[Burton, John W.](#)

Description

Unsolved social and political problems exist at all levels of interaction: in the family, the school, industry, inter-communal relations and

inter-state relations. Evidence of unsolved problems are war, revolution, hijacking, murder, assault, destruction of property and others. This book focusses on the common features of these problems and suggests processes for solving them that apply at all levels. After distinguishing between problem-solving and decision-making, Dr. Burton argues that...[\[Show more\]](#) problems not solved within a particular system of thought may require a fundamentally different approach. He critically analyses the hidden assumptions underlying classical and conventional thinking and considers various alternatives. A distinction is made between individual values and human needs that are not merely universal, but which are a necessary pre-condition to a harmonious social organisation. These are used to develop an alternative paradigm which includes problem solving processes as a means of handling situations as well as of analysing them. In conclusion, the author draws the strands together and relates the analysis to the practical realities of unsolved problems.

Since the publication of his seminal book, *Deviance, Terrorism and War: The Process of Solving Unsolved Social and Political Problems* (1979), John Burton has been closely identified with the theory of basic human needs, an approach to understanding protracted social conflict that he continues to espouse and to refine (see, e.g., Burton, 1990a, 1997). Burton did not invent the theory, which posits the existence of certain universal needs that must be satisfied if people are to prevent or resolve destructive conflicts, but he gave it its most impassioned and uncompromising expression. In *Devianc...* Since the publication of his seminal book, *Deviance, Terrorism and War: The Process of Solving Unsolved Social and Political Problems* (1979), John Burton has been closely identified with the theory of basic human needs, an approach to understanding protracted social conflict that he continues to espouse and to refine (see, e.g., Burton, 1990a, 1997).
