Official Journal of the International Society of Regulatory Toxicology and Pharmacology

REPORTS the concepts and problems involved with the generation, evaluation, and interpretation of experimental animal and human data in the larger perspective of the societal considerations of protecting human health and the environment.

DEVOTED to reports of significant developments, public opinion, scientific data, and ideas that bridge the gap between scientific information and the legal aspects of toxicological and pharmacological regulations.

PRESENTS articles concerned with regulatory decisions and with the interpretation of scientific knowledge as influencing regulatory decisions.

ADDRESSED primarily to bench scientists, program managers, research directors, and attorneys.

DATABASE COVERAGE includes BioBusiness Chemical Abstracts, Chemical Hazards Index, Current Contents/Life Sciences, Excerpta Medica, Index Medicus (MEDLINE), Research Alert, Risk Abstracts, and Science Citation Index.

Volumes 23-24 (1996), 6 issues (including annual subject index)
ISSN 0273-2300

Institutional Rate: $292.00
Personal Rate: $175.00
In the U.S.A. and Canada: $367.00
All other countries: $228.00

Sample copies are available upon request. For more information, please write or call:

All prices are in U.S. dollars and are subject to change without notice. Canadian customers: Please add 7% Goods and Services Tax to your order. Personal rates are available only on orders placed directly with the Publisher and paid for with personal funds.
Fundamental and Applied Toxicology

CONTENTS

WORKSHOP OVERVIEW

Identification of Respiratory Allergens
   Ian Kimber, I. Leonard Bernstein, Meryl H. Karol, Michael K. Robinson, Katherine Sarlo, and Mary Jane K. Selgrade ................................................................. 1

REGULAR ARTICLES

Developmental Toxicity Study of Mangafodipir Trisodium Injection (MnDPDP) in New Zealand White Rabbits

Mode of Action of Thyroid Tumor Formation in the Male Long–Evans Rat Administered High Doses of Alachlor
   Alan G. E. Wilson, Daryl C. Thake, William E. Heydens, David W. Brewster, and Kathy J. Hotz ... 16

Influence of Dibutyl Phthalate on Dermal Sensitization to Fluorescein Isothiocyanate

Hepatoprotective Effects of the Shark Bile Salt 5β-Scymnol on Acetaminophen-Induced Liver Damage in Mice
   Theodore A. Macrides, Lee M. Naylor, Nicolette Kalafatis, Amal Shihata, and Paul F. A. Wright ... 31

Preclinical Toxicity Evaluation of Tepoxalin, a Dual Inhibitor of Cyclooxygenase and 5-Lipoxygenase, in Sprague–Dawley Rats and Beagle Dogs
   E. V. Knight, J. P. Kimball, C. M. Keenan, I. L. Smith, F. A. Wong, D. S. Barrett, A. M. Dempster,

Comparative Disposition of Acrylonitrile and Methacrylonitrile: Quantitative Whole-Body Autoradiographic Studies in Rats
   Ahmed E. Ahmed, Sam Jacob, and Burhan I. Ghanayem .................................................. 49

Design and Evaluation of an Olfactometer for the Assessment of 3-Methylindole-Induced Hyposmia
   Jane G. Owens, R. Arden James, Owen R. Moss, Kevin T. Morgan, Jane R. Bowman, Melanie F. Struve, and David C. Dorman ........... 60

Prolonged Adverse Effects of Benzalkonium Chloride and Sodium Dodecyl Sulfate in a Primary Culture System of Rabbit Corneal Epithelial Cells
   Roberta L. Grant and Daniel Acosta .................................................. 71

3,4-Dichloropropionanilide-Induced Atrophy of the Thymus: Mechanisms of Toxicity and Recovery
   Christopher F. Cuff, Wei Zhao, Tomoko Nukui, Rosana Schafer, and John B. Barnett .......................... 83

Inducibility of Metallothionein mRNA Expression and Cadmium Tolerance in Larvae of a Marine Teleost, the Turbot (Scophthalmus maximus)
   Stephen G. George, Paul A. Hodgson, Peter Tytler, and Keith Todd ................................. 91

Continued
Contribution of Mast Cell Mediators to Alterations in Macrophage Function after Malathion Administration
Kathleen Rodgers and Shiquan Xiong .......................... 100

Comparative Absorption of Lead from Contaminated Soil and Lead Salts by Weanling Fischer 344 Rats

Developmental Exposure to Aroclor 1254 Produces Low-Frequency Alterations in Adult Rat Brainstem Auditory Evoked Responses
David W. Herr, Ellen S. Goldey, and Kevin M. Crofton .............................................. 120

Kameshwar P. Singh, Hyunah L. Yoon, Stuart Ratner, and John J. Reiners, Jr. ...................... 129

Cardiovascular Responses to Short-Term Fumonisin Exposure in Swine
Geof W. Smith, Peter D. Constable, and Wanda M. Haschek ........................................ 140

Chemical-Activated Luciferase Gene Expression (CALUX): A Novel in Vitro Bioassay for Ah Receptor Active Compounds in Sediments and Pore Water
A. J. Murk, J. Legler, M. S. Denison, J. P. Giesy, C. van de Guchte, and A. Brouwer ............. 149
Academic Press is pleased to announce that this journal (and all 178 journals published by Academic Press) is now available electronically from our International Digital Electronic Access Library (IDEAL).

IDEAL, a three-year pilot project, exploits the World Wide Web on the Internet to significantly expand and improve access to scientific journals. It uses an efficient no-nonsense approach based on an open, nonproprietary modular architecture. Starting with the 1996 issues, an average 2000 articles published in Academic Press journals will be added to IDEAL every month.

To create this IDEAL environment, Academic Press has formed an alliance with Fujitsu/ICL, a major international technology provider. To ensure efficient access from all points of the globe, so-called “mirror sites” — identical databases — have been set up in the United States and Europe. Other sites will be set up later in Japan and elsewhere.

Anyone with access to the Internet will be able to browse the IDEAL database of journal tables of contents with any standard World Wide Web browser, such as Netscape, at no charge. For a limited time, searching and browsing of abstracts will also be free.

In addition, Academic Press has developed a group licensing scheme called APPEAL (Academic Press Print and Electronic Access License) for libraries. The ultimate aim is to allow convenient access to many more people than is currently possible with the print product only. As part of this license, authorized users at sites within licensed library networks will be able to view, print, and download complete articles using a PDF viewer, such as Adobe’s ACROBAT (currently available via the AP WWW home page, for free). There are no restrictions for personal use, but license conditions do apply for other uses.

If you are at a site that does not (yet) have a license, please ask your librarian to contact us at one of the addresses listed below to determine whether a convenient consortium can be found and a license issued.

We invite you to visit IDEAL through AP's home page at http://www.apnet.com.

For further information, please contact:
