• <b>Session 1: Compilation and optimization</b>	
– Separate Compilation for Synchronous Programs .....	1
<i>Jens Brandt, Klaus Schneider</i>	
– Accelerating WCET-driven Optimizations by the Invariant Path Paradigm – .....	11
a Case Study of Loop Unswitching	
<i>Paul Lokuciejewski, Fatih Gedikli, Peter Marwedel</i>	
– Register Allocation Deconstructed .....	21
<i>David Ryan Koes, Seth Copen Goldstein</i>	
• <b>Session 2: Keynote talk</b>	
The PROMPT Design Principles for Predictable Multi-Core Architectures .....	31
<i>Reinhard Wilhelm</i>	
• <b>Session 3: Domain-specific languages</b>	
– Implementing AUTOSAR Scheduling and Resource Management on an Embedded SMT Processor .....	33
<i>Florian Kluge, Chenglong Yu, Jörg Mische, Sascha Uhrig, Theo Ungerer</i>	
– The Canals Language and its Compiler .....	43
<i>Andreas Dahlin, Johan Ersfolk, Guifu Yang, Haitham Habli, Johan Lilius</i>	
– A Design Flow Based on a Domain Specific Language to Concurrent Development of .....	53
Device Drivers and Device Controller Simulation Models	
<i>Edson Lisboa, Luciano Silva, Igino Chaves, Thiago Lima, Edna Barros</i>	
• <b>Session 4: Validation and verification</b>	
– Certifying Deadlock-freedom for BIP Models .....	61
<i>Jan Olaf Blech, Michaël Périn</i>	
– Precise Simulation of Interrupts using a Rollback Mechanism .....	71
<i>Florian Brandner</i>
