What do we know when we know that a theory is consistent? p. 1
Reflecting proofs in first-order logic with equality p. 7
Reasoning in extensional type theory with equality p. 23
Nominal techniques in Isabelle/HOL p. 38
Tabling for higher-order logic programming p. 54
A focusing inverse method theorem prover for first-order linear logic p. 69
The CoRe calculus p. 84
Simulating reachability using first-order logic with applications to verification of linked data structures p. 99
Privacy-sensitive information flow with JML p. 116
The decidability of the first-order theory of Knuth-Bendix order p. 131
Well-nested context unification p. 149
Termination of rewrite systems with shallow right-linear, collapsing, and right-ground rules p. 164
The OWL instance store : system description p. 177
Temporal logics over transitive states p. 182
Deciding monodic fragments by temporal resolution p. 204
Hierarchic reasoning in local theory extensions p. 219
Proof planning for first-order temporal logic p. 235
System description : Multi a multi-strategy proof planner p. 250
Decision procedures customized for formal verification p. 255
An algorithm for deciding BAPA : Boolean algebra with Presburger arithmetic p. 260
Connecting many-sorted theories p. 278
A proof-producing decision procedure for real arithmetic p. 295
The MathSAT 3 system p. 315
Deduction with XOR constraints in security API modelling p. 322
On the complexity of equational horn clauses p. 337
A combination method for generating interpolants p. 353
sKizzo : a suite to evaluate and certify QBFs p. 369
Regular protocols and attacks with regular knowledge p. 377
The model evolution calculus with equality p. 392
Model representation via contexts and implicit generalizations p. 409
Proving properties of incremental Merkle trees p. 424
Computer search for counterexamples to Wilkie's identity p. 441
KRHyper - in your pocket p. 452
