1	Introduction	1
1.1	Historical Review.....	1
1.2	Multiple-Quadrant Choppers.....	2
1.2.1	Multiple-Quadrant Operation.....	2
1.2.2	The First-Quadrant Chopper.....	3
1.2.3	The Second-Quadrant Chopper.....	4
1.2.4	The Third-Quadrant Chopper.....	5
1.2.5	The Fourth-Quadrant Chopper	6
1.2.6	The First and Second Quadrant Chopper.....	7
1.2.7	The Third and Fourth Quadrant Chopper	8
1.2.8	The Four-Quadrant Chopper	9
1.3	Pump Circuits.....	9
1.3.1	Fundamental Pumps.....	10
1.3.1.1	Buck Pump	10
1.3.1.2	Boost Pump	10
1.3.1.3	Buck-Boost Pump	10
1.3.2	Developed Pumps.....	10
1.3.2.1	Positive Luo-Pump.....	12
1.3.2.2	Negative Luo-Pump.....	12
1.3.2.3	Cúk-Pump.....	12
1.3.3	Transformer-Type Pumps	14
1.3.3.1	Forward Pump	14
1.3.3.2	Fly-Back Pump.....	14
1.3.3.3	ZETA Pump	15
1.3.4	Super-Lift Pumps	15
1.3.4.1	Positive Super Luo-Pump	16
1.3.4.2	Negative Super Luo-Pump	16
1.3.4.3	Positive Push-Pull Pump.....	16
1.3.4.4	Negative Push-Pull Pump.....	17
1.3.4.5	Double/Enhanced Circuit (DEC).....	17
1.4	Development of DC/DC Conversion Technique.....	18
1.4.1	The First Generation Converters	19
1.4.1.1	Fundamental Converters.....	19
1.4.1.2	Transformer-Type Converters.....	23
1.4.1.3	Developed Converters	28
1.4.1.4	Voltage Lift Converters.....	32
1.4.1.5	Super Lift Converters.....	32
1.4.2	The Second Generation Converters	32

1.4.3	The Third Generation Converters	33
1.4.3.1	Switched Capacitor Converters.....	33
1.4.3.2	Multiple-Quadrant Switched Capacitor Luo-Converters	34
1.4.3.3	Multiple-Lift Push-Pull Switched Capacitor Converters.....	34
1.4.3.4	Multiple-Quadrant Switched Inductor Converters	34
1.4.4	The Fourth Generation Converters	35
1.4.4.1	Zero-Current-Switching Quasi-Resonant Converters.....	35
1.4.4.2	Zero-Voltage-Switching Quasi-Resonant Converters.....	35
1.4.4.3	Zero-Transition Converters	36
1.4.5	The Fifth Generation Converters.....	36
1.4.6	The Sixth Generation Converters	36
1.5	Categorize Prototypes and DC/DC Converter Family Tree.....	37
	References.....	39
2	Voltage-Lift Converters.....	41
2.1	Introduction	41
2.2	Seven Self-Lift Converters.....	42
2.2.1	Self-Lift Cúk Converter	44
2.2.1.1	Continuous Conduction Mode.....	44
2.2.1.2	Discontinuous Conduction Mode.....	48
2.2.2	Self-Lift P/O Luo-Converter	50
2.2.2.1	Continuous Conduction Mode.....	50
2.2.2.2	Discontinuous Conduction Mode.....	53
2.2.3	Reverse Self-Lift P/O Luo-Converter	54
2.2.3.1	Continuous Conduction Mode.....	54
2.2.3.2	Discontinuous Conduction Mode.....	58
2.2.4	Self-Lift N/O Luo-Converter	59
2.2.4.1	Continuous Conduction Mode.....	60
2.2.4.2	Discontinuous Conduction Mode.....	61
2.2.5	Reverse Self-Lift N/O Luo-Converter	62
2.2.5.1	Continuous Conduction Mode.....	63
2.2.5.2	Discontinuous Conduction Mode.....	65
2.2.6	Self-Lift SEPIC	66
2.2.6.1	Continuous Conduction Mode.....	66
2.2.6.2	Discontinuous Conduction Mode.....	69
2.2.7	Enhanced Self-Lift P/O Luo-Converter	70
2.3	Positive Output Luo-Converters.....	72
2.3.1	Elementary Circuit	74
2.3.1.1	Circuit Description	74
2.3.1.2	Variations of Currents and Voltages.....	77
2.3.1.3	Instantaneous Values of Currents and Voltages.....	80
2.3.1.4	Discontinuous Mode	81
2.3.1.5	Stability Analysis	83

