# Landscape Disturbance and Biodiversity in Mediterranean-Type Ecosystems

---

With 86 Figures, 3 in Color, and 57 Tables

Springer

# Contents

## Part I: Introduction

<b>1</b>	<b>Landscape Disturbance in Mediterranean-Type Ecosystems: An Overview</b>	
	P.W. Rundel .....	3
1.1	Mediterranean-Climate Regions .....	3
1.2	Natural Disturbance Regimes .....	7
1.3	Anthropogenic Disturbance Regimes .....	8
1.4	Regional Disturbance Regimes .....	9
1.4.1	Mediterranean Basin .....	9
1.4.2	California .....	11
1.4.3	Central Chile .....	12
1.4.4	Cape Region of South Africa .....	14
1.4.5	Southwestern Australia .....	15
1.5	Resiliency of Mediterranean-Type Ecosystems to Disturbance .....	16
	References .....	18
<b>2</b>	<b>From Biodiversity to Ecodiversity – Holistic Conservation of the Biological and Cultural Diversity of Mediterranean Landscapes</b>	
	Z. Naveh .....	23
2.1	Introduction .....	23
2.2	The Neo-Technological Impoverishment of the Open Mediterranean Landscape .....	23
2.2.1	Current Trends .....	23
2.2.2	Impacts of Global Change .....	29

2.3	New Hopes for Mediterranean Landscapes .....	30
2.4	Biodiversity and Ecodiversity in the Mediterranean Basin .....	31
2.5	Mediterranean Landscapes as Perturbation-Dependent Non-Equilibrium Systems .....	33
2.6	Ecodiversity and Landscape Ecology .....	40
2.7	Discussion and Conclusions .....	47
	References .....	50

<b>3</b>	<b>Ecological Indicators of Landscape Degradation</b>	
	R.H. Groves .....	55
3.1	Introduction .....	55
3.2	Ecological Indicators of Degradation .....	56
3.2.1	Soil Particle Movement .....	56
3.2.2	Changed Phenology (Perennial Towards Annual) .....	57
3.2.3	Changed Hydrology .....	59
3.2.4	Increased Fragmentation of Landscape .....	59
3.3	Concluding Discussion .....	60
	References .....	61

## Part II: Land Use Conflicts in Mediterranean-Type Ecosystems

<b>4</b>	<b>Land Use Conflicts in the Western Cape Region of South Africa</b>	
	G. Davis and R. Wynberg .....	65
4.1	The Gap Between Ecology and Environmental Policy-Making .....	65
4.2	Characteristics of South Africa's MTEs .....	66
4.3	Historical Land Use Patterns in MTEs of South Africa .....	67
4.4	The Special Case of South Africa in the 1990s – MTEs and the Reconstruction and Development Programme .....	68
4.5	Areas of Land Use Conflict in the Fynbos Region .....	70
4.5.1	Conservation: Sustainable Land Use and Perceived Future Options .....	70

Contents	XI
4.5.2 Ecosystem Services: The Ecological Relationship Between Humans and Their Environment . . . . .	72
4.5.3 Recreation and Tourism: Low Impact Land Use with Opportunity for Income Generation . . . . .	73
4.5.4 Agriculture: Are Transformed Systems Sustainable? . . . . .	74
4.5.5 The Urban and Peri-Urban Environment as a Zone of Land Degradation . . . . .	75
4.6 Conclusion: Conflict and Land Degradation . . . . .	77
References . . . . .	78

<b>5 Impacts of Land Use on Biodiversity in Southwestern Australia</b>	
R.J. Hobbs . . . . .	81
5.1 Introduction . . . . .	81
5.2 Current Status of the Biota . . . . .	81
5.3 Types of Modifications . . . . .	84
5.4 The Coastal Plain . . . . .	85
5.4.1 Perth's Offshore Islands: Vignettes of Ecosystem Modification . . . . .	86
5.5 The Forests . . . . .	89
5.5.1 Phytophthora . . . . .	89
5.5.2 Forest Management Practices . . . . .	90
5.6 Agricultural Areas . . . . .	92
5.6.1 Impacts on Biota . . . . .	93
5.6.2 Impacts on Non-Native Species . . . . .	94
5.6.3 Ecosystem Impacts . . . . .	96
5.7 Management Responses . . . . .	98
References . . . . .	100

<b>6 Land Use Conflicts in California</b>	
H.S. Walter . . . . .	107
6.1 Introduction . . . . .	107
6.2 California: the Diversity State . . . . .	107
6.3 Historic Landscape Degradation . . . . .	109
6.4 Driving Forces of Contemporary Land Use Conflicts . . . . .	111
6.4.1 Ultimate Driving Forces . . . . .	112
6.4.2 Proximate Driving Forces . . . . .	114

6.5	Regional Case Studies .....	116
6.5.1	Northern Spotted Owl and Marbled Murrelet .....	117
6.5.2	Sacramento River and Delta .....	117
6.5.3	Desert Tortoise in the Mojave Desert .....	118
6.5.4	Coastal Sage Scrub .....	119
6.5.5	The Sierra Nevada Ecosystem .....	121
6.6	Conclusions .....	123
	References .....	124

<b>7</b>	<b>Abandoned Lands and Land Use Conflicts in Southern France</b>	
	M. Etienne, J. Aronson and E. Le Floch .....	127
7.1	Introduction .....	127
7.2	General Processes Affecting Landscape Transformation .....	128
7.3	Three Responses to Ecosystem Degradation or Abandonment .....	128
7.4	Historical Overview .....	130
7.5	Case Studies .....	131
7.5.1	The Terraces of Interior Corsica .....	131
7.5.2	The Township of Puéchabon .....	132
7.5.3	The La Crau Plain .....	133
7.5.4	Coastal Forest Remnants in Provence (the Colle du Rouet) .....	136
7.6	Discussion .....	137
	References .....	139

<b>8</b>	<b>Land Use Changes and Conflicts in the Mediterranean-Type Ecosystems of Western Crete</b>	
	V.P. Papanastasis and A. Kazaklis .....	141
8.1	Introduction .....	141
8.2	A Representative Area of Western Crete .....	142
8.3	Mapping and Identifying Land Uses .....	142
8.4	Land Use Changes .....	143
8.5	Land Use Conflicts .....	149
8.5.1	Conservation vs Agricultural Development .....	149
8.5.2	Extensive vs Intensive Livestock Husbandry .....	150
8.5.3	Conservation vs Massive Tourism .....	151

Contents	XIII	
8.6	Conclusions	152
8.7	Summary	153
	References	153
<b>9</b>	<b>Land Use Changes and Conflicts in Central Chile</b>	
	J. Aronson, A. del Pozo, C. Ovalle, J. Avendaño, A. Lavin and M. Etienne	155
9.1	Introduction	155
9.1.1	“Landscape”?	155
9.2	The Secano Interior of Central Chile	156
9.2.1	Overview	156
9.2.2	The Green Tide	158
9.3	The Three Waves	158
9.3.1	The First Wave	159
9.3.2	The Second Wave	161
9.3.2.1	Changing Land Use	161
9.3.2.2	Land Tenure	162
9.3.2.3	Demographic Trends	163
9.3.3	The Third Wave	163
9.3.3.1	Geographical Aspects	163
9.3.3.2	Ecological Impact	164
9.4	Discussion	164
	References	167

### **Part III: Landscape Disturbance and Plant Diversity**

<b>10</b>	<b>Local Endemism and Plant Conservation in the Cape Floristic Region</b>	
	R.M. Cowling and D.J. McDonald	171
10.1	Introduction	171
10.2	Study Sites and Approach	172
10.3	Geography of Endemism	174
10.3.1	Endemism and Area	174
10.3.2	Habitat Aspects	175
10.4	Taxonomy and Phylogeny of Endemism	176
10.5	Biology of Endemism	176
10.5.1	Population Size	177
10.5.2	Growth Form	178

10.5.3	Dispersal Mode .....	178
10.5.4	Fire Survival .....	178
10.5.5	Trait Interactions .....	180
10.6	Speciation .....	181
10.7	Conservation Implications .....	182
10.7.1	Extinctions .....	182
10.7.2	Reserve Design .....	184
10.8	Conclusions .....	184
	References .....	185

## **11 Managing Biodiversity on the Cape Peninsula, South Africa: A Hotspot Under Pressure**

D.M. Richardson, C. Gelderblom, B.W. van Wilgen  
and T.H. Trinder-Smith .....

