Preface

This volume collects the papers selected for presentation at the Eighteenth Italian Symposium on Advanced Database Systems (SEBD 2010), held in Rimini, Italy, from the 20th to the 23rd of June 2010.

SEBD is the major annual event of the Italian database research community. The symposium is conceived as a gathering forum for the discussion and exchange of ideas and experiences among researchers and experts from the academy and industry, about all aspects of database systems and their applications.

SEBD is back in Rimini after sixteen years, and it is interesting to observe how the landscape of the Italian database research community has changed. In 1994 twenty-one papers were accepted, now the number has more than doubled, meaning that the community has been steadily growing. Most of the topics considered in 1994 are still around, even if the language, the formalisms and the reference applications have changed. The Web was e-mail, FTP, Usenet, a small amount of HTML pages here and there, and little more, now it is the pervasive engine of information dissemination and search. The Web is so powerful that a series of brand new ideas and applications have arisen from it, due to a mix of possibility and necessity. Social systems across the Web, mobility, and heterogeneity were not conceivable in the early 1990s. Semantic web, data mining and warehousing, streaming techniques, large scale integration are necessary to deal with the growing amount of data and information.

The SEBD 2010 program reflects the current interests of the Italian database researchers and covers most of the topics considered by the international research community. Sixty papers were submitted to SEBD 2010, of which twenty-two were research papers, two were software demonstrations, and thirty-four were extended abstracts, i.e., papers containing descriptions of on-going projects or presenting results already published. Fifty-one papers were accepted for presentation, of which seventeen were research papers, two were software demonstrations, and thirty-two were extended abstracts.

Besides paper presentations, the program includes a tutorial by Divesh Srivastava (AT&T Labs-Research) and two invited talks, the first by Hector Garcia-Molina (Stanford University, CA) and the second by Amr El Abbadi (University of California, CA).

We would like to thank all the authors who submitted papers and all symposium participants. We are grateful to the members of the Program Committee and the external referees for their thorough work in reviewing submissions with expertise and patience, and to the members of the SEBD Steering Committee for their support in the organization of SEBD 2010. Special thanks are due to the members of the Organizing Committee and to the University of Bologna, Polo di Rimini, which made this event possible. Finally, we gratefully thank all cooperating institutions.

Rimini, June 2010

</table>
Matching Micro-Data (Extended Abstract) ........................................ 62
Silvana Castano, Alfio Ferrara, Stefano Montanelli, Gaia Varese

Semantic tagging for crowd computing (Extended Abstract) ............. 70
Roberto Mirizzi, Azzurra Ragone, Tommaso Di Noia, Eugenio Di Sciascio

Discovering Eras in Evolving Social Networks (Extended Abstract) .. 78
Michele Berlingerio, Michele Coscia, Fosca Giannotti, Anna Monreale, Dino Pedreschi

Is Indeed Fish the Best Choice in Rimini? (Extended Abstract) ........... 86
Paolo Ciaccia, Riccardo Torlone

Session 3. Data Mining and Knowledge Discovery

Suggesting Tourist Destinations by means of Time-Slice Density Estimation .......................................................... 94
Michelangelo Ceci, Annalisa Appice, Donato Malerba, Nicola Schirone, Nicola Davide Traversa, Valerio Valrosso

Towards Coordination Patterns for Complex Experimentations in Data Mining .................................................. 106
Farhad Arbab, Claudia Diamantini, Domenico Potenza, Emanuele Storti

Compactly Storing Frequent Itemsets (Extended Abstract) ............... 118
Elena Baralis, Tania Cerquitelli, Silvia Chiusano, Alberto Grand

Querying and mining trajectories with gaps: a multi-path reconstruction approach (Extended Abstract) ........... 126
Mirco Nanni, Roberto Trasarti

Location Prediction through Trajectory Pattern Mining (Extended Abstract) ........................................ 134
Anna Monreale, Fabio Pinelli, Roberto Trasarti, Fosca Giannotti

Tuning Evolutionary Algorithms in High Dimensional Classification Problems (Extended Abstract) ................ 142
Laura Maria Cannas, Nicoletta Dessî, Barbara Pes

Learning Multi-Class Support Vector Models from Distributed Data using Core-Sets (Extended Abstract) ........... 150
Stefano Lodi, Ricardo Nanculef, Claudio Sartori

Session 4. Workflow Management, Data Security & Data Mining

Hierarchical Transductive Classification from Textual Data with Relevant Example Selection ......................... 158
Michelangelo Ceci, Pasqua Fabiana Lanotte
A Logic-Based Method for Business Process Knowledge Base Management
  Antonio De Nicola, Michele Missikoff, Maurizio Proietti, Fabrizio Smith

Archiving Digital Documents: Issues in Dematerialization (Extended Abstract)
  Francesco Buccafurri, Gianluca Caminiti, Gianluca Lax

Semantic Model Checking Security Requirements for Web Services
  (Extended Abstract)
  Lorenzo Boaro, Emanuele Glorio, Francesco Pagliarecci, Luca Spalazzi

Session 5. Mobile & Stream Databases

Data Management Issues for Intelligent Transportation Systems
  Federica Mandreoli, Riccardo Martoglia, Wilma Penzo, Simona Sassatelli

Non-standard inference services for mobile computing: concept abduction via m-OODBMS
  Michele Ruta, Floriano Scioscia, Eugenio Di Sciascio

Content Management for Mobile Multimedia Art Guides (Extended Abstract)
  Augusto Celentano, Marek Maurizio, Renzo Orsini

