2008 IEEE Symposium on Computational Intelligence and Games

(CIG)

Perth, Australia
15 – 18 December 2008
# TABLE OF CONTENTS

## SPECIAL SESSION: COEVOLUTION IN GAMES

Investigating Learning Rates for Evolution and Temporal Difference Learning ......................................................... 1  
Simon Lucas  
Adapting to Human Game Play ........................................................................................................................................... 8  
Phillipa Avery, Zbigniew Michalewicz  
Evolution of Counter Strategies: Application of Co-evolution to Texas Hold'em Poker ........................................... 16  
Thomas Thompson, John Levine, Russell Wotherspoon

## SPECIAL SESSION: PLAYER/OPPONENT MODELING

Can Opponent Models Aid Poker Player Evolution? ........................................................................................................... 23  
Roderick Baker, Peter Cowling, Thomas Randall, Ping Jiang  
Evolving Opponent Models for Texas Hold 'Em .............................................................................................................. 31  
Alan Lockett and Risto Miikkulainen  
An Evaluation of Models for Predicting Opponent Positions in First-Person Shooter Games ........................................... 39  
Stephen Hladky, Vadim Bulitko  
Dynamic Formations in Real-Time Strategy Games ........................................................................................................ 47  
Marcel van der Heijden, Sander Bakkes, Pieter Spronck

## SPECIAL SESSION: COMPUTATIONAL INTELLIGENCE IN REAL-TIME STRATEGY GAMES

Dealing with Fog of War in a Real Time Strategy Game Environment .................................................................................. 55  
Johan Hagelback, Stefan J. Johansson  
Intelligent Anti-Grouping in Real-Time Strategy Games .................................................................................................... 63  
Nicola Beume, Tobias Hein, Boris Naujoks, Nico Pietikowski, Mike Preuss  
Intelligent Moving of Groups in Real-Time Strategy Games .................................................................................................. 71  
Holger Danielsiek, Raphael Stuer, Andreas Thom, Nicola Beume, Boris Naujoks  
Rapid Adaptation of Video Game AI ................................................................................................................................... 79  
Sander Bakkes, Pieter Spronck, Jaap van den Herik

## SPECIAL SESSION: PLAYER CLASSIFICATION

Real-time Challenge Balance in an RTS Game using rtNEAT ............................................................................................... 87  
Jacob Kaue Olesen, Georgios Yannakakis, John Hallam  
Friendly Partner System of Poker Game with Facial Expressions ...................................................................................... 95  
Keisuke Ohsone, Takehisa Onisawa  
Real-time Adaptation of Augmented-Reality Games for Optimizing Player Satisfaction ............................................. 103  
Georgios Yannakakis, John Hallam
An Experiment in Automatic Game Design
Julian Togelius, Juergen Schmidhuber

SIMULATED CAR RACING
The WCCI 2008 Simulated Car Racing Competition
Daniele Loiacono, Julian Togelius, Pier Luca Lanzi, Leonard Kinnaird-Heether, Simon M. Lucas
A Fuzzy Approach For The 2007 CIG Simulated Car Racing Competition
Duc Thang Ho, Jon Garibaldi
Generating Diverse Opponents with Multiobjective Evolution
Alexandros Agapitos, Julian Togelius, Simon Lucas, Juergen Schmidhuber, Andreas Konstantinidis

ADVERSARIAL AND FPS GAMES
Creating a Multi-Purpose First Person Shooter Bot with Reinforcement Learning
Michelle McPartland, Marcus Gallagher
Visual Control in Quake II with a Cyclic Controller
Matt Parker, Bobby Bryant
Scaling-up Behaviours in EvoTanks: Applying Subsumption Principles to Artificial Neural Networks
Thomas Thompson, John Levine
Interactively Evolved Modular Neural Networks for Game Agent Control
John Reeder, Roberto Miguez, Jessica Sparks, Michael Georgiopoulos, Georgios Anagnostopoulos

MONTE CARLO APPROACHES
Determination and Evaluation of Efficient Strategies for a Stop or Roll Dice Game: Heckmeck am Bratwurmeck
Nathalie Chetcuti-Sperandio, Fabien Delorme, Sylvain Lagrue, Denis Stackowiak
Combining Final Score with Winning Percentage by Sigmoid Function in Monte-Carlo Simulations
Kazutomo Shibahara, Yoshiyuki Kotani
Evaluation of Monte Carlo Tree Search and the Application to Go
Shogo Takeuchi, Tomoyuki Kaneko, Kazunori Yamaguchi

BOARD GAMES
Learning Position Evaluation for Go with Internal Symmetry Networks
Alan Blair
An Othello Evaluation Function Based on Temporal Difference Learning using Probability of Winning
Yasuhiro Osaki, Kazutomo Shibahara, Yasuhiro Tajima, Yoshiyuki Kotani
Ensemble Approaches in Evolutionary Game Strategies: A Case Study in Othello
Kyung-Joong Kim, Sung-Bae Cho
Transfer of Evolved Pattern-Based Heuristics in Games ................................................................. 220
Erkin Bahceci, Risto Miikkulainen

VIDEO GAMES

An Influence Map Model for Playing Ms. Pac-Man ............................................................................. 228
Nathan Wirth, Marcus Gallagher

Using NEAT for Continuous Adaptation and Teamwork Formation in Pacman .............................. 234
Mark Wittkamp, Luigi Barone, Philip Hingston

On-line Adapting Games using Agent Organizations ............................................................................ 243
Joost Westra, Hado Hasselt, Virginia Dignum, Frank Dignum

Brain-Computer Interface: Next Generation Thought Controlled Distributed Video Game Development Platform .......................................................................................................................... 251
Payam Aghaei Pour, Tauseef Gulrez, Omar Al Zoubi, Gaetano Gargiulo, Rafael Calvo

REAL-WORLD AND SERIOUS GAMES

Hierarchical Path Planning for Multi-size Agents in Heterogeneous Environments .......................... 258
Daniel Harabor, Adi Botea

Preparing for the Aftermath: Using Emotional Agents in Game-Based Training for Disaster Response ...................................................................................................................................................... 266
Donna Djordjevich, Patrick Xavier, Michael Bernard, Jonathan Whetzel, Matthew Glickman, Stephen Verzi

A Study of Electricity Market Dynamics Using Invasive Weed Colonization Optimization .............. 276
Mostafa Sahraei-Ardakani, Mahnaz Roshanaei, Ashkan Rahimi-Kian, Caro Lucas

Morphology Independent Dynamic Locomotion Control for Virtual Characters .............................. 283
Adrian Boeing

POSTER SESSION

Hierarchical Nash-Q Learning in Continuous Games ............................................................................. 290
Mostafa Sahraei-Ardakani, Ashkan Rahimi-Kian, Majid Nili-Ahmadabadi

Applying GA for Reward Allotment in an Event-driven Hybrid Learning Classifier System for Soccer Video Games ...................................................................................................................................................... 296
Yuhki Inoue, Yuji Sato

Survival by Continuous Learning in a Dynamic Multiple Task Environment .................................... 304
Hasan Mujtaba, Rauf Baig

An Evaluation of the Benefits of Look-Ahead in Pac-Man .................................................................. 310
Thomas Thompson, Lewis McMillan, John Levine, Alastair Andrew

A Game-Theoretical Approach for Designing Market Trading Strategies .......................................... 316
Garrison Greenwood, Richard Tymerski

Social Learning Methods in Board Game Agents .................................................................................. 323
Vukosi Marivate, Tshilidzi Marwala

Learning and Knowledge Generation in General Games ....................................................................... 329
Shiven Sharma, Ziad Kobti, Scott Goodwin