2.3.2	Self-Lift Circuit	85
2.3.2.1	Circuit Description	85
2.3.2.2	Average Current I_{C1} and Source Current I_S	88
2.3.2.3	Variations of Currents and Voltages.....	88
2.3.2.4	Instantaneous Value of the Currents and Voltages	91
2.3.2.5	Discontinuous Mode.....	92
2.3.2.6	Stability Analysis	94
2.3.3	Re-Lift Circuit	96
2.3.3.1	Circuit Description	96
2.3.3.2	Other Average Currents	98
2.3.3.3	Variations of Currents and Voltages.....	100
2.3.3.4	Instantaneous Value of the Currents and Voltages	103
2.3.3.5	Discontinuous Mode.....	105
2.3.3.6	Stability Analysis	107
2.3.4	Multiple-Lift Circuits.....	110
2.3.4.1	Triple-Lift Circuit.....	111
2.3.4.2	Quadruple-Lift Circuit.....	114
2.3.5	Summary.....	118
2.3.6	Discussion.....	119
2.3.6.1	Discontinuous-Conduction Mode.....	119
2.3.6.2	Output Voltage V_O versus Conduction Duty k	121
2.3.6.3	Switch Frequency f	121
2.4	Negative Output Luo-Converters.....	121
2.4.1	Elementary Circuit.....	124
2.4.1.1	Circuit Description	125
2.4.1.2	Average Voltages and Currents.....	125
2.4.1.3	Variations of Currents and Voltages.....	126
2.4.1.4	Instantaneous Values of Currents and Voltages	129
2.4.1.5	Discontinuous Mode.....	130
2.4.2	Self-Lift Circuit	132
2.4.2.1	Circuit Description	132
2.4.2.2	Average Voltages and Currents.....	132
2.4.2.3	Variations of Currents and Voltages.....	135
2.4.2.4	Instantaneous Value of the Currents and Voltages	138
2.4.2.5	Discontinuous Mode.....	139
2.4.3	Re-Lift Circuit	140
2.4.3.1	Circuit Description	141
2.4.3.2	Average Voltages and Currents.....	141
2.4.3.3	Variations of Currents and Voltages.....	144
2.4.3.4	Instantaneous Value of the Currents and Voltages	147
2.4.3.5	Discontinuous Mode.....	149

2.4.4	Multiple-Lift Circuits.....	151
2.4.4.1	Triple-Lift Circuit.....	151
2.4.4.2	Quadruple-Lift Circuit.....	155
2.4.5	Summary.....	158
2.5	Modified Positive Output Luo-Converters	162
2.5.1	Elementary Circuit	162
2.5.2	Self-Lift Circuit	163
2.5.3	Re-Lift Circuit	165
2.5.4	Multi-Lift Circuit	168
2.5.5	Application.....	170
2.6	Double Output Luo-Converters	171
2.6.1	Elementary Circuit	173
2.6.1.1	Positive Conversion Path	174
2.6.1.2	Negative Conversion Path	176
2.6.1.3	Discontinuous Mode.....	178
2.6.2	Self-Lift Circuit	181
2.6.2.1	Positive Conversion Path	181
2.6.2.2	Negative Conversion Path	183
2.6.2.3	Discontinuous Conduction Mode.....	186
2.6.3	Re-Lift Circuit	188
2.6.3.1	Positive Conversion Path	188
2.6.3.2	Negative Conversion Path	191
2.6.3.3	Discontinuous Conduction Mode.....	194
2.6.4	Multiple-Lift Circuit.....	196
2.6.4.1	Triple-Lift Circuit.....	196
2.6.4.2	Quadruple-Lift Circuit.....	202
2.6.5	Summary.....	208
2.6.5.1	Positive Conversion Path	208
2.6.5.2	Negative Conversion Path	210
2.6.5.3	Common Parameters.....	210
	Bibliography	212
3	Positive Output Super-Lift Luo-Converters	215
3.1	Introduction	215
3.2	Main Series	216
3.2.1	Elementary Circuit	216
3.2.2	Re-Lift Circuit	219
3.2.3	Triple-Lift Circuit.....	220
3.2.4	Higher Order Lift Circuit.....	222
3.3	Additional Series	222
3.3.1	Elementary Additional Circuit.....	223
3.3.2	Re-Lift Additional Circuit.....	227
3.3.3	Triple-Lift Additional Circuit	228
3.3.4	Higher Order Lift Additional Circuit	230