189

11.1	Introduction .....	189
11.2	The Cape Peninsula – Physical Features, Biodiversity and Current Conservation Status .....	191
11.3	Assessing the Current Threats to the Cape Peninsula's Biodiversity .....	194
11.4	Considering Future Threats to the Cape Peninsula's Biodiversity .....	195
11.5	Facing the Future .....	199
11.6	Conclusions .....	203
	References .....	203

## **12 Biodiversity and Conservation Biology of Coastal Transition Zones from Mediterranean to Desert Ecosystems: An Intercontinental Comparison**

K.J. Esler, P.W. Rundel and R.M. Cowling .....

205

12.1	Introduction .....	205
12.2	Selective Regimes .....	206
12.2.1	Climate .....	206
12.2.2	Geomorphology and Soils .....	209
12.3	South Africa .....	210
12.3.1	Phytogeography, Community Structure and Biodiversity .....	210
12.3.2	Landscape Disturbance .....	213
12.3.3	Protected Areas .....	215

Contents	XV
12.4 California/Baja California	216
12.4.1 Phytogeography, Community Structure and Biodiversity	216
12.4.2 Landscape Disturbance	218
12.4.3 Protected Areas	219
12.5 Chile	220
12.5.1 Phytogeography, Community Structure and Biodiversity	220
12.5.2 Landscape Disturbance	223
12.5.3 Protected Areas	224
12.6 Conclusions	225
References	227

**13 Distribution and Ecology of Geophytes in Chile. Conservation Threats to Geophytes in Mediterranean-Type Regions**

A.J. Hoffmann, F. Liberona and A.E. Hoffmann	231
13.1 Introduction	231
13.2 Latitudinal Distribution	232
13.3 Landform Distribution	236
13.4 Soil Type	236
13.5 Storage Organ	238
13.6 Flowering Phenology	239
13.7 Breeding Systems	241
13.8 Conservation of Geophytes in Mediterranean-Type Regions	242
13.9 What is Known?	244
13.10 What Can be Done, What Has Been Done?	248
References	251

**Part IV: Demography and Ecophysiology of Succession**

**14 Coupling Demography, Physiology and Evolution in Chaparral Shrubs**

J.E. Keeley	257
14.1 Introduction	257
14.2 Disturbance-Dependent (Gap) Recruitment	257

14.3	Disturbance-Free (Gap-Avoiding) Recruitment .....	258
14.4	Morphological and Physiological Correlates .....	258
14.4.1	Root Systems .....	258
14.4.2	Water Relations .....	259
14.5	Coupling Demography, Physiology and Evolution .....	260
14.6	Conclusions .....	263
	References .....	263
15	<b>Physiological Ecology of Mediterranean Seeds: Links with <i>Ex Situ</i> Conservation of Plants</b>	
	C. Vázquez-Yanes and A. Orozco-Segovia .....	265
15.1	Introduction .....	265
15.2	Mediterranean Seed Traits .....	265
15.2.1	Soil and Canopy Seed Banks .....	265
15.2.2	Dormancy Mechanisms .....	266
15.3	Seed Longevity .....	267
15.4	<i>Ex Situ</i> Conservation of Seeds .....	268
15.5	Seed Recollection and Handling .....	270
15.6	Conclusions .....	271
	References .....	271
16	<b>Aspects of Demography in Post-Fire Mediterranean Plant Communities of Greece</b>	
	M. Arianoutsou .....	273
16.1	Introduction .....	273
16.2	Mediterranean Ecosystems of Greece .....	274
16.3	Fire Frequency .....	275
16.4	Plant Adaptive Traits .....	277
16.5	Post-Fire Succession .....	280
16.6	Plant Demography .....	283
16.7	Seed Bank Dynamics .....	289
16.8	Life Span and Fecundity of Seedling Plants .....	290
16.9	Conclusions .....	291
	References .....	291

<b>17</b>	<b>Ecophysiological Processes and Demographic Patterns in the Structuring of California Chaparral</b>	
	S.D. Davis, K.J. Kolb and K.P. Barton . . . . .	297
17.1	Introduction . . . . .	297
17.2	Field Study Area . . . . .	299
17.3	Water Stress and Embolism . . . . .	302
17.4	Conclusions . . . . .	307
	References . . . . .	308

