

## CORRIGENDUM

# Flexible tethering of primase and DNA Pol $\alpha$ in the eukaryotic primosome

Rafael Núñez-Ramírez, Sebastian Klinge, Ludovic Sauguet, Roberto Melero, María A. Recuero-Checa, Mairi Kilkenny, Rajika L. Perera, Begoña García-Alvarez, Richard J. Hall, Eva Nogales, Luca Pellegrini and Oscar Llorca

*Nucleic Acids Res.* 2011; **39**, 8187–8199. doi: 10.1093/nar/gkr534

The authors have become aware of a labelling mistake in Figure 6B. The 'Prim complex' sample was used only in lane 1, and not in lanes 3, 4 and 5, as indicated in the original version of the figure. The corrected figure is shown below, and the authors would like to apologize for any confusion this mistake may have caused.

This correction does not influence the validity of the results and the conclusions of this article.