3.4	Enhanced Series	231
3.4.1	Elementary Enhanced Circuit	231
3.4.2	Re-Lift Enhanced Circuit.....	233
3.4.3	Triple-Lift Enhanced Circuit.....	235
3.4.4	Higher Order Lift Enhanced Circuit.....	237
3.5	Re-Enhanced Series	237
3.5.1	Elementary Re-Enhanced Circuit	238
3.5.2	Re-Lift Re-Enhanced Circuit.....	242
3.5.3	Triple-Lift Re-Enhanced Circuit.....	243
3.5.4	Higher Order Lift Re-Enhanced Circuit.....	245
3.6	Multiple-Enhanced Series.....	246
3.6.1	Elementary Multiple-Enhanced Circuit.....	249
3.6.2	Re-Lift Multiple-Enhanced Circuit.....	250
3.6.3	Triple-Lift Multiple-Enhanced Circuit	251
3.6.4	Higher Order Lift Multiple-Enhanced Circuit	253
3.7	Summary of Positive Output Super-Lift Luo-Converters	254
3.8	Simulation Results	258
3.8.1	Simulation Results of a Triple-Lift Circuit.....	258
3.8.2	Simulation Results of a Triple-Lift Additional Circuit	258
3.9	Experimental Results	259
3.9.1	Experimental Results of a Triple-Lift Circuit	259
3.9.2	Experimental Results of a Triple-Lift Additional Circuit	259
3.9.3	Efficiency Comparison of Simulation and Experimental Results	260
	Bibliography	261
4	Negative Output Super-Lift Luo-Converters	263
4.1	Introduction	263
4.2	Main Series	264
4.2.1	Elementary Circuit	264
4.2.2	N/O Re-Lift Circuit	268
4.2.3	N/O Triple-Lift Circuit	270
4.2.4	N/O Higher Order Lift Circuit	272
4.3	Additional Series	273
4.3.1	N/O Elementary Additional Circuit.....	273
4.3.2	N/O Re-Lift Additional Circuit.....	277
4.3.3	N/O Triple-Lift Additional Circuit.....	279
4.3.4	N/O Higher Order Lift Additional Circuit	282
4.4	Enhanced Series	283
4.4.1	N/O Elementary Enhanced Circuit	283
4.4.2	N/O Re-Lift Enhanced Circuit	285
4.4.3	N/O Triple-Lift Enhanced Circuit.....	288
4.4.4	N/O Higher Order Lift Enhanced Circuit.....	291