## Part V: Landscape Disturbance and Animal Diversity

<b>18</b>	<b>Insect Population Changes and Conservation in the Disturbed Landscapes of Mediterranean-Type Ecosystems</b>	
	M.J. Samways . . . . .	313
18.1	Introduction . . . . .	313
18.2	Three Provisos . . . . .	314
18.2.1	Landscape Disturbance: Fragmentation or Variegation . . . . .	314
18.2.2	Are Native Insects in MTEs Under More Threat than Those in Other Ecosystems? . . . . .	315
18.2.3	Do the Differences in Geographical Position, Pre-Historical Climate and Historical Land Use Patterns Affect the View of Insect Conservation in the Different MTEs? . . . . .	315
18.3	Six Points on Insects and Conservation in MTEs . . . . .	316
18.3.1	Insects as Indicators of Anthropogenic Change . . . . .	316
18.3.2	Threatened Insects . . . . .	318
18.3.3	Threats to Insect Mutualisms . . . . .	320
18.3.4	Threatened Plants as Threats to Insects . . . . .	321
18.3.5	Insects as Threatening or Invasive Agents . . . . .	321
18.3.6	Beneficial Insects . . . . .	322
18.4	Synergism Between Landscape Disturbance and Other Factors Causing Changes in Insect Populations . . . . .	323
18.5	Discussion . . . . .	324
18.6	Corollary . . . . .	326
	References . . . . .	327

<b>19</b>	<b>Loss of Vertebrate Diversity Following European Settlement of Australian Mediterranean Regions</b>	
	B.J. Fox .....	333
19.1	Introduction .....	333
19.2	Pre-European Mammal Fauna .....	333
19.3	Critical Weight Range .....	334
19.4	Regional Losses .....	335
19.5	Factors Causing Loss of Biodiversity .....	338
19.5.1	Fragmentation and Loss of Habitat .....	338
19.5.2	Diversion of Resources and Loss of Vegetative Cover .....	340
19.5.3	Changes to Fire Regimes .....	340
19.5.4	Introduced Species .....	340
19.6	Time Lines .....	341
19.7	Experimental Evidence for Predation .....	343
19.8	Model for the Impact of European Invasion .....	344
19.9	Conclusions .....	345
	References .....	346
<b>20</b>	<b>Bird Diversity in a Changing Landscape (Tuscany, Italy)</b>	
	A. Farina .....	349
20.1	The Landscapes of Tuscany .....	349
20.1.1	Geomorphology, Climate, and Vegetation .....	349
20.1.2	The Landscape .....	350
20.1.3	The Recent Landscape Changes and the Causes of Land Degradation .....	351
20.2	Ongoing Studies .....	352
20.2.1	Small-Scale Studies .....	352
20.2.2	Large-Scale Studies .....	353
20.3	The Importance of the Tuscany Region for Birds .....	355
20.4	The Importance of Coastal Farmlands and Pine Plantations .....	355
20.5	The Importance of Hilly and Submontane Rural Areas .....	359
20.5.1	<i>Coltura Mista</i> Farmland .....	359
20.5.2	Chestnut Orchards .....	360
20.6	Evidence of Bird Decline in Lowland Farmlands .....	361
20.7	The Importance of Forest-Grassland Ecotones .....	362

20.8	Guidelines to Conserve Mediterranean Landscapes and Their Fauna .....	363
20.9	Summary .....	365
	References .....	365
21	<b>Patterns of Mammalian Biodiversity, Urbanization, and Land Use in Southern California</b> R.D. Quinn .....	369
21.1	Introduction .....	369
21.2	Study Area .....	370
21.3	Human Population Growth .....	372
21.4	The Mammals .....	373
21.4.1	Extinction and Extirpation .....	376
21.4.2	Naturalized Species .....	377
21.4.3	Range Expansions .....	378
21.4.4	Direct Conflicts .....	379
21.5	Species Richness Changes .....	380
21.5.1	Mountains .....	380
21.5.2	Valleys .....	381
21.5.3	Grasslands .....	382
21.6	Multispecies Habitat Conservation Plans .....	382
21.7	Outlook .....	384
21.8	Conclusions .....	385
	References .....	386
22	<b>Biodiversity in Fluctuating Dry-Land Environments: Basic and Applied Aspects</b> F.M. Jaksic and P. Feinsinger .....	389
22.1	Introduction .....	389
22.2	Methods of Study .....	391
22.3	Predator and Prey Diversity, Abundance, and Climatic Variation .....	392
22.4	Interpreting Biodiversity in a Fluctuating Environment .....	399
22.4.1	Biodiversity and Redundant Species .....	399