Clustering Spatio-Temporal Data Streams
  Anna Ciampi, Annalisa Appice, Donato Malerba, Giuseppe Saponaro, Domenico Triglione

Session 6. Databases and Digital Libraries, Data Warehousing

The NESTOR Framework: Manage, Access and Exchange Hierarchical Data Structures
  Maristella Agosti, Nicola Ferro, Gianmaria Silvello

A Model and a Language for Large Textual Databases
  Marek Maurizio, Renzo Orsini

Automatically Joining Pictures to Multiple Taxonomies (Extended Abstract)
  Ilaria Bartolini, Paolo Ciaccia

Efficient and Effective RFID Data Warehousing (Extended Abstract)
  Bettina Fazzinga, Sergio Flesca, Filippo Farfaro, Elio Masciari

Integrating Semantics within Compressed OLAP Views in the Hand-OLAP System (Extended Abstract)
  Alfredo Cuzzocrea, Domenico Saccà, Paolo Serafino
Visual OLAP analysis on network constrained trajectories (Extended Abstract) .......................................................... 290
Luca Leonardi, Salvatore Orlando, Alessandra Raffaetà, Alessandro Roncato, Claudio Silvestri

Computing OLAP Aggregates over Multidimensional Data Streams
Efficiently (Extended Abstract) ......................................................... 298
Alfredo Cuzzocrea, Paolo Serafino

Session 7. Information Integration & Biological Databases

Discovering Temporal Patterns of Complex Events in Biosignal Data . . . 306
Corrado Loglisci, Michelangelo Ceci, Donato Malerba

PP-Index: Using Permutation Prefixes for Efficient and Scalable Similarity Search (Extended Abstract) ................................. 318
Andrea Esuli

Experimenting Ontology-based Data Access with MASTRO (Extended Abstract) ................................................................. 326
Domenico Fabio Savo, Domenico Lembo, Maurizio Lenzerini,
Antonella Poggi, Mariano Rodriguez-Maro, Vittorio Romagnoli,
Marco Ruzzi, Gabriele Stella

Asymmetric Global Alignment of Protein-Protein Interaction Graph Databases (Extended Abstract) ............................................. 334
Nicola Ferraro, Luigi Palopoli, Simona Panni, Simona E. Rombo

A Complete LCA Data Integration Solution Built Upon MOMIS System (Extended Abstract) ......................................................... 342
Sonia Bergamaschi, Luca Sgaravato, Maurizio Vincini

Geomedica: a web portal for managing and querying clinical and biological data (Demo Paper) .................................................... 350
Giuseppe Tradigo, Mario Cannataro, Pietro H. Guzzi, Pierangelo Velti

MOMIS: Getting through the THALIA benchmark (Demo Paper) ........ 354
Domenico Beneventano, Sonia Bergamaschi, Mirko Orsini, Maurizio Vincini

Session 8. XML Data, Probabilistic Databases & Data Design

Fast and Effective Hierarchical Clustering of XML Documents by Structure ................................................................. 358
Gianni Costa, Giuseppe Manco, Riccardo Ortale, Ettore Ritacco

Efficiently Bounding Cardinality Ratios through Database Constraints . . 370
Paolo Ciaccia, Matteo Golfarelli, Stefano Rizzi
From Entity Relationship to XML Schema: a Graph-Theoretic Approach (Extended Abstract) ............................................. 382
Massimo Franceschet, Donatella Gabiani, Angelo Montanari, Carla Piazza

Probabilistic Reconciliation of Records from Inaccurate Web Sources (Extended Abstract) ............................................. 390
Lorenzo Blanco, Valter Crescenzi, Paolo Merialdo, Paolo Papotti

Polymorphism in Datalog and Inheritance in a Metamodel (Extended Abstract) ................................................................. 398
Paolo Atzeni, Giorgio Gianfuortne, Daniele Toti

Clustering XML Documents: a Distributed Collaborative Approach (Extended Abstract) ............................................. 406
Sergio Greco, Francesco Gullo, Giovanni Ponti, Andrea Tagarelli, Giuseppe Agapito

Session 9. Query Processing and Optimization

Object Identification across Multiple Sources ........................................... 414
Matteo Di Gioia, Monica Scannapieco, Domenico Beneventano

On Finding Query Rewritings under Expressive Constraints .................. 426
Alex Borgida, Jos de Bruijn, Enrico Franconi, İnanç Seylan, Umberto Straccia, David Toman, Grant Weddell

Querying and Updating Inconsistent Databases (Extended Abstract) .......... 438
Sergio Greco, Cristian Molinaro, Francesca Spezzano, Irina Trubitsyna

Search Computing Systems (Extended Abstract) ........................................ 446
Stefano Ceri, Adnan Abid, Mamoun Abu Helou, Alessandro Bozzon, Daniele Braga, Marco Brambilla, Alessandro Campi, Francesco Corcoglioniti, Emanuele Della Valle, Davide Eynard, Piero Fraternali, Michael Grossniklaus, Davide Martinenghi, Stefania Ronchi, Marco Tagliasacchi, Salvatore Vadacca

Tractable Query Answering over Conceptual Schemata (Extended Abstract) ........................................... 454
Andrea Calì, Georg Gottlob, Andreas Pieris

Data Quality Aware Queries in the MOMIS Integration System .................. 462
Domenico Beneventano, R. Carlos Nana Mbinkeu

Author Index ........................................... 474