4.5	Re-Enhanced Series	291
4.5.1	N/O Elementary Re-Enhanced Circuit	291
4.5.2	N/O Re-Lift Re-Enhanced Circuit	295
4.5.3	N/O Triple-Lift Re-Enhanced Circuit.....	295
4.5.4	N/O Higher Order Lift Re-Enhanced Circuit.....	296
4.6	Multiple-Enhanced Series.....	297
4.6.1	N/O Elementary Multiple-Enhanced Circuit.....	297
4.6.2	N/O Re-Lift Multiple-Enhanced Circuit.....	299
4.6.3	N/O Triple-Lift Multiple-Enhanced Circuit.....	301
4.6.4	N/O Higher Order Lift Multiple-Enhanced Circuit.....	302
4.7	Summary of Negative Output Super-Lift Luo-Converters	302
4.8	Simulation Results	306
4.8.1	Simulation Results of a N/O Triple-Lift Circuit.....	306
4.8.2	Simulation Results of a N/O Triple-Lift Additional Circuit.....	306
4.9	Experimental Results	306
4.9.1	Experimental Results of a N/O Triple-Lift Circuit	306
4.9.2	Experimental Results of a N/O Triple-Lift Additional Circuit.....	307
4.9.3	Efficiency Comparison of Simulation and Experimental Results	308
4.9.4	Transient Process and Stability Analysis.....	308
	Bibliography	309
5	Positive Output Cascade Boost Converters.....	311
5.1	Introduction	311
5.2	Main Series	312
5.2.1	Elementary Boost Circuit.....	312
5.2.2	Two-Stage Boost Circuit	313
5.2.3	Three-Stage Boost Circuit	315
5.2.4	Higher Stage Boost Circuit.....	317
5.3	Additional Series	318
5.3.1	Elementary Boost Additional (Double) Circuit.....	318
5.3.2	Two-Stage Boost Additional Circuit.....	320
5.3.3	Three-Stage Boost Additional Circuit.....	322
5.3.4	Higher Stage Boost Additional Circuit.....	324
5.4	Double Series.....	325
5.4.1	Elementary Double Boost Circuit.....	325
5.4.2	Two-Stage Double Boost Circuit.....	325
5.4.3	Three-Stage Double Boost Circuit	327
5.4.4	Higher Stage Double Boost Circuit.....	330
5.5	Triple Series	331
5.5.1	Elementary Triple Boost Circuit	331
5.5.2	Two-Stage Triple Boost Circuit	332
5.5.3	Three-Stage Triple Boost Circuit.....	334
5.5.4	Higher Stage Triple Boost Circuit.....	337

5.6	Multiple Series	337
5.6.1	Elementary Multiple Boost Circuit	338
5.6.2	Two-Stage Multiple Boost Circuit	339
5.6.3	Three-Stage Multiple Boost Circuit.....	341
5.6.4	Higher Stage Multiple Boost Circuit.....	343
5.7	Summary of Positive Output Cascade Boost Converters	343
5.8	Simulation and Experimental Results.....	345
5.8.1	Simulation Results of a Three-Stage Boost Circuit.....	345
5.8.2	Experimental Results of a Three-Stage Boost Circuit	347
5.8.3	Efficiency Comparison of Simulation and Experimental Results	348
5.8.4	Transient Process	348
	Bibliography	349
6	Negative Output Cascade Boost Converters	351
6.1	Introduction	351
6.2	Main Series	351
6.2.1	N/O Elementary Boost Circuit.....	352
6.2.2	N/O Two-Stage Boost Circuit.....	353
6.2.3	N/O Three-Stage Boost Circuit	355
6.2.4	N/O Higher Stage Boost Circuit.....	357
6.3	Additional Series	358
6.3.1	N/O Elementary Additional Boost Circuit	358
6.3.2	N/O Two-Stage Additional Boost Circuit	360
6.3.3	N/O Three-Stage Additional Boost Circuit.....	362
6.3.4	N/O Higher Stage Additional Boost Circuit.....	365
6.4	Double Series.....	365
6.4.1	N/O Elementary Double Boost Circuit.....	365
6.4.2	N/O Two-Stage Double Boost Circuit.....	366
6.4.3	N/O Three-Stage Double Boost Circuit	368
6.4.4	N/O Higher Stage Double Boost Circuit.....	370
6.5	Triple Series	371
6.5.1	N/O Elementary Triple Boost Circuit	371
6.5.2	N/O Two-Stage Triple Boost Circuit	372
6.5.3	N/O Three-Stage Triple Boost Circuit.....	374
6.5.4	N/O Higher Stage Triple Boost Circuit	377
6.6	Multiple Series	377
6.6.1	N/O Elementary Multiple Boost Circuit	378
6.6.2	N/O Two-Stage Multiple Boost Circuit	378
6.6.3	N/O Three-Stage Multiple Boost Circuit.....	381
6.6.4	N/O Higher Stage Multiple Boost Circuit	381
6.7	Summary of Negative Output Cascade Boost Converters.....	383
6.8	Simulation and Experimental Results.....	385
6.8.1	Simulation Results of a Three-Stage Boost Circuit.....	385
6.8.2	Experimental Results of a Three-Stage Boost Circuit	386

