback Equalization ..................................................................................... 240
Aris S. Lalos, Evangelos Ylachos, Kostas Berberidis, Athanasios A. Rontogiannis

Applying Integrated Nested Laplace Approximation to the Superresolution Problem ............................................................ 246
Marcelo Oliveira Camponez, Evandro O. Teatini Salles, Mario Sarcinelli-Filho

A Restoration Method of the Clipped Audio Signals based on MDCT ........................................................................................... 253
Dawei Zhang, Chang-Chun Bao, Feng Deng, Bingyin Xia, Hao Chen

Implementation Of A Matching Engine For A Practical Query-By-Singing/Humming System ................................................ 258
Daboon Jung, Chai-Jong Song, Seain Shin, Sung-Joo Park, Sei-Jin Jung, Seok-Pil Lee

Hiroshi Saruwatari, Nobuhisa Hirata, Toshiyuki Hatta, Ryo Wakisaka, Kiyohiro Shikano, Tomoya Takatani

Multifractal Analysis of Blood Oxygen Level Dependent Functional Magnetic Resonance Imaging ........................................ 270
Catarina Ropa Miranda, Filipe Soares, Inês Sousa, Filipe Janela, Mário Forjaz Secca

Blind Source Separation of Nondisjoint Sources in The Time-Frequency Domain with Model-Based Determination of Source Contribution .................................................................................................................. 276
Jalil Taghia, Timo Gerkmann, Arne Leijon

Benchmarking the Performance of SVMs and HMMs for Accelerometer-Based Biometric Gait Recognition ...................................................... 281
Claudia Nickel, Holger Brandt, Christoph Busch

Disparity Energy Model Using a Trained Neuronal Population .............................................................................................. 287
Jaime A. Martinis, J. M. F. Rodrigues, J. M. H. Du Buf

Acoustic Analysis of Czech Expressive Recordings from a Single Speaker in Terms of Various Communicative Functions ......................................................................................................................................................... 293
Martin Gruber

Enhanced Fuzzy-based Models for ROI Extraction in Medical Images ...................................................................................... 299
Yasser El-Sonbaty, Sherin M. Youssef, Karma M. Fatullah

Iterative Joint Channel and Noise Variance Estimation and Primary User Signal Detection for Cognitive Radios ............................ 305
Ayman Assra, Arash Vakili, Benoit Champagne