6.8.3	Efficiency Comparison of Simulation and Experimental Results	388
6.8.4	Transient Process	388
	Bibliography	388
7	Multiple Quadrant Operating Luo-Converters	391
7.1	Introduction	391
7.2	Circuit Explanation.....	393
7.2.1	Mode A	394
7.2.2	Mode B.....	395
7.2.3	Mode C	396
7.2.4	Mode D	396
7.2.5	Summary.....	396
7.3	Mode A (Quadrant I Operation)	396
7.3.1	Circuit Description	397
7.3.2	Variations of Currents and Voltages	401
7.3.3	Discontinuous Region	402
7.4	Mode B (Quadrant II Operation)	403
7.4.1	Circuit Description	403
7.4.2	Variations of Currents and Voltages	405
7.4.3	Discontinuous Region	406
7.5	Mode C (Quadrant III Operation)	407
7.5.1	Circuit Description	407
7.5.2	Variations of Currents and Voltages	409
7.5.3	Discontinuous Region	410
7.6	Mode D (Quadrant IV Operation).....	411
7.6.1	Circuit Description	411
7.6.2	Variations of Currents and Voltages	413
7.6.3	Discontinuous Region	414
7.7	Simulation Results	415
7.8	Experimental Results	415
7.9	Discussion	419
7.9.1	Discontinuous-Conduction Mode	419
7.9.2	Comparison with the Double-Output Luo-Converter	419
7.9.3	Conduction Duty k	421
7.9.4	Switching Frequency f	421
	Bibliography	421
8	Switched Component Converters	423
8.1	Introduction	424
8.2	A Two-Quadrant SC DC/DC Converter	424
8.2.1	Circuit Description.....	424
8.2.1.1	Mode A.....	425
8.2.1.2	Mode B	425
8.2.2	Mode A (Quadrant I Operation).....	427

8.2.3	Mode B (Quadrant II Operation).....	430
8.2.4	Experimental Results	433
8.2.5	Discussion.....	433
8.2.5.1	Efficiency	433
8.2.5.2	Conduction Duty k	434
8.2.5.3	Switching Frequency f	434
8.3	Four-Quadrant Switched Capacitor DC/DC Luo-Converter	434
8.3.1	Mode A (Q_I : Forward Motoring)	440
8.3.1.1	Mode A1: Condition $V_1 > V_2$	440
8.3.1.2	Mode A2: Condition $V_1 < V_2$	444
8.3.1.3	Experimental Results	447
8.3.2	Mode B (Q_{II} : Forward Regenerative Braking).....	447
8.3.2.1	Mode B1: Condition $V_1 > V_2$	447
8.3.2.2	Mode B2: Condition $V_1 < V_2$	450
8.3.3	Mode C (Q_{III} : Reverse Motoring).....	452
8.3.4	Mode D (Q_{IV} : Reverse Regenerative Braking).....	452
8.4	Switched Inductor Four-Quadrant DC/DC Luo-Converter	452
8.4.1	Mode A (Q_I : Forward Motoring)	456
8.4.1.1	Continuous Mode	456
8.4.1.2	Discontinuous Mode	458
8.4.2	Mode B (Q_{II} : Forward Regenerative Braking).....	461
8.4.2.1	Continuous Mode	461
8.4.2.2	Discontinuous Mode	463
8.4.3	Mode C (Q_{III} : Reverse Motoring).....	465
8.4.3.1	Continuous Mode	465
8.4.3.2	Discontinuous Mode	467
8.4.4	Mode D (Q_{IV} : Reverse Regenerative Braking).....	470
8.4.4.1	Continuous Mode	470
8.4.4.2	Discontinuous Mode	471
8.4.5	Experimental Results	474
	Bibliography	474
9	Positive Output Multiple-Lift Push-Pull Switched-Capacitor Luo-Converters	477
9.1	Introduction	477
9.2	Main Series	478
9.2.1	Elementary Circuit	479
9.2.2	Re-Lift Circuit	480
9.2.3	Triple-Lift Circuit.....	481
9.2.4	Higher Order Lift Circuit.....	481
9.3	Additional Series	481
9.3.1	Elementary Additional Circuit.....	481
9.3.2	Re-Lift Additional Circuit.....	482
9.3.3	Triple-Lift Additional Circuit	483
9.3.4	Higher Order Lift Additional Circuit	487

9.4	Enhanced Series	487
9.4.1	Elementary Enhanced Circuit	487
9.4.2	Re-Lift Enhanced Circuit.....	487
9.4.3	Triple-Lift Enhanced Circuit.....	488
9.4.4	Higher Order Enhanced Lift Circuit.....	488
9.5	Re-Enhanced Series	488
9.5.1	Elementary Re-Enhanced Circuit	489
9.5.2	Re-Lift Re-Enhanced Circuit.....	490
9.5.3	Triple-Lift Re-Enhanced Circuit.....	492
9.5.4	Higher Order Lift Re-Enhanced Circuit.....	492
9.6	Multiple-Enhanced Series.....	492
9.6.1	Elementary Multiple-Enhanced Circuit.....	493
9.6.2	Re-Lift Multiple-Enhanced Circuit.....	496
9.6.3	Triple-Lift Multiple-Enhanced Circuit	498
9.6.4	Higher Order Lift Multiple-Enhanced Circuit	499
9.7	Theoretical Analysis	499
9.8	Summary of This Technique.....	501
9.9	Simulation Results.....	501
9.9.1	A Triple-Lift Circuit	502
9.9.2	A Triple-Lift Additional Circuit	502
9.10	Experimental Results	502
9.10.1	A Triple-Lift Circuit	502
9.10.2	A Triple-Lift Additional Circuit	502
	Bibliography	503

10 Negative Output Multiple-Lift Push-Pull

	Switched-Capacitor Luo-Converters.....	505
10.1	Introduction	505
10.2	Main Series	506
10.2.1	N/O Elementary Circuit	507
10.2.2	N/O Re-Lift Circuit	509
10.2.3	N/O Triple-Lift Circuit	509
10.2.4	N/O Higher Order Lift Circuit	509
10.3	Additional Series	510
10.3.1	N/O Elementary Additional Circuit.....	511
10.3.2	N/O Re-Lift Additional Circuit.....	511
10.3.3	N/O Triple-Lift Additional Circuit	511
10.3.4	N/O Higher Order Lift Additional Circuit	513
10.4	Enhanced Series	514
10.4.1	N/O Elementary Enhanced Circuit	515
10.4.2	N/O Re-Lift Enhanced Circuit	515
10.4.3	N/O Triple-Lift Enhanced Circuit.....	515
10.4.4	N/O Higher Order Lift Enhanced Circuit.....	516
10.5	Re-Enhanced Series	517
10.5.1	N/O Elementary Re-Enhanced Circuit	517
10.5.2	N/O Re-Lift Re-Enhanced Circuit	518

10.5.3	N/O Triple-Lift Re-Enhanced Circuit.....	518
10.5.4	N/O Higher Order Lift Re-Enhanced Circuit.....	519
10.6	Multiple-Enhanced Series.....	521
10.6.1	N/O Elementary Multiple-Enhanced Circuit.....	522
10.6.2	N/O Re-Lift Multiple-Enhanced Circuit.....	524
10.6.3	N/O Triple-Lift Multiple-Enhanced Circuit.....	524
10.6.4	N/O Higher Order Lift Multiple-Enhanced Circuit.....	525
10.7	Summary of This Technique.....	525
10.8	Simulation and Experimental Results.....	525
10.8.1	Simulation Results.....	525
10.8.2	Experimental Results.....	527
	Bibliography.....	527
11	Multiple-Quadrant Soft-Switch Converters.....	529
11.1	Introduction.....	530
11.2	Multiple-Quadrant DC/DC ZCS Quasi-Resonant Luo-Converters.....	531
11.2.1	Mode A.....	532
11.2.1.1	Interval $t = 0$ to t_1	533
